REGULATORY COMPLIANCE

Keystone Industries maintains a totally integrated quality management system in full compliance with the US Food and Drug Administration's cGMP regulations governing medical devices (21 CFR 820) and pharmaceuticals (21 CFR 210 & 211) as well as other applicable federal regulations. Keystone also meets the requirements of the European Medical Device Directive and Canadian Medical Device Regulations and is certified through SGS North America, Inc. to ISO 9001:2008 and to EN ISO 13485:2012, governing the requirements for medical devices sold into Europe and ISO 13485:2003 for devices sold into Canada.

In addition, Keystone strives to conform to all applicable regulatory requirements for all products sold into other foreign markets. Keystone Industries has documented procedures governing all quality related activities from the placing of sales and purchase orders, through production, distribution and post distribution monitoring, including continuous risk managment and adverse event reporting.

Through an environment of continuous process improvement and our commitment to excellence, Keystone strives to achieve the highest level of regulatory compliance, satisfy our customer requirements and be a leader in the dental products industry.

All MSDS's are available for download on our website at www.keystoneind.com.

ACCESSORIES

APAVIA® AVTMAX

With the industry's highest retention rate of 99.7%, Apavia® provides an Advanced Vacuum Technology (AVT) solution that performs Amalgam Separation and other contaminant removal, protecting and extending the life of a vacuum pump. It not only captures mercury and other harmful particles, it protects and extends the life of the vacuum pump and drastically reduces the frequency of changing screen mesh traps. The Apavia® Amalgam Separator boasts a high containment capacity for extended service and pump life, cutting-edge advanced air circulation techniques with rapid velocity and waste capture. The AVTMax's fully molded design offers a clear view of the system in action. With ISO 11143:2008 certification by NSF, meeting Best Management Practices (BMPs), and over 99.7% removal, Apavia's® high efficiency cyclonic filtration design leads the way in advanced vacuum solutions while also complying with the rigid amalgam separation requirement and all newly proposed EPA regulations.

The full AVTMax™ unit includes mounting bracket, AVTMax™ replacement canister and all installation parts to make the install a breeze with virtually no turnover time! Apavia's® large replacement canister is universally molded to fit currently installed competitive units, allowing them to meet the requirements of the newly proposed regulations, while also extending the frequency of necessary change outs and reducing expenses. All replacement canisters are part of Apavia's® environmentally safe recycling program that meets both state and federal regulations.

#AV-AVT-SYS-KI AVTMax System (Intro Kit)

APAVIA® ECOMAX

Apavia® EcoMax™ technology turns ordinary tap water into stabilized ozone - a powerful natural cleaner, disinfectant, stain remover and deodorizer. After rapidly oxidizing all bacteria it comes in contact with in the 24-hour life cycle, EcoMax™ safely converts back into oxygen and water. The National Institute of Health has recorded that up to 65% of all microbial infections are caused by biofilm. Biofilm creates a shield protecting bacteria, cysts, fungi and parasites against most common disinfectants. The EcoMax™ system offers a powerful, naturally safe alternative that destroys the risk of these infection and disease-causing threats as well as disinfectant-resistant strains.

EcoMax™ technology turns ordinary tap water into stabilized aqueous ozone. It is safe
to use on any surface, while eliminating the need for other cleaners, stain removers and deodorizers. With on-the-spot, continuous flow for spray bottles, mop buckets, carpet extractors and auto scrubbers, EcoMax™ kills germs and bacteria instantly on contact. EcoMax™ utilizes the oxygen that we breathe to create the most efficient, all-purpose cleaner available with 4,500 volts of electricity transforming 02 to 03. This combination creates a highly effective cleaning agent that breaks down dirt, grease, Bio-film and other contaminants in the same way as toxic cleaners, but naturally!

#AV-ECOMAX-RPL EcoMax Replacement Cartridge

APAVIA® HYDROMAX

The Apavia® HydroMax™ filtration system offers complete water filtration for your entire dental office. With multiple configuration options, the system is tailored for your office's specific water treatment needs, whether municipal or well water sources. If your water source has sulfur, irons, impurities, hardness, chlorine or just doesn't taste or smell right, HydroMax™ is the solution.

Determine your custom filter option to remove: Sediment, Chlorine, Chloramine, Pharmaceuticals, Taste & Odor, Sub-micron 0.2 filtration for cysts, heavy metals, Endotoxin, etc. In addition to providing your office with pure, filtered water, the HydroMax™ will help extend the life of office appliances (dishwashers, autoclaves, sanitizers, faucets, etc.), putting money back into your pocket!

Each HydroMax™ replacement filter comes with a unique handle designed top cap for lightweight and easy removal, a bag for proper disposal, and a double o-ring bottom connection into the housing for 1¼" PVC glue socket-plumbing connections. The patented no tool necessary housing allows for easy removal access of the filter for quick replacement, keeping your office running with no downtime.

#AV-1ALK-20CB	HydroMax Blue Series, Chlorine Block (Taste & Odor)
#AV-1ALK-3CBAMINE	HydroMax Blue Series, Chloramine (Chlorine/Ammonia) Block (Taste & Odor)
#AV-1ALK-2005SWMB	HydroMax Yellow Series, String-wound (Sediment)

APAVIA® PURMAX

The Apavia® Drinking Water Systems are designed for simple and easy installation to improve the quality and taste of your office water while being costconscious and eco-friendly with a simple exchanging of the internal filter. The reusable Apavia® Drinking Water System housings minimize waste and maximize savings. Once the internal, long-life cartridge reaches maximum usage, the quarter turn release disconnect shuts off the water supply for easy maintenance and replacement.

The PurMax® systems connect directly to the cold water faucet for full flow filtration; providing your office instant, refreshingly clean water that is better for your equipment, dental lines and drinking needs. So ditch the bottles and jugs, and allow the PurMax® system to treat municipal and well water lines. Our AMB filters, are made of a matrix of activated carbons, crystalline mono and di calcium phosphates and chemically active calcium carbonate, all structurally bound into an interchangeable anti-microbial porous block. In other words, our filters adsorb organic substances, heavy metals and pollutants to make your water as clean and great-tasting as possible!

The PurMax® is ideal for the improvement of the unpleasant taste of chlorine and chloromine, while attacking metals, ammonia and other odors in the water lines of your dental water system. Activated carbon is recognized by the EPA as the best available control technology for many contaminants including: lead,chlorine, chloramine, pharmaceuticals, pesticides, arsenic and many others.

The PurMax® is ideal for the improvement of the unpleasant taste of chlorine and chloromine, while attacking metals, ammonia and other odors in the water lines of your dental water system. Activated carbon is recognized by the EPA as the best available control technology for many contaminants including: lead, chlorine, chloramine, pharmaceuticals, pesticides, arsenic and many others.

#AV-EF538K-AMB	PurMax (Point-of-Use) System

APAVIA® ULTRAMAX

The Apavia® UltraMax™ Filtration system uses a premiere barrier technology to protect your office from bacteria, virus, spores and cysts at the Point-ofentry (POE). The Apavia® UltraMax™ uses a membrane filtration process where water is pushed through a physical filter with a transmembrane pressure supplied by a pump or gravity. Water passes through the membrane pores and disperses effectively retaining suspended solids, viruses and bacteria on the outside of the membrane, preventing them from entering the service lines. The system is simple and safe to install, allowing it to physically prevent water-related diseases caused from microorganisms. It is well-known that treated municipal water systems and water derived from wells include bacteria and other potential health threats.

#AV-UMAX-K	UltraMax Ultrafiltration System

ACCESSORIES

ALERT POUCH BAG

An excellent, durable ziplock delivery bag made of heavy-duty 2 ml plastic. The 5" x 8" (12.7 x 20.3 cm) bag comes with a convenient 1.5 ml pouch system that enables the prescription to stay dry with the casework. Liquid- and air-tight ziplock.

BAGS MEET ALL OSHA STANDARDS FOR DELIVERY.

#9557520	Alert Pouch Bag	1,000/Pkg
#9557510	Alert Pouch Bag	100/Pkg

BIOHAZARDOUS POUCH BAG

This bag offers the solution for transporting biohazardous material while limiting occupational exposure to potentially infectious materials. The liquid- and air-tight zipper ensures the contents remain in the bag. The 5" x 8" (12.7 x 20.3 cm) bag is made of heavy-duty plastic. Biohazard labels are visible to ensure that all handlers are aware of the biohazardous contents.

BAGS MEET ALL OSHA STANDARDS FOR DELIVERY.

#9557540	Biohazardous Pouch Bag	1,000/Pkg
#9075450	Biohazardous Pouch Bag	100/Pkg

OCCLUSAL SURFACE PROTECTION

Keystone makes fluoride trays for the dental industry. These same trays work great as protective packaging for dentures and partials. Order the large lowers and wrap the occlusal surface of your outgoing cases.

#9525130 Occlusal Surface Protection, 50/Pkg

SHIPPING BOXES

PLASTIC MAILER - LARGE

Ship away dental work with no worries with this large plastic mailer. The box is perfect for a small articulator and four full models. Made of chemical-tolerant plastic, this box keeps its form during transportation and protects contents. The top closes securely with a unique locking system. Imprinting available, see page 9.

Size: 7-1/2" x 5-1/2" x 4" (19 x 13.9 x 10.1 cm)
Imprint Size: 5" x 1-1/4" (12.7 x 3.1 cm)
Weight: 5-1/2 oz. (.15 kg)

MAILER LABELS

Make sure your first-class mail looks first class thanks to our mailer labels. These labels work perfect for our plastic mailer boxes carrying important dental appliances. Make sure your mailer is shipped to the right place thanks to these easy-to-read labels. The labels fit our medium and large plastic mailer boxes. Available Size: 5-1/2" x 3-1/2" (13.9 x 8.8 cm).

#9085060	Mailer Label	EACH

ARTICULATOR BOXES

A new, reinforced mailer or delivery box for your expensive articulators and fragile casework. These heavy-duty boxes have a removable handle for carrying and reinforced wall thickness for better protection. Each box also includes a dense foam filler set to help further protect your valuable work. Box is 8" x 8" x 8" (20.3 x 20.3 x 20.3 cm).

#9577810	Articulator Box, each
#9090570	Replacement Foam Filler Set

MODEL STORAGE BOXES

This is an ideal box for long-term storage of patient models. These boxes are made from double-strength corrugated cardboard to provide maximum protection. Each box has four separate compartments and four identification labels for ideal organization. The boxes are shipped flat to optimize storage space and are easy to assemble. The boxes are 7" x 7" x 2" (17.7 x 17.7 x 5 cm) in size.

#9582740	Model Storage Boxes	25/Pkg
#9582750	Model Storage Boxes	100/Pkg

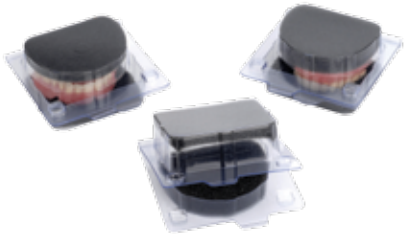
SHIPPING BOXES

Get this inexpensive cardboard container for all your dental laboratory's shipping needs. The sturdy 5-1/4" x 5-1/4" x 5" (13.3 x 13.3 x 12.7 cm) box is ideal for a wide variety of appliances for dental labs and dental practices alike. The boxes are shipped flat and are easily assembled. There are 100 boxes per package.

#9090690	Shipping Boxes	100/Pkg

SHIPPING CONTAINERS

These small, protective containers are an excellent way to protect valuable models, dentures and more. The heavy-duty plastic containers provide clear viewing of the internal contents, are prepackaged with protective foam fillers, have a solid locking mechanism to hold the contents. Packaged 100 containers per case.



#9091180	Small	4" x 3-3/4" x 1-3/4" (10.2 x 9.5 x 4.4 cm)

BOSWORTH BO-BOXES™

Bo-Boxes are sturdy, rigid orthodontic retainer cases for storing and protecting appliances. Bo-Boxes are available in five bright colors and provide a pre-molded identification area for the patient's name and phone number. Ventilation holes allow air to circulate to keep the appliances dry. All cases are medium-sized. Outside dimensions: 3.125" wide x 2.75" tall x 1.375" deep (7.94 x 6.98 x 3.49 cm).

BARRIER PRODUCTS

BARRIER FILM

Our Barrier Film offers a finger-lift edge, which allows for quick and easy placement and removal. This is ideal to use in dental settings where sanitation is the utmost concern. This barrier film is easy to grasp for quick removal and features a light tack adhesive that easily attaches to surfaces without leaving a sticky residue. Film comes in 4" x 6" (10.1x 15.2 cm) sheets.

CE

#10-05010	Clear	1,200/Box
#10-05110	Blue	1,200/Box

CHAIR SLEEVE COVERS

These clear chair sleeve covers will fit any dental chair out there. The sleeve covers reduce the risk of cross-contamination from airborne aerosols and safeguard a longer lasting chair. They're easy to put on or take off to save time. The half chair sleeve is 27-1/2" x 24" (69.8 x 60.9 cm) while the full chair sleeve is 29" x 80" (73.6 x 203.2 cm).

CE

#10-05610	Half Chair Sleeve	Clear	225/Box
#10-05710	Full Chair Sleeve	Clear	125/Box

DIGITAL X-RAY SENSOR SLEEVES

Protect your valuable X-Ray sensors with these durable plastic sleeves at an affordable price. The finger lift edge allows for quick and easy placement and removal. This is perfect to make sure hard-to-reach areas on the sensor remain clean. Also protect the X-Ray sensor from splatter or other hazardous materials. 500/Box.

CE

#10-06010	Clear	1-3/8" x 8-1/4" (3.4 x 20.9 cm)
#10-05910	Clear	1-5/8" x 8-1/2" (4.1 x 21.5 cm)

HANDPIECE SLEEVES

These Handpiece Barrier Sleeves fit over most handpiece dental instruments and reduces the risk of cross-contamination from airborne aerosols. Made of high quality clear plastic, the sleeve is designed to cover low-speed and high-speed handpieces. It's easy to use and discard after use. 500/Box.

CE

#10-06410	High Speed	Clear	1" x 8" (2.5 x 20.3 cm)
#10-06510	Low Speed	Clear	1-1/2" x 8" (3.8 x 20.3 cm)

HEADREST COVERS

Keep your dental chairs clean with our Headrest Covers, which are made of durable waterproof clear plastic. These covers are disposable and a great way to prevent contamination between patients and ensure a longer chair life. The cover is designed to fit over the top of the headrest and is easy to put on or take off the chair. 250/Box.

CE

#10-05410	Clear	9-1/2" x 11" x 2" (24.1 x 27.9 x 5 cm)
#10-05510	Clear	9-1/2" x 14" x 2" (24.1 x 35.5 x 5 cm)

LIGHT HANDLE SLEEVES

These clear plastic sleeves fit over any T-style handles on overhead lights. The plastic covering reduces the risk of cross-contamination from airborne aerosols. The plastic material slides easily over the handle and provides a good fit. The sleeve is 4" x 5-3/4" (10.1 x 14.6 cm).

CE

#10-06210	Light Handle Sleeves	500/Box

SYRINGE SLEEVE COVERS

These disposable sleeves are made to cover 3-way syringes, HVE and saliva ejector valves. The convenient pre-cut opening allows the user to simply slide the syringe tip through the end of the bag. This item reduces the risk of cross-contamination from airborne aerosols. The Syringe Sleeve is 2-1/2" x 10" (6.3 x 25.4 cm).

CE

#10-05210	Blue Syringe Sleeve Covers	500/Box
#10-05310	Clear Syringe Sleeve Covers	500/Box

TRAY SLEEVES

There's no more need for paper tray covers thanks to these disposable tray sleeves that cover the entire ADEC/Size B – Ritter tray. The cover is easy to put on and take off. These sleeves eliminate contamination and make clean up effortless. Overlapping folds keep the instrument trays from falling out. The Tray Sleeve is 10-1/2" x 14" (26.6 x 35.5 cm).

CE

#10-05810	Tray Sleeves, Clear, Size B	500/Box

X-RAY SLEEVES

These universal clear plastic sleeves fit over most X-Ray machines and reduce the risk of cross-contamination from airborne aerosols. The plastic will not adversely affect the X-Ray performance and will keep the valuable X-Ray machine in a good-working condition. This is perfect to make sure hard-to-reach areas on the machine remain clean. The X-Ray Sleeve is 15" x 26" (38.1 x 66 cm).

CE

#10-06310	X-Ray Sleeves	250/Box

BOSWORTH SIMPLASTIC® BARRIER PROTECTIVE SYSTEM

SIMPLASTIC DISPENSER
A clear, acrylic dispensing unit for all Simplastic products. Can be wall-mounted.

Dimensions: 11.5 in x 17 in x 10.5 in (29.2 cm x 43.2 cm x 26.7 cm)

SIMPLASTIC HAZARD BAG
A 10-gallon (37.9 L) waste bag specifically designed for the disposal of infectious and hazardous waste.

SIMPLASTIC PATIENT DRAPE
Full drape which provides total coverage for patients from debris. Controls cross contamination from patients' skin and clothing.
Size: 45 in x 48 in (114.3 cm x 122 cm)

SIMPLASTIC SLEEVE
A barrier sleeve for protecting curing lights, three-way syringes, and evacuation tubes. Easily dispensed from the uni-bag handles. Each handle holds 100 sleeves.

Dimensions: 4 in x 16 in (10.2 cm x 40.6 cm)

SIMPLASTIC TRAY COVER
A multi-purpose cover for protecting trays, instrument carts, keyboards, and film. Easily dispensed from the uni-bag handles. Each handle holds 100 covers.

SIMPLASTIC UNICOVER
An anti-static gusseted barrier for protecting chairs, lights, and x-ray heads. Easily dispensed from rolls or from the Simplastic Dispenser.

Dimensions: 16.5 in x 13.5 in x 31 in (41.9 cm x 34.3 cm x 78.7 cm)

DISPOSABLES

BITE WING TABS

Self-adhesive bite wing tabs. Features an automatic dispenser box. Protect surfaces of the mouth during bite x-rays with bite wing loops. 500 tabs per box.

#30-00422	Bite Wing Tabs	500/Box

COTTON ROLLS

These medium non-sterile cotton rolls are made of high quality 100% cotton. They are soft, pliable with minimal lint. The highly absorbent rolls maintain shape when wet and will not adhere to mucous membranes. 2,000/Box.

#20-00110	#2, 1-1/2" x 3/8" (38.1 x 9.5 mm)

COTTON TIPPED APPLICATORS

These quality applicators are versatile and add ease of applications. They are made of wooden dowels with a tight 100% cotton bud that minimizes lint and prevents shredding. The soft pliable cotton doesn't damage mucosa and the wooden stem is strong.

#20-00210	3" (76.2 mm)	1,000/Box
#20-00310	6" (152.4 mm)	1,000/Box

NON-WOVEN SPONGES

These Non-Woven Sponges are perfect for general use. The 4-ply, non-sterile sponge is soft, smooth, strong and virtually lint free. The standard sponges are 30-gram weight rayon/polyester blend while the plus size sponges are made from 35-gram weight rayon/polyester blend. The lighter weights provide good absorbency with little adhesion to wounds. These sponges are ideal for sustained patient use, disinfecting and general cleaning.

BOSWORTH EVACUATORS

Disposable, high volume non-vented oral evacuators protect soft tissues for maximum patient comfort while suctioning blood, saliva and debris. Fits all standard vacuum lines. Latex-free.

Recommended for use with: TC Retractors

#16651	White	100/Pkg
#16652	Blue	100/Pkg
#16653	Green	100/Pkg

BOSWORTH TC RETRACTORS

The perfect complimentary item to the high-volume oral evacuator is the TC Retractor. The disposable soft tip retractor fits securely onto the evacuator to retract the tongue and/or cheek. The built in "filter" prevents inlays, crowns and bridges from being lost into the evacuation system.

Recommended for use with: Evacuators

#16660	White	50/Pkg
#16661	Blue	50/Pkg
#16662	Green	50/Pkg

SALIVA EJECTORS

Our Saliva Ejectors are soft and pliable to uniquely contour each patient's mouth and hold shape. The tips are soft and bonded to the tube for maximum patient safety. These ejectors provide optimal suction without aspirating tissue and ensure non-clogging operation.

#12-00110	Clear/Blue Tip	100/Pkg
#12-00210	White/White Tip	100/Pkg

BOSWORTH FLEXO®

Flexos are flexible hygienic saliva ejectors that will adapt to any mouth. They maintain their shape and do not collapse when bent. The specially designed soft, smooth tips provide patient comfort and will not pull tissue. Their non-clog design and consistent shape retention will ensure a perfect free flowing fit. Available in clear and four bright, translucent colors: blue, green, red, and yellow. Clear Flexo are available with either a fixed or removable tip.

PROCEDURAL EAR LOOP FACE MASKS

These Ear Loop Masks feature slip-on convenience and provide fluid resistance. The wearer reduces potential exposure to blood and body fluids when wearing these masks. The mask is made of lightweight, 3-ply material that is fluid resistant with a Bacterial Filtration Efficiency (BFE) and Particle Filtration Efficiency (PFE) greater than 98%. The soft, flexible nosepiece and ear loop allows the wearer to slip on and remove the mask quickly and easily. The folds in the mask expand for full coverage from top of the nose to underneath the chin. The malleable nosepiece offers a more custom fit.

CE

#10-18010	Blue	50/Box
#10-18110	Pink	50/Box
#10-18210	Green	50/Box

OPTIMA PROCEDURAL FACE MASK

This lightweight, 3-ply material is fluid resistant with a Bacterial Filtration Efficiency (BFE) and Particle Filtration Efficiency (PFE) greater than 98%. The mask has a soft, flexible nosepiece and is ultrasonically sealed ear loops that offer great comfort and durability.

CE

#10-18310	Blue	50/Box
#10-18410	Green	50/Box
#10-18610	Pink	50/BoX

PROCEDURAL EAR LOOP MASKS WITH VISOR

Our fog-free procedure mask with wraparound splashguard visor gives optimum protection during medical and dental procedures. Both inner and outer layers of the mask are fluid resistant while the cloth part of the mask is made of lightweight, 3-ply material. This mask has a Bacterial Filtration Efficiency (BFE) and Particle Filtration Efficiency (PFE) greater than 98%. The malleable nosepiece offers a more comfortable custom fit. A clear plastic sheet shields the eyes but enables you to still have a full field of vision. Overall, it's comfortable to wear without being restrictive.

CE

#10-19010	Blue	50/Box

SURGICAL MOLDED CONE MASKS

These splash repellent barrier masks have a comfortable elastic headband to easily take on and off. For added comfort, the mask has a flared edge to prevent irritation along with a soft, flexible nosepiece. The mask is fluid resistant and has a Bacterial Filtration Efficiency (BFE) greater than 98%.

CE

#10-17010	Blue	50/Box
#10-17110	Pink	50/Box

SURGICAL TIE-ON MASKS

This Surgical Tie-On Face Mask provides a custom fit around the head along with optimal protection from fluids. The mask is made of lightweight, 3-ply material and has a fluid resistant outer and inner layer. This clean and tidy item is durable and allows for greater comfort and secure fit. It has a Bacterial Filtration Efficiency (BFE) and Particle Filtration Efficiency (PFE) greater than 98%.

CE

#10-18510	Blue	50/Box

HB ANTI-FOG FACE SHIELD

When working on a patient or in the lab, often times infectious, hazardous or undesirable substances will splatter. The HB Anti-Fog Shield is a lightweight, disposable face shield that provides protection of eyes and face from accidental exposure to hazardous substances. Keystone's HB Anti-Fog Shield offers OSHA-level protection against splash of bodily fluids in the face for medical, dental and emergency medical healthcare workers.

#1983000	Full Face Shield	25/Pkg

NEEDLES

NEEDLES

We offer sterile Prehma Disposable Dental Needles that come in short and long sizes. The needle is a sharp tri-bevel point for maximum comfort. The needles have a universal screw-in system that works with an inch-type of metric-type syringes. The plastic hubs are pre-threaded for an easy, straight attachment into the syringe. The needle is siliconized for smooth motion during injection.

PROCEDURE ACCESSORIES

DISPOSABLE AIR/WATER SYRINGE TIPS

These Air/Water Syringe Tips are designed to replace a practice's existing metal autoclavable tips. There is no adapter required. The tips have an inner core water chamber that seats into the syringe, eliminating water contamination and delivers superior air/water spray. No sharp edges which reduces o-ring wear.

#10-04610	Blue	250/Bag

STERILIZATION PRODUCTS

STERILIZATION POUCHES

These Sterilization Pouches are made with a built-in, lead-free internal indicator. The internal indicator ensures that the correct sterilization temperature is reached inside the pouch, ensuring sterile instruments and tools. This eliminates the need for internal indicator strip inside the pouch. The external indicator will change color when the optimal sterilization temperature is reached. Packaged in boxes of 200.

CE

BOSWORTH VIGILANCE®

Vigilance is a proteolytic enzyme detergent specially formulated for removing bioburden and contaminants from instruments, working surfaces, sink traps and clothing. Its pleasing aroma, neutral pH, and reduced foaming action make it the ideal ultrasonic solution, evacuation cleaner, and instrument pre-soak. Vigilance meets hospital standards for a detergent wash, contains a rust inhibitor, and is biodegradable, non-corrosive, and environmentally safe.

Dilution Mixing Ratio: 1 to 2 ounces of Vigilance per gallon of water. I Tips: Shake well before use. Free freight on orders of 144 gallons (545 L) or 1/2 gallons (1.89 L) (mix or match).

SUPERIOR RUBBER – POLISHING WHEELS AND CLASP POLISHERS

Polishing Wheels are 7/8" x 1/8" (22.2 x 3.1 mm)
Clasp Polishers are 15/16" x 1/4"(23.8 x 6.3 mm)
Packaged in boxes of 100.

SUPERIOR REGULAR – An industry standard for years. Pure fine silicon carbide abrasive in a synthetic rubber binder combines an excellent finish on chrome with long wear. Also popular for polishing gold. Dark grey color. 240 grit.	#1900550 #1640010	Wheel Clasp
SUPERIOR HARD – Same quality as SUPERIOR REGULAR only harder. Provides exceptionally long wear on chrome. Dark gray in color. 240 grit.	#1900560 #1640020	Wheel Clasp
SUPERIOR MEDIUM SOFT – Pure medium grit silicon carbide abrasive in a flexible rubber binder for fast scratch-free finishing of chrome. Light grey in color. 150 grit.	#1900540	Wheel
SUPERIOR BLUE REFLEX – Softer and more flexible than the "Blue Gloss". This wheel is made with a new rubber binder containing a highly friable pure fine silicon carbide abrasive. Made for both chrome and noble metals. 220 grit.	#1900795 #1640075	Wheel Clasp
SUPERIOR BLUE – The popular "Blue Gloss" wheel improved with new polishing additives. Contains pure fine treated silicon carbide abrasive in a unique cushioned binder. Provides a lustrous finish on chrome, semi-precious and precious metals. 220 grit.	#1900810 #1640070	Wheel Clasp
SUPERIOR GREEN – An "All Purpose" polishing wheel for all metals. Pure medium fine silicon carbide abrasive in a premium flexible rubber bond provides fast high quality finishing. Quickly becoming an industry favorite. 180 grit.	#1900805 #1640060	Wheel Clasp
SUPERIOR BLACK – Developed for fast chrome finishing, this harder but still flexible premium rubber bond with pure medium coarse silicon carbide, combines excellent finish and wear qualities. Very popular with chrome labs. 150 grit.	#1900800 #1640050	Wheel Clasp
SUPERIOR RED – A specially formulated resilient binder combined with carefully graded pure fine silicon carbide abrasive provides a high quality lustrous finish on precious and non-precious metals. More flexible and not too aggressive, it is a favorite for finishing precious alloys. 240 grit.	#1900815 #1640080	Wheel Clasp
SUPERIOR HARD RED – Same quality as SUPERIOR RED only harder. Provides exceptionally long wear on precious and non-precious alloys. 240 grit.	#1900816 #1640081	Wheel Clasp
SUPERIOR WHITE – Non-contaminating for use on ceramic gold and porcelain. Specially formulated with pure fine aluminum oxide abrasive in a cushioned binder to provide a polished finish to porcelain. 220 grit.	#1900820	Wheel
SUPERIOR GREEN UTILITY – Pure coarse silicon carbide abrasive in a highly flexible binder for fast, effective polishing on gold, porcelain and acrylic. 90 grit.	#1900580	Wheel

KNIFE EDGE RUBBER WHEELS

Knife Edge Rubber Wheels are made of aluminum carbide and come in several different styles for different purposes.

Blue - Fine for polishing non-precious, semi-precious and chrome cobalt. Silicon carbide. 100/Box.	#1900835 #1900885	5/8" (15.8 mm) 7/8" (22.2 mm)
White - Fine and non-contaminating for extra fine polishing extremely flexible. Aluminum oxide. 100/Box.	#1900845 #1900895	5/8" (15.8 mm) 7/8" (22.2 mm)
Green - Medium fine "all purpose" for polishing metal. Silicon carbide. 100/Box.	#1900830 #1900880	5/8" (15.8 mm) 7/8" (22.2 mm)
Red - Fine and extremely flexible. Silicon carbide. 100/Box.	#1900840 #1900990	5/8" (15.8 mm) 7/8" (22.2 mm)
Black - Medium coarse for finishing and polishing chrome cobalt metals. Silicon carbide. 100/Box.	#1900825 #1900875	5/8" (15.8 mm) 7/8" (22.2 mm)

DELUXE SILICONE POINTS & WHEELS

Sold in boxes of 100.
Black for all metals. Medium grit.
White for all metals, amalgam, porcelain & composites. Coarse grit.
Blue for final polishing of porcelain or metals. Fine grit.
Pink for porcelain. X-fine grit.

INTERPROXIMAL RUBBER WHEEL

White - Fine and non-contaminating for extra fine polishing. Aluminum oxide.	#1900870	7/8" x 0.040 (22.2 x 1.01 mm)
Green - Medium fine "all purpose" for polishing metal. Silicon carbide.	#1900855	7/8" x 0.040 (22.2 x 1.01 mm)
Red - Fine and extremely flexible. Silicon carbide.	#1900865	7/8" x 0.040 (22.2 x 1.01 mm)
Black - Medium coarse for finishing and polishing chrome cobalt metals. Silicon carbide.	#1900850	7/8" x 0.040 (22.2 x 1.01 mm)
Blue - Fine for polishing non-precious, semi-precious and chrome cobalt. Silicon carbide.	#1900860	7/8" x 0.040 (22.2 x 1.01 mm)

KNIFE EDGE PUMICE WHEELS

This Knife Edge Pumice Wheel is a flexible impregnated rubber wheel. It is especially suited for porcelain and gold.

#1900590	5/8" dia. (15.8 mm)	100/Box
#1900600	5/8" dia. (15.8 mm)	500/Box

POINT & WHEEL TRUER

This stone facilitates speedy trueing of points and wheels. Perfect for laboratories which need to quickly true abrasives. Quickly and easily reshapes and dresses mounted points. Sold individually.

#1830010	Point & Wheel Truer

GRINDING WHEEL DRESSER

The Grinding Wheel Dresser is made of heavy-duty steel cutters to ensure smooth cutting action on grinding wheels, which are grooved or larded. Makes dressing grinding wheels quick and easy. Replacement cutters are available.

#1900615	Wheel Dresser
#1900617	Wheel Dresser Refill

ROUGHING DISC

This is the 1-1/4" x .085" (31.8 x 2.2mm) Roughing Disc. It's made of a pure, coarse aluminum oxide abrasive in a heavy-duty, non-contaminating body. The disc provides exceptionally fast metal removal when cutting or grinding. The disc runs free and cool cutting on all metal alloys. 50/Box.

#1300425	1-1/4" x .085" (31.8 x 2.2 mm)

RED ENGINE WHEELS

These Green Engine Wheels are made of silicon carbide grit for gold and porcelain work. The wheels come in square edge and knife edge in 7/8" diameter or 5/8" diameters. 12/Pkg.

#1900380	7/8" x 1/8" S.E. (22.2 x 3.1 mm)
#1900430	7/8" K.E. (22.2 mm)
#1900420	5/8" K.E. (15.8 mm)

RED FLASH FINISHING WHEELS

A non-contaminating, aluminum oxide wheel for rapid reduction of all ceramic metals. Reddish brown in color. Sold 100/Box.

#1900290	7/8" x 1/8" (22.2 x 3.1 mm)

RUBBER ACRYLIC & BASEPLATE WHEEL

The Rubber Acrylic and Baseplate Wheel is a coarse grit, rubber bonded wheel. The wheel is excellent for grinding acrylic at normal lathe speed and for baseplates at low speed.

#1900050	3" x 3/8" (76 x 9.5 mm)

RED GRINDING WHEEL

This Red Grinding Wheel is specially manufactured for the fine polishing of all metals. These wheels are sold individually but are long-lasting.

#1300176	3" x 3/8" x 1/4" (76 x 9.5 x 6.35 mm)

GREEN GRINDING WHEEL

These Green Grinding Wheels are specially suited for grinding porcelain teeth. The long-lasting discs will not wear or chip porcelain. The wheels have 1/4" lead reinforced center hole and comes in 120 grit.

#1900040	3" x 3/8" (76 x 9.5 mm)
#1900030	3" x 1/4" (76 x 6.35 mm)
#1900010	2-1/2" x 1/4" (63.5 x 6.35 mm)

WHITE ACRYLIC KNOCK-DOWN WHEELS

These White Acrylic Knock-down Wheels are developed for trimming base plates, acrylic, and stone models. The aluminum oxide grit facilitates rapid shaping with minimum pressure. The wheels generate little heat and will not clog.

#1900090	4" x 1/2" (101 x 12.7 mm)
#1900080	3" x 3/8" (76 x 9.5 mm)

BLACK UTILITY GRINDING WHEEL

The Black Utility Grinding Wheel is excellent for trimming denture base plate materials, stone models and acrylics. The top-grade wheel delivers rapid cutting and will not clog at low speeds. The wheel has a 1/4" lead reinforced center hole. Comes in 46-60 grit.

#1900060	3" x 1/4" (76 x 6.35 mm)

RED FLASH DISC

The Red Flash Disc is the most popular and finest disc available from Keystone Industries. The cut-off wheel quality is strong, fast and free cutting on all chrome, precious and semi-precious alloys. Made of aluminum oxide, the disc can withstand up to 25,000 rpm. 100/Box.

#1300430	15/16" x 0.025" (23.8 x 0.63 mm)

ULTRA-FLEX DISC

The Ultra-flex Disc is the thinnest disc available to the crown and bridge craftsman. This disc is two-thirds as thin as and more flexible than the Ultra-thin Disc, supplementing the Ultra-thin where maximum thinness is required. These are excellent for interproximals and margins. Made of silicon carbide, the gray color discs work best between 10,000 and 12,000 rpm. 25/Box.

#1300475	7/8" x 0.006" (22.2 x 0.15 mm)

VERI-THIN® DISC

These Veri-thin Discs are much thinner than the regular Joe Dandy Discs, but still maintains the strength and fast, cool cutting qualities. These discs, made of silicon carbide, are especially suited for cutting and finishing porcelain and gold. Ideal speeds for the discs are between 10,000 and 12,000 rpm. 50/Box.

#1300450	7/8" x 0.015" (22.2 x 0.38 mm)
#1300440	3/4" x 0.015" (19 x 0.38 mm)

ULTRA-THIN® DISC

Ultra-thin Abrasive Discs have the exceptional combination of thinness, strength and cutting qualities, which have made them an indispensable industry standard. These abrasives are used for fine cutting and finishing on porcelain interproximals and margins. The pure fine silicon carbide abrasive is a unique formulation that will not discolor porcelain. Best used between 10,000 and 12,000 rpm.

#1300470	7/8" x 0.009" (22.2 x 0.23 mm)

DURA-THIN® DISC

These Dura-thin Discs are the ultimate, non-contaminating companion to the Ultra-thin Discs. Made of fine aluminum oxide abrasive is specially formulated for fine cutting and finishing of ceramic metals. Ideal speeds for the discs are between 10,000 and 12,000 rpm. 25/Box.

#1300460	7/8" x 0.010" (22.2 x 0.25 mm)

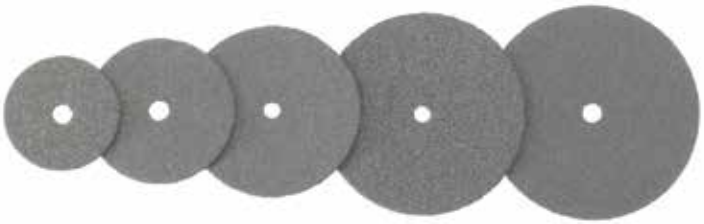
CUT-OFF WHEELS

These strong Cut-off Wheels are long lasting and fast cutting. The wheels can be used on chrome cobalt and other non-precious metals. 100/Box.

#1300650	1-3/8" x 0.027" (35 x 0.7 mm)
#1300660	1" x 0.027" (25 x 0.7 mm)

JOE DANDY TYPE DISCS

The Joe Dandy Type Discs are made of pure rubber-bonded silicon carbide abrasive in a special binder. The discs are 0.023" (0.6 mm) thick. They are used for fast, cool cutting and finishing on porcelain, acrylic, gold, alloys and other materials. 100/Box.



#1300180	1/2" (12.7 mm) Flat Double Cutting	#1300350	3/4" (19 mm) Cup Outside Cutting
#1300230	1/2" (12.7 mm) Flat Safe-Sided	#1300210	7/8" (22.2 mm) Flat Double Cutting
#1300380	1/2" (12.7 mm) Cup Inside Cutting	#1300260	7/8" (22.2 mm) Flat Safe-Sided
#1300190	5/8" (15.8 mm) Flat Double Cutting	#1300310	7/8" (22.2 mm) Cup Double Cutting
#1300240	5/8" (15.8 mm) Flat Safe-Sided	#1300360	7/8" (22.2 mm) Cup Outside Cutting
#1300290	5/8" (15.8 mm) Cup Double Cutting	#1300220	1" (23.8 mm) Flat Double Cutting
#1300200	3/4" (19 mm) Flat Double Cutting	#1300270	1" (23.8 mm) Flat Safe-Sided
#1300250	3/4" (19 mm) Flat Safe-Sided	#1300320	1" (23.8 mm) Cup Double Cutting
#1300300	3/4" (19 mm) Cup Double Cutting		

KEYSTONE CUT-OFF WHEELS

These Cut-off Wheels are strong and durable. Made with pure aluminum oxide provides non-contaminating fast free cutting of all metals. The wheels come in a reddish-brown color and have a max of 25,000 rpm. 100/Box.

#1900320	Thick, 1-1/4" dia. x 0.062" (31.8 x 1.6 mm)
#1900310	Medium, 1-1/2" dia. x 0.040" (38.2 x 1.1 mm)
#1900300	Thin, 1-1/2" dia. x 0.025" (38.2 x 0.63 mm)

BROWN HIGH SPEED DISC

This Brown High Speed Disc is for those who favor the long-time standard for chrome and gold. Made of aluminum oxide. 100/Box.

#1300170	15/16" x 0.025" (0.94 x 0.63 mm)

ROUGHING DISCS

These Roughing Discs are made of a pure, coarse aluminum oxide abrasive in a heavy-duty, non-contaminating bond. The disc provides exceptional fast metal removal when cutting or grinding. The disc runs free and cool cutting on all metal alloys.

#1300680	1-1/4" x 0.086" (32 x 2.2 mm)

PORCELAIN FINISHING DISCS

These Porcelain Finishing Discs are a fine quality abrasive paper discs perfect for finishing gold and porcelain. The discs are made of silicon carbide-like sandpaper. 500/Box.

#1300080	Medium	120 grit	3/4" (19 mm)
#1300140	Coarse	80 grit	7/8" (22.2 mm)
#1300130	Medium	120 grit	7/8" (22.2 mm)
#1300120	Fine	220 grit	7/8" (22.2 mm)

ARBOR BANDS

Keystone Arbor Bands are designed for aggressive trimming and finishing of acrylics, silicone relines and other materials. Arbor band mandrels are made of high quality materials with adjustable diameter rubber heads, designed to firmly hold arbor bands in place.

	QUANTITY	COARSE 60 GRIT	MEDIUM 80 GRIT	FINE 120 GRIT

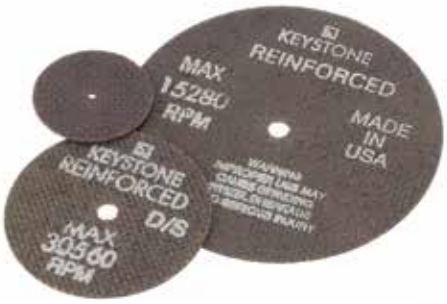
ECONO CUTTERS

These Econo Cutters are a great combination of economical and performance. The .035 thick cutters are thin but still strong enough to get the job done.



#1300480	2-1/2" dia. (63.5 mm)	Max 30,560 RPM
#1300490	1-1/2" dia. (38.1 mm)	Max 40,745 RPM
#1300500	4" dia. (101.6 mm)	Max 15,280 RPM

ECONO CUTTER MANDREL

These Econo Cutter Mandrels are special mandrels required for 2-1/2" (63.5 mm) diameter and 4" (101.6 mm) diameter econo cutters.

#1300510 Econo Cutter Mandrel

CARBO MODEL TRIMMER WHEEL

Keystone Carborundum Model Trimmer Wheels are reversible and available in two sizes. These discs are compatible to Handler, Torit, Buffalo, Foster and Tooth Master units.

For Handler, Torit, Buffalo, Foster and Tooth Master units. Coarse, 1 hole
#1900620 10" x 1/4" x 1" (25.4 x .6 x 2.5 cm)

Coarse, 1 hole
#1900630 12" x 1/4" x 1" (30.5 x .6 x 2.5 cm)

Coarse wheel for Foster unit only, 2 hole
#1900635 12" x 1/4" x 1" (30.4 x .6 x 2.5 cm)

WATERPROOF MODEL TRIMMER DISCS

These superior quality coated abrasive discs will cut models three to four times faster than most discs. These Waterproof Model Trimmer Discs reduce noise by 75% and are available in two sizes. Backing plates and plastic washers are available.

Complete set, backing wheel and washer, 6 discs
#1900640 10" (25.4 cm)

Replacement set, 6 discs

MIZZY RED HEATLESS WHEELS

The Red Heatless Wheels have a ceramic-coated abrasive grain that ensures a smooth, free, cutting wheel at the coolest temperatures. This is due to the unusual micro-chipping action of the crystals as they wear. The wheels are made of non-contaminating pure alpha aluminum oxide hexagonal crystals with a tough ceramic coating. Great for use on all non-precious and semi-precious metals, porcelains, cercons and lava – there's no need to change back to a silicon carbide wheel. The wheels are long lasting and exhibits excellent uniform wear and available in the most popular Mizzy sizes.

#6131600 Size 1, 3/16" x 1" (4.8 x 25.4 mm)
#6131603 Size 3, 3//32" x 1" (4.8 x 25.4 mm)
#6131605 Size 5, 1/8" x 7/8" (3.1 x 22.2 mm)
#6131608 Size 8, 1/8" x 3/4" (3.1 x 19 mm)

MIZZY HEATLESS WHEELS

Heatless Original Wheels (grey) are made of a silicone carbide abrasive to make a unique, non-loading binder for rapid reduction through the final shaping of non-precious, semi-precious, precious alloys, porcelain, acrylic, denture teeth and natural dentition, without generating excessive heat. These wheels come in 15 difference sizes and in regular grit. They also withstand a maximum of 20,000 rpm.

The White Heatless Wheels are non-contaminating, aluminum oxide wheels that can be used on either porcelain or precious and semi-precious metal. They cut fast, run true, wear evenly, and won't ever clog. They also come in 15 different sizes. Sold 50/Box.

DIAMOND D® ACRYLIC

Advanced natural-looking dentures require artistry as well as technical expertise. Diamond D® was specially formulated for exceptional working and handling characteristics for anatomic sculpting. This revolutionary new resin has just the right translucency and color variations found in natural tissue as well as ultra impact and flexural strength. The demand for function and aesthetics in dental fabrication is growing. Diamond D® can help you take your business to a new level.

Diamond D Heat Cure Acrylic is certified as Class IIa in Europe and is approved for permanent prosthetic use with implants.

DIAMOND D® ULTRA WASH

Diamond D Ultra Wash eliminates skinning of separator from model surface. It also enhances bond of acrylic to teeth and promotes cleaner deflasking and denture break out. This wash allows for total wax elimination from denture mold. Dental specific product used in place of detergent.

#1013120 Diamond D® Ultra Wash 1 Gallon (3.79 L)

SLEDGEHAMMER ACRYLIC

Sledgehammer Heat Cure is a high impact, cross-linked, color stable denture base with excellent working properties. It's compatible with most injection systems. Available in 4 aesthetics, cadmium free shades with matching repair, pour and microwavable materials. Can be used with Sledgehammer 20 Minute Monomer for shortened cure time.

Sledgehammer Self Cure is easy to mix, cross-linked, non-slumping formula that matches all Sledgehammer shades as well as other leading brands. Great bond strength makes it perfect for relines and repairs using the salt and pepper or dough technique. A high quality, cadmium free acrylic offered at a significant savings.

BOSWORTH NEOCRYL™

Neocryl is designed to create brightly colored appliances that encourage patient compliance. If colored liquid is used, the appliance will be translucent. If colored powder is used, the appliance will be opaque. Neocryl powders are formulated extra fine for quick absorption, creating a stronger, more durable appliance, and eliminating slumping or running of the material during fabrication. Longer working time gives the technician greater design and detail time. All Neocryl products are non-yellowing.

Recommended for use with: OrthoGlo™ I Bulk packaging available. Tips: Neocryl liquids and powders can be blended to achieve endless possibilities.

BOSWORTH NEOCRYL™ SPLINT

Extra strong, high density acrylic resin designed to make orthodontic splints that help patients who have TMJ or a tendency to grind at night. It will not chip, break, or wear easily and is crystal clear in the patient's mouth. Better liquid absorption prevents running and slumping, resulting in a stronger, more durable appliance that will not yellow.

Bulk packaging available.

BOSWORTH TRIM® AND TRIM®II

Trim and Trim II are fast-setting, non-irritating PEMA temporary resin acrylic crown and bridge materials formulated for extended use. The powder and liquid in each kit are identical in formula and the powders can be mixed to obtain specialty colors. The resin is dimensionally stable, will not distort when withdrawn from undercuts while setting and is suitable for use as a bite registration material. Trim is available in two shades (light and dark). Trim II is available in six shades for greater diversity in achieving the perfect shade match for patients.

Recommended for use with: Glaze™, Gorilla Seal™, Masque™ and Pressure Pot I Bulk packaging available.

Mixing Ratio: 6.3 g of powder to 3 ml of liquid. This amount would make 9 full jacket crowns. I Working time: 3-4 minutes.

Tips: Order Trim VW (Very White) powder in addition to the standard kit to produce a temporary as white as bleached teeth.

Note: Trim and Trim II cannot be mixed with Trim Plus materials.

BOSWORTH ULTRA TRIM™

WATCH THE
TECHNIQUE VIDEO!

Ultra Trim is an auto-mixed, cartridge dispensed bis-acryl temporary crown and bridge material that will greatly reduce in-office procedure time. Ultra Trim's 10:1 base to catalyst mixing ratio provides excellent strength and greater flexibility without brittleness. (The higher the base content, the stronger the restoration). Ultra Trim will bond to itself if additional material or repair is necessary. Ultra Trim's non-irritating formula is free of any harsh monomers or offensive odors. It can be used in virtually any matrix with minimal shrinkage for excellent fit and marginal adaption. Ultra Trim sets in the mouth in approximately 2 minutes and completely cures in 5 minutes. Ultra Trim is color-stable with perfect translucency.

Recommended for use with: E-Z Squeeze™ Universal Dispenser, Glaze™, Gorilla Seal™, Masque™ and Pressure Pot

Note: Cartridge should be bled before every use to ensure base and catalyst go into the dispensing tip evenly. A 4:1 tip and dispenser must be used with the 31 g cartridges.

BOSWORTH FASTRAY™ LC

Fastray LC is a light-cured custom tray material supplied in pre-formed sheets. When used with a separator, Fastray LC will not distort or stick to fingers and models. Procedure time is reduced and odor is eliminated due to no powder and liquid mixing. Fastray LC provides a firm, stable custom tray that is ready to use immediately after trimming and polishing.

Recommended for use with: Masque™ I Tips: Fastray LC is a light sensitive material.
Keep box closed. Material may set after 15 minutes of light exposure.

VERSACRYL THERMO-SOFT ADJUSTABLE RELINE

This unique product has been developed to create thermo-adjustable relines. Imagine having the luxury to simply heat a denture and re-adjust the fit in seconds and if it's not satisfactory the procedure can be repeated anytime by the dentist, the technician or even the patient themselves.

The Versacryl Reline is not a regular "soft reline" material. It is a heat sensitive liner that softens in warm water between 120˚F - 205˚F. At body temperature the Versacryl has an extremely comfortable cushiony effect that yields to pressure and actually creates better suction than conventional soft liners.

Versacryl is a cross-linked acrylic denture material guaranteed to create a chemical bond with all other denture acrylics. Versacryl is available in Heat Cure or Self Cure and no special equipment is needed to process.

BOSWORTH DENTUSIL™ SILICONE SOFT RELINE MATERIAL

DentuSil™ is a chairside soft silicone relining material which combines the ease of cartridge dispensing with the flexibility and resilience of a silicone soft reline material to provide denture patients with a comfortable, reliable reline in just one office visit. DentuSil™'s silicone base absorbs less water, making the reline more resistant to stains and odors. Its translucent pink color provides a natural, healthy appearance. Adhesive is specially formulated to hold material in place, providing a secure reline in just minutes. Contains 10 applications. DentuSil lasts in the mouth for approximately one year and has a shelf life of two years. Easily cleaned with a soft brush.

Tips: DentuSil contains no monomer and is perfect for use on patients with sensitivity to acrylics. DentuSil can be used to cushion dentures as overdentures heal. Use DentuSil in the dental laboratory by placing the denture on the patient's model in the dental flask. Do not use with condensation reaction type silicone materials or adhesive.

Recommended for use with:
E-Z Squeeze™ Universal Dispenser and Static Mixing Tips for 5 inch cartridges.

BOSWORTH LIGHT LINER®

Light Liner is a chairside reline material that light cures in minutes. Available in a soft or hard non-methyl methacrylate formula, this microfilled composite flows easily and offers the convenience of a one visit procedure without multiple pour-ups or impressions. Accurate relines and quality repairs are achieved in minutes at a fraction of the cost of sending it to the lab. Light Liner is a dual-cure, self-bonding material that will not shrink, resists staining, and is color stable. Light Liner is virtually as strong as the denture, chemically bonding to it to prevent flaking or peeling. FOR DENTURE RELINING ONLY.

Recommended for use with: Cora-Caine® and Masque™ I Bulk packaging available.

BOSWORTH NEW TRULINER®

New Truliner is a pema denture corrective relining material. New Truliner's advanced formula reduces stinging and burning sensation which allows for a restoration on a denture's original fit in as little as 5 minutes. Color stability and a high density surface guarantee greater patient satisfaction. New Truliner chemically fuses to the denture in 15-20 minutes and is formulated to last up to a year. Once cured, rebased surfaces can be trimmed and polished like the original denture without showing a line of demarcation.

Mixing Ratio: 7.6 ml liquid (1 full glass vial) to 15 ml powder (1 full plastic vial).
Tips: Before making a permanent denture reline, treat the tissue with a tissue conditioner such as Softone to eliminate the possibility of the final corrective reline duplicating the disturbed or deformed mucosa caused by the deficient denture.

Note: New Truliner liquid and powder is NOT interchangeable with Original Truliner liquid and powder. New Truliner is a PEMA formula and Original Truliner is a PMMA formula.

Recommended for use with: Cora-Caine®, Glaze™, Gorilla Seal™, Masque™, and Pressure Pot

BOSWORTH ORIGINAL TRULINER®

Original Truliner is a PMMA color stable, permanent reline material formulated for extended life (3-5 years). The extremely fine-milled powder cures to a dense consistency and prevents the reline from assuming odors, tastes, or stains. Original Truliner is a unique reverse curing acrylic (cures from the inside out) which releases the free monomer before it is inserted in the mouth, eliminating chemical and thermal sensitivity and forming a permanent bond in as little as ten minutes that will not chip or discolor. Can also be used for repairs and orthodontic appliances.

Mixing Ratio: 7.6 ml liquid (1 full glass vial) to 15 ml powder (1 full plastic vial).
Tips: Before making a permanent denture reline, treat the tissue with a tissue conditioner such as Bosworth Softone to eliminate the possibility of the final corrective reline duplicating the disturbed or deformed mucosa caused by the deficient denture.

Note: New Truliner liquid and powder is NOT interchangeable with Original Truliner liquid and powder. New Truliner is a PEMA formula and Original Truliner is a PMMA formula.

Recommended for use with: Cora-Caine®, Glaze™, Gorilla Seal™, Masque™, and Pressure Pot

BOSWORTH TRUSOFT™

Trusoft is a plasticized acrylic PEMA that is specifically designed as an intermediate liner for patients requiring a prolonged adjustment period prior to using a hard liner or denture base material (Softone is for shorter adjustment periods). Its elasticity will ensure against pressure pain, tender ridges, sensitive areas, and irritated tuberosities. Trusoft is formulated to remain resilient for up to 30 days. Can be used for every patient as a precautionary measure but is especially necessary for patients who are slow to heal or sensitive to wearing a new denture. Patient is ready for a permanent reline (New or Original Truliner) when he or she can exhibit control and acceptance with Trusoft.

Mixing Ratio: 6.8 ml (glass vial) to 9 g (plastic vial) powder. I Tips: Trusoft can be used in between tissue treatments with Softone.

Recommended for use with: CoraCaine® and Masque™

BOSWORTH GLAZE™

Glaze is a fast-setting, self-cure resin which reduces polishing time and dries to a clear, hard surface with a high gloss finish. Glaze can be brushed onto a clean composite or acrylic material to achieve a polished surface that enhances the appliance and reduces the need for additional polishing. Recommended for use on provisional, reline, and orthodontic appliances. Glaze fills microscopic voids and reduces bacterial growth. Sets in 20 seconds.

CE

Standard Kit: 12cc Glaze, 12cc Glaze Solvent

#0921236 Standard Kit

BOSWORTH SOFTONE™

Softone is a resilient acrylic denture tissue conditioner and functional impression material that conditions, massages, and rehabilitates damaged tissue. Softone's unique flow and natural give stimulate the natural healing process and restores tissue to a sound physiological state. Softone has a clean, refreshing taste that will not absorb odors for greater patient comfort and compliance. Softone allows the denture to stay in the mouth throughout the treatment process. For patients requiring a temporary soft reline or prolonged adjustment period before the permanent hard reline, use Bosworth Trusoft.

Mixing Ratio = 6.8 ml (1 glass vial) to 9.0 g (1 plastic vial) of powder.
Tips: Upper and lower arches can be treated at the same appointment as long as the dentist treats each denture separately. Softone will trim easier if using a heated knife to seal material and reduce peeling. Softone reline may be cleaned by rinsing with a mild, alcohol-free cleaner or by brushing with a soft toothbrush and a mild non-abrasive toothpaste. Polishing may be expedited by first chilling denture in refrigerator or ice water. Softone is a temporary impression material formulated to last up to 4 days in the mouth.

Recommended for use with: TAC™

PROCURE SOFT RELINE

This a great chairside, dual care, bonded and microfilled soft reline composite. The ProCure soft reline mixes into an easy-to-apply impression taking consistency that can be applied to a prepared denture. The denture is then fitted into the mouth for a one step, one appointment fitting. The end result gives a long-lasting (two years or better) soft reline that your patients will love. ProCure packages the Soft Reline in 8 individual units in the Professional Kit or one Bulk Economy Kit (average 25-30 relines).

#9143210 Pro Kit
#9143240 Bulk Kit

PROCURE HARD RELINE

This is an excellent chair side, dual cure, hard reline composite that can be added directly to a prepared denture. Mix material to impression-like consistency, apply to denture, and fit at chair side. No heat processing, no methyl methacrylate, and no heat discomfort to oral tissue. The result gives a permanent reline with no thermally induced expansion or shrinkage. The composite has been formulated to absorb very little water, be impervious to bacterial build-up, and is color stable. ProCure packages the Hard Reline in 8 individual units in the Professional Kit or one Bulk Economy Kit (average 25-30 relines).

#9143100	Pro Kit
#9634740	Bulk Kit

PROCURE CUSTOM TRAY WAFERS

The ProCure Tray Material comes in a soft, pliable and ready-to-use wafer. The trays can be quickly formed onto model to make a fast accurate and stable custom impression tray. A handle can be attached and the tray shaped while in softened state and then cured and hardened. Ready in just minutes.

#9634930	Custom Tray Wafers	50 wafers

NEW! HATHO THERMOPOL SET

Less work for better results is what the new Hatho ThermoPol Set is built upon. It's revolutionary design and working technique will brighten not just acrylics in faster-than-ever times, but also thermoplastics such as Valplast® and TCS®. That being said, this all-in-one kit is the only of its kind on the market, and will take your denture polishing work to a whole new level.

Our Hatho ThermoPol Set comes with the following: Multi Layer Brush, Polistar Lintygrey Compound (90g), COSIMA Soft Buff, MIRA Polishing Buff, Polistar Cream (90g), Polistar Pro Pink (150g) and AlphaCard Pocket Card

#1670540	Hatho Thermopol Set

#1670523	Mira Polishing Buff

HATHO THERMOPLASTIC POLISHING KIT

Polishing set designed for an efficient high shine on all flexible partial materials.

Includes: 2 Hatho Flex Polishers, 1 Mira Buff, 1 Yellow Mira Buff, 1 Polistar Compound and 1 Polistar White Compound

#1670160	Thermoplastic Polishing Kit

DAPPEN DISHES

We offer both glass and disposable Dappen Dishes that work great in various dental applications. The glass Dappen Dish is made of solid heat-resistant glass. The thick and heavy base makes the dish stable and protects from spills. The dish is ideal for mixing acrylics, amalgam, resins, sealants and other materials.

GLASS DAPPEN DISHES

#06-00510	Blue, 12/Pkg
#06-00610	Clear, 12/Pkg
#06-00710	Green, 12/Pkg

DISPOSABLE DAPPEN DISHES

#10-14010	White, 1,000/Pkg
#10-14310	Yellow, 1,000/Pkg
#10-14510	Blue, 1,000/Pkg
#10-14410	Assorted, 1,000/Pkg

RELINE BOND

Reline Bond forms a positive and lasting fusion between old denture material and the added new material. It eliminates unsightly white or bleaching lines which often appear on relines. Available in a 4 oz. can.

#1011355 Reline Bond

ARTICULATORS

APEX #2 CHROME ARTICULATOR

The Apex #2 Chrome Articulator has a higher arch than the K-Chrome Articulator, but still provides maximum accuracy. Allows for easy and accurate work on dental work.

#1050000 Apex #2 Chrome Articulator

APEX #2 BRONZE ARTICULATOR

The Apex #2 Bronze Articulator has a higher arch than the K-Chrome Articulator, but still provides maximum accuracy. Allows for easy and accurate work on dental work.

#1050005 Apex #2 Bronze Articulator

CROWN & BRIDGE K-CHROME ARTICULATOR

The Keystone Crown & Bridge K-Chrome Articulator is specifically engineered for crown and bridgework. It's easy to adjust and easy to separate parts. These articulators are machined for quality and accuracy.

#1050140 C&B K-Chrome Articulator

DELUXE MAGNETIC ARTICULATOR

The Deluxe Magnetic Articular comes with magnetic split casting to ensure easy removal and exact settings of models. This articulator is excellent for checking cases. It's completely interchangeable, lightweight and Teflon coated.

#1050075	Deluxe Magnetic Articulator
#1050076	Magnets, 4/Pkg
#1050077	Curved Disc, each

DELUXE MAGNETIC ARTICULATOR WITH PIN

The Deluxe Magnetic Articulator with Pin is an excellent articulator for denture work. This item has the same advantages as the Deluxe Magnetic Articulator, but it has incisal pins for the use with denture production.

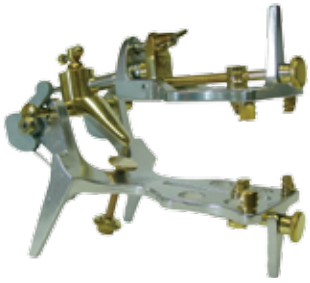
#1050074	Deluxe Magnetic Articulator
#1050076	Magnets, 4/Pkg
#1050077	Curved Disc, each

GALETTI ARTICULATOR

The Galetti Articulator is solidly constructed of metal alloy casting. The high quality articular provides easy, speedy and firm grasps of models of any size. This item has perfect occlusal-articulator balance to prevent cuspidal interferences and maintains a balanced prosthetic appliance.

The Galetti Articulator allows for easy separation of upper and lower components to form two different stable working bases. The ball bearing joint allows for free motion of the upper appliance to check the occlusal-articulator balance. The hinge axis with bilateral motion gives the capability for anterior, posterior and lateral movements to show working and balancing movements.

No plaster work or accessories are required with Galetti Articulators and they are easy to clean.



#1050200	Galetti Articulator

HIGH ARCH ARTICULATOR

The High Arch Plastic Articulator is for mounting models in the dental lab. It's made of high impact plastic with a metal rear-locking adjustment screw for a longer life and reusability. The item features lateral movement and adjustable incisal stop. The plastic articulator is lightweight, which mean a lower cost for shipping.

#1050146	High Arch Articulator

K-CHROME DENTURE ARTICULATOR

The K-Chrome Articulator was machined to produce maximum accuracy for this type of articulator. It makes for easy access to all surfaces, easy to adjust, and can be taken apart and assembled quickly.

#1050145	K-Chrome Denture Articulator

K-BRASS DENTURE ARTICULATOR

The K-Brass Denture Articulator has the same features as the K-Chrome Denture Articulator but is made of softer and longer-lasting brass. The simple articulator is machined to produce maximum accuracy. The articulator gives easy access to all surfaces, easy to adjust and can be taken apart and assembled quickly.

#1050147	K-Brass Denture Articulator

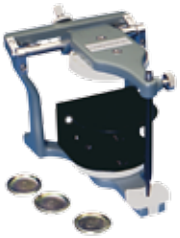
KEYSTONE DELUXE ARTICULATOR

The Keystone Deluxe Articulator is excellent for sending important cases between labs and the doctors. The articulator is lightweight, Teflon-coated and made with very accurate, interchangeable mouths. The item has a full range of movements, including lateral excursions. This is a high-quality articulator is set at a low, economical price.

#1050095	Deluxe Articulator

LAB-O-MATE ARTICULATOR

The Keystone Lab-O-Mate Articulator is easy to use in dental labs. The incisal guide pin allows for adjustment of the vertical dimension during teeth alignment and adjustments. Made of high-quality materials and is long-lasting.



#1050012	Lab-O-Mate Articulator

LUXURY ARTICULATOR

Our Luxury Articulators still offer the finest quality while remaining at an affordable price. This Luxury Articulator is a four-piece magnetic mounting disc set with two plastic steel mounting magnet plates. There is a curved plate, a flat plate and long incisal and central pins. The mount is backed with black Teflon coating. The articulator is easy to clean.

#1050085	Luxury Articulator	#1050004	Flat Plate
#1050001	Mounting Disc Set, 4 pieces	#1050006	Long Incisal Pin
#1050002	Plastic Mounting Magnet Plates, 2/Pkg	#1050007	Central Pin
#1050003	Curved Plate	#1050008	White plate

MAGNET X

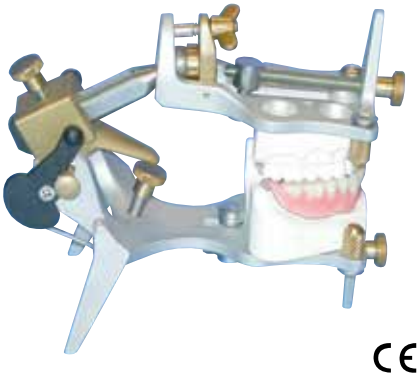
The Magnet X is a quick mount model system that assures articulation accuracy every time. This articulated features a one-stage base pour for fast model attachment. It can be used with any pin system and is compatible with most articulators. Most of the parts are reusable. It's easy to pour the models, apply isolator for plaster and then mount on the articulator in the correct position every time.

#1050065	Complete Kit	#1050068	Washers, 50 pieces
#1050060	Base with Magnet	#1050120	Magnets, 6 pieces
#1050067	Black Plugs, 100 pieces	#1150105	Spatula, each

PLASTERLESS ARTICULATOR

The Keystone Plasterless Articulator is simple to operate while still maintaining a high quality without plaster. Simply mount the model using the clasping set bolts, which allow for easy attachment and detachment from the articulator.

The articulator firmly grasps models of any size so the occlusion can be checked and rechecked. The Keystone Plasterless Articulator is made of highly polished aluminum so it can be easily cleaned and will not rust.



#1050150 Plasterless Articulator

PLASTIC C&B DISPOSABLE ARTICULATOR

The Precision Articulator is great for transferring mounted cases between the same articulator without the loss of accuracy. The incisal tables can unscrew and be easily replaced. The articulator has smooth lateral and protrusive movements. There's an anterior leg for easy viewing.

#1050165 Plastic C&B Disposable Articulator

PRECISION ARTICULATOR

The Precision Articulator is great for transferring mounted cases between the same articulator without the loss of accuracy. The incisal tables can unscrew and be easily replaced. The articulator has smooth lateral and protrusive movements. There's an anterior leg for easy viewing.

#1050100 Precision Articulator

SPRING CHROME ARTICULATOR

A spring-loaded articulator for crown and bridgework. Reversible top permits two heights. Also allows for protrusive and retrusive lateral movements.

#1050080 Spring Chrome Articulator

#1180140	3" x 35 ply	#1180190	5" x 45 ply
#1180150	4" x 24 ply	#1180200	6" x 30 ply

BURNERS & TORCHES

30B BLOWPIPE

For gas and compressed air uses in a lab, this 30B Blowpipe is the most modern and attractive in its field. It operates on any fuel gas (except acetylene) including natural, mixed, propane, butane and more with compressed air. All these fuel gases are handled with equal ease thanks to this Blowpipe.

#1820175	30B Blowpipe

BUNSEN BURNER

This Bunsen Burner is available for natural gas only. It has a chrome plated brass with adjustable air inlets. Gas inlet suitable for 8mm (5/16") ID tubing. Dimensions: 10 cm (4") height, 7.5 cm (3") base diameter.

#1190010	Model #111 Bunsen Burner
#1012920	Latex Tubing 1/4" I.D. x 3/32", 1 ft.
#1012921	Latex Tubing 1/4" I.D. x 3/32", 50 ft. roll

DELUXE BUNSEN BURNER

This Deluxe Bunsen Burner is made for natural gas only. The adjustable flame control provides ease of use. Also the base permits 30-degree angle or diagonal position of the flame. Works great in labs that need flexibility and adjustments.

#1190012	Deluxe Bunsen Burner

PLASTIC ALCOHOL TORCH

This Plastic Alcohol Torch is used for easy, quick applications in the lab. This plastic torch uses denatured alcohol only. Wick is long-lasting and keeps a steady flame.

#1820015	Alcohol Torch
#1820018	Wicks, 12/Pkg

MICROTORCH

This Microtorch is a 2-in-1 open flame torch and flameless heat tool with a heat shrink attachment. The torch is excellent use to heat materials, ignite materials, pinpoint torch, shrink tubing, solder and desolder, terminate specialty connectors and more!

#1820005	Microtorch

NATIONAL BLOWPIPE

National Blowpipes are economical and easy to operate. There is no other torch as well-known as these pipes. National Blowpipes operate on any fuel gas because of the patented proportional gas mixer. There's no need to change mixers, instead just select the proper tip. There is a rotating leak-proof union to ensure safety and compliance.

#1820020	Model 3A-B-3 Blowpipe w/ wrench, N1 and N2 tips
#1820021	Model 3A Blowpipe w/ wrench only (no tips)

STANDARD SLOTTED TYPE CRUCIBLE #30

These high quality Standard Slotted Type Crucibles offer optimum performance. This crucible fits standard type Kerr and Emesco casting machines. Sold individually.

#5920200	Standard Slotted Type Crucible #30

STANDARD HOODED TYPE CRUCIBLE #31

This high quality Standard Hooded Type Crucible offers optimum performance in induction furnaces. This crucible fits standard type Kerr, Lucas and Emesco casting machines. Sold individually.

#5920235	Standard Hooded Type Crucible #31

STANDARD SLOTTED TYPE CRUCIBLE #32

These high quality Standard Slotted Type Crucibles offer optimum performance in furnaces. This crucible fits standard type Kerr and Emesco casting machines. The Standard Slotted Type Crucible comes with a hole. Sold individually.

#5920201	Standard Slotted Type Crucible #32

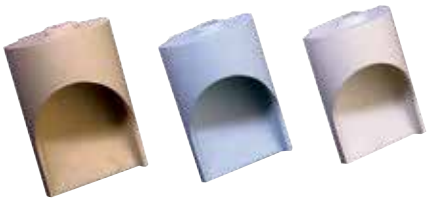
INDUCTION CRUCIBLE II #35

This high quality Induction Crucible II offers optimum performance in induction furnaces. This crucible fits standard type Howmedica and electronic casting machines.

#5920210	Induction Crucible II #35

TRI-DYNAMICS HOODED TYPE CRUCIBLE #35

This Tri-Dynamics Hooded type Crucible fits centrifugal casting machines, including Kerr and Emesco. It's designed with a flat inner table to allow for less turbulence. This crucible is coded for easy identification of metals. Sold individually.



#5920220	Hooded Type Crucible #35	Gold
#5920221	Hooded Type Crucible #35	Blue
#5920222	Hooded Type Crucible #35	White

CENTRIFUGAL TYPE CRUCIBLE #46

This Centrifugal Type Crucible fits standard Dentsply type casting machines. Sold individually.

#5920250	Centrifugal Type Crucible #46

TWO STAGE SLOTTED CRUCIBLE #47

This Two Stage Slotted Crucible fits standard type Kerr and Emesco casting machines. Sold individually.

#5920230	Two Stage Slotted Crucible #47

INDUCTION CRUCIBLE #49

These Induction Crucibles offer optimum performance in induction furnaces. This crucible fits standard type Tycomatic and Unitek casting machines. Sold individually.

#5920240	Induction Crucible #49

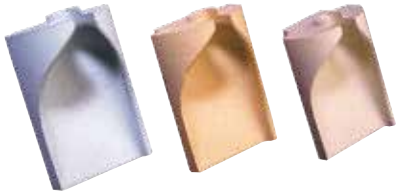
INDUCTION HOODED CRUCIBLE #49A

These Induction Crucible Hooded offer optimum performance in induction furnaces. This crucible fits standard type Tycomatic casting machines. Sold individually.

#5920245	Induction Hooded Crucible #49A

TRI-DYNAMICS SLOTTED TYPE CRUCIBLE #59

This Tri-Dynamics Slotted Crucible fits centrifugal casting machines, including Kerr and Emesco. It's designed with a flat inner table to allow for less turbulence. This crucible is coded for easy identification of metals.



#5920260	Slotted Type Crucible #59	Gold
#5920261	Slotted Type Crucible #59	Blue
#5920262	Slotted Type Crucible #59	White

HIGH HEAT SILICA CRUCIBLE

This High Heat Silica Crucible is manufactured specially for Keystone Industries. The high-quality silica is able to withstand high temperatures while remaining non-contaminating.

#1280010	Type A, 2/Pkg
#1280020	Type A Slotted, 2/Pkg

WESGO CRUCIBLE

Wesgo Crucibles are able to withstand high temperatures and are non-contaminating. High quality to ensure optimum performance. Sold individually.

#1280060	Small A	#1280070	Slotted A
#1280050	Type A	#1280080	Type D

DEBUBBLIZERS

KLEAN CAST DEBUBBLIZER

The Klean Cast Debubblizer can be used on wax patterns, impressions and models. The non-contaminating, alcohol-free solution eliminates surface oils from the wax to ensure a smooth finish. Does not contain any solvents, therefore, it does not distort or effect the wax in any way.

#1014101	32 oz. (.95 L)
#1014100	8 oz. (.23 L)

MIZZY BLUE DEBUBBLIZER

Blue Debubblizer produces smooth, accurate, bubble-free castings. The solution is formulated to gently reduce the surface tension of impressions prior to the pouring of models and wax patterns. This allows for a better flow and adaptation of the dental material being poured, virtually eliminating the formation of bubbles and voids on the surface of models and castings.

#6121800	32 oz. (.95 L)
#6121900	1 gallon (3.79L)

SURE-FLO

Sure-Flo is a liquid debubblizer that's great for eliminating bubbles in models. Easy, ready-to-use and helps save time and money.

#9046760	Sure-Flo, 16 oz. (.48 L)

DENTURE ACCESSORIES

PROCURE BASE PLATE MATERIAL

ProCure Base Material is a premixed composite wafer, ready for immediate adaption. They are easy to form, stable, and accurate. Ideal for making base plate for a variety of try-in situations. Roughened surface has excellent adherence to all waxes. The Procure base plates are packaged in a tub with 50 pre-made composite wafers per package.

#9634940	Base Plate Material	Pink
#9634950	Base Plate Material	Natural

DIAMOND D® ULTRA SEP

The Diamond D Ultra Sep is a state-of-the-art tin foil substitute that penetrates and adheres to stone and plaster. Then, the stone and plaster breaks away easily from the acrylic after processing. The Diamond D Ultra Sep will produce unsurpassed results and save time in denture finishing.

#1010170	1 Gallon (3.79L)
#1010175	1 Quart (0.95L)

DIAMOND D® WAX GLOSS

Our Diamond D Wax Gloss leaves a beautiful glossy finish on all waxes, denture wax try-ins, and bite blocks. This will certainly add to the final presentation quality to wax setups. Available in 1 quart bottles.

#1010180	1 Quart (0.95 L)

KEFOIL

Kefoil is a specially formulated multi-purpose liquid separator and is an excellent tin foil substitute. An alcohol-free substance.

#1360020	Clear	1 gallon (3.79L)
#1360025	Pink	1 gallon (3.79L)

DIAMOND D® SEP BRUSH

There are two types of Diamond D Sep Brushes. The Diamond D Sep Brush is used to apply tin foil substitute to stone and plaster surfaces. The Diamond D Sep Brush II is used to remove excess tin foil substitute from denture teeth.

#1170405	Diamond D Sep Brush
#1170400	Diamond D Sep Brush II

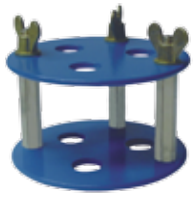
PALATINAL BRUSH

The Palatinal Brush has a unique design that is ideal for polishing hard to reach palate area. The new designed brush if fitted on a tapered spindle and a plastic center with automatic centration. The brush is used with pumice for high shine.

#1670152	Palatinal Brush

3 POST RELINE JIG

This is a great little addition to our laboratory equipment. The 3 Post Reline Jig is perfect for repairs, relines and other dental applications. With three points there's better accuracy and more stability when using the jig. The item has a sturdy build and an easy removable top plate. Sold individually.



#1190014 3 Post Reline Jig

RELINE JIG

This Reline Jig is a chrome two-post jig used for accurate reline applications. It's made of chrome plate zinc alloy and the posts features tapered tops to aid in upper plate alignment.

#1502400 Reline Jig

RELIEF METAL

Our Relief Metal is soft and 25 gauge. The soft metal sheets are 1 lb. and 4" wide.

#1370010 .001 Thickness, Thin - 53 ft. (16.2 m)
#1370020 .002 Thickness, Thick - 26 ft. (7.9 m)

PLASTIC SHEETS

Made of Veri-Thin material, .001 thickness.
Available in 5" x 5" or 4" x 4" sheets.

#1610010 4" x 4" (10.1 x 10.1 cm)
#1610020 5" x 5" (12.7 x 12.7 cm)

DUPLICATING FLASKS

These Duplicating Flasks are used in producing full or partial dentures. High quality and long lasting.

#1350090 Raised Bottom
#1350080 Flat Bottom

DENTURE FLASK

These Denture Flasks are forged in bronze to ensure a long and durable life. The flask halves fit tight together with stainless steel guide pins.

Flask Sizing:
Upper Dentures Flask: bottom section 5/8"
Deep Lower Dentures Flask: bottom section 5/8"
Deep at front, 1-1/8" at back

#1350100 Upper Denture Flask
#1350120 Lower Denture Flask
#1350045 Knockout Disc Only

NEW! TECNOFLASK

Keystone Industries could not be more excited for a product that helps develop excellent Diamond D® and other acrylics in much quicker time, and easier fashion.

The TF-100 muffle will give your laboratory a cleaner environment and make the process more enjoyable for the production of your work. Included with the kit and available separately is the PL-100 protection plate, which extends the muffle's service life with extra needed protection.

Features of Tecnoflask include:
- Acrylic material designed for use in microwave
- Cannot be damaged by exertion of pressure
- Polymerization time shortened to four minutes
- Used in the making of total upper and lower dental prostheses
- No isolating material needed between the muffle and the plaster
- Does not require a specific resin

#1009198	Tecnoflask Kit
#1009200	Tecnoflask Muffle TF-100
#1009199	Tecnoflask Pressboard PL-100

FLASK COMPRESS

This Flask Compress is used in curing a single flask. It is built of bronze alloy with stainless steel compensatory springs. The high-quality materials and build make it a long-lasting tool.

#1350095	Flask Compress

TRAY HANDLES

These aluminum Tray Handles come in 100/Pkg.

#1410010	Tray Handles

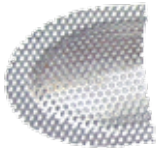
GRID STRENGTHENERS

These Grid Strengtheners have round perforations (2.5mm) to assure excellent resin bond to establish a strong stabilized denture base for acrylics. Available in 12/Pkg.



CE

#1800085	Stainless Steel
#1800086	Gold Plated

STRENGTHENERS

These strengtheners are twisted, braided strips that are 3-1/2" (88.9 mm) long. Available in 10/Pkg or 100/Pkg.

CE

	10/PKG	100/PKG
Gold Plated	#1800025	#1800035
Stainless Steel	#1810035	#1810045

FREGO STRENGTHENER

Gold plated upper mesh material. Sold individually.

CE

#1800050	Frego Strengthener

WIRE MESH

We have varieties of wire mesh to meet all demands. We have a Stainless Mesh that is X-Fine and Med-Fine which are both 6" x 6". We also have a 4" x 4" Gold Mesh. Sold individually.

CE

#1810050	X-Fine Stainless Mesh, 6" x 6" (15.2 x 15.2 cm)
#1810060	Medium-Fine Stainless Mesh, 6" x 6" (15.2 x 15.2 cm)
#1810070	Gold Mesh, 4" x 4" (10.1 x 10.1 cm)

IMPULSE BAG SEALER MODEL HS 3000

The Model HS 3000 is an Impulse Bag Sealer is a low cost solution The easy-to-use sealer is a lightweight, portable table model that watertight seals thin as well as thick materials. When sealing, there are no hot surfaces, just plug in and use – there's no warm-up needed. The sealer is made of sturdy cast aluminum construction and allows for easy, timely temperature control.

#1440015	Impulse Bag Sealer
#1440025	Heating Element

HEAT SEALING BAGS

These Heat Sealing Bags are versatile and easy to use. Dental cases slip easily into the bags. Bags are 5" x 6" (12.7 x 15.2 cm) and .002" thick. Available in 500/Pkg.

#1450010	Heat Sealing Bags

DIE & MODEL FABRICATION

DOUBLE DOWEL PINS

Our Double Dowel Pins are state-of-the-art twin pins with die guards and sleeves. They are easy to use with a Pindex Machine. The pins add stability which eliminates rotation. They also are extremely precise with no distortion.

#1310055	Double Dowel Pins, 1,000/Pkg

REVERSE DOWEL PINS

Reverse Dowel Pins are economical plastic stabilizing pins. They are tapered to insure fit with most drills. Best used when removing die is required (porcelain veneer).

#1310070	Reverse Dowel Pins, 1,000/Pkg

STICK DOWEL PINS

These Stick Dowel Pins are made of all brass.

#1310040	Stick Dowel Pins, 100/Pkg

SWISS DOWEL PINS

These Swiss Dowel Pins are made of top quality brass.

#1310011	Small, 100/Pkg
#1310010	Small, 1,000/Pkg
#1310021	Medium, 100/Pkg
#1300015	Medium, 1,000/Pkg

J-PIN™

This J-Pin is a die locating device with positive 2-point indexing. The all-brass piece is made with retention wire. It can easily be bent to 180-degrees and fixed into an impression.

#1310200	Small Anterior (805-JT), 500/Pkg
#1310210	Medium Universal (805-JS), 500/Pkg

ADJUSTABLE SAW FRAME

This Adjustable Saw Frame is for unpinned blades. Has a nice ergonomic wood handle and solid construction.

#1380010 Adjustable Saw Frame

OFFSET PIN SAW FRAME

This offset Pin Saw Frame uses 5" (12.7 cm) blades. Also availableis an Opti-Saw (off-set) with 12 blades.

#1140285 Offset Pin Saw Frame
#5940285 Saw with 12/Pkg Blades

PIN SAW FRAME

This Pin Saw Frame is for 5" (12.7 cm) blades. Frame is adjustable.

#1140280 Pin Saw Frame

SWISS CUT OFFSET SAW FRAME

The teeth of this Swiss Cut Offset Sawframe are machined by our precision setting process that guarantees a cutting performance unequaled by any other blade in the world. The blades are made of the finest alloy steel that lasts longer and stays sharper. The rounded back design makes it easy to cut straight.

#1140290 Swiss Cut Offset Saw Frame

SAW BLADES

We offer various pinned Saw Blades. The sharp, precise blades have 18 teeth per inch.

Pinned 5" (12.7 cm) length, .055" wide, .010" thick
#1140170 Blue, 100/Pkg #1140160 Blue, 10/Pkg

PROCURE BLOCK OUT MATERIAL

ProCure now has a low viscosity, pigmented light-cured resin in syringe form that is excellent for blocking out models. This unique resin can be used in a variety of situations including bleaching reservoirs, die prep situations, and for filling voids and chips in prepared models. The kit comes with 5 pre-filled 1.2 cc syringes and 15 tips. Tips can be ordered separately.

#9637020 Block Out Material

SLAYCRIS SLIK DIE LUBRICANT

Slaycris Slik Die Lubricant is good for all types of C&B work. It's water soluble and especially useful in reversible hydrocolloid technique.

#1287105 Slik Die Lubricant, 4 oz. (.12 L)

DIE LUBE

This Die Lube is a quick-dry lubricant. It flows smoothly on any surface and contains no mineral oil. It evaporates quickly into a micro-scopic thin film that doesn't lose detail or fit.

#1287000	Die Lube, 4 oz. (.12 L)
#1287100	Die Lube, 32 oz. (.95 L)

PLUG-IT

Plug-It contains a special cyanoacrylate material of accelerator and base that permits a controlled setting time. The item is useful for filling air bubbles, basing up decay areas and short cusps, stabilizing dies during finishing procedures, and connecting bridge segments.

Kit contains: base, accelerator, solvent and pump

#1028675	Kit	#1028685	Accelerator, 2 oz.
#1028680	Base, .5 oz.	#1028695	Accelerator, 1 quart
#1028690	Solvent, 1 oz.	#1028681	16 gauge Applicator Tip

PERMABOND 910

Permabond 910 is the original 100% methyl cyanoacrylate adhesive that adheres excellently to metal surfaces. The low viscosity liquid allows rapid curing at room temperatures when pressed into a thin film between two parts. It will cure to fixture strength in 10 seconds on most surfaces and rapidly develops high strength with fully cure obtained in 4 hours.

#1020050 Permabond 910, 1 oz.

KEYBOND

This Keybond has a thin viscosity for hard-to-bond surfaces.

#1020065 Keybond, 20g

TRI-DYNAMICS TRI-EPOXY

Tri-Dynamics Tri-Epoxy is a new advanced formula that is dimensionally stable and aesthetically pleasing. It's easy to release from the mold. All boxes include 12 epoxy resin jars, 12 epoxy hardener syringes & 12 stirrers.

EQUIPMENT

NEW! 8-QUART PRESSURE POT

This Pneumatic High Pressure Pot is safe and easy to use for curing a wide variety of acrylics under controlled heat and pressure. Constructed ofboth stainless steel and aluminum, the curing vessel features easy-to-read, built-in dual gauges to provide accurate readouts for both pressure and internal temperature of the pot, an adjustable temperature control, and a pressure safety release. Its solid clad bottom provides even heat distribution.

#9622765 8-Quart Pressure Pot

BOSWORTH PRESSURE POT

Bosworth's Pressure Pot is a hydraulic water press used in creating bubble-free relines, repairs, splints, temporaries, and orthodontic appliances. It guarantees a dense, super smooth, porosity-free surface on any self-curing acrylic with just 10-15 p.s.i. Create a temporary with Pressure Pot to increase strength by reducing voids and porosity. Pressure Pot does not require electricity, heat, or air pressure. It is lightweight and easily transportable. Comes with a DVD.

Recommended for use with: Masque™
Total weight of unit: 6 lbs 2 oz • Inside Diameter: 5 in/12.7 cm
• Outside Diameter: 5.625 in/14.3 cm
Inside Height: 3.5 in/8.9 cm • Overall Height: 7.5 in/19.1 cm • Depth: 5.5 in/14 cm
• Width: 6 in/15.2 cm

WATCH THE TECHNIQUE VIDEO!

#092135	Pressure Pot

PRO-FORM PRESSURE PAIL

The Proline Pressure Pail has a lot of excellent features that other pressure pots do not. Internal pressure can be generated either hydraulically using water or pneumatically using air from a compressor. The Pressure Pail is large enough (6" diameter by 6" deep), to hold a standard reline jig or smaller articulator. Easy crank handle, replaceable O-ring, and all-aluminum construction makes this pot excellent for curing all types of cold-cured acrylics. Use for repairs, relines, splint production, retainers and more. Airline adapter sold separately.

#9622760	Pressure Pail
#9622780	Airline Adapter
#9124560	O-ring

DENTURE CURING UNIT

The Keystone Denture Curing Unit can be used for both boil out and curing. It cures up to 4 double flask compresses or 8 denture arches. The all-stainless construction makes for easy cleaning and anti-corrosion. The one-piece unit is sealed with no seams that will leak. There's a thermostatic control for variable holding temperatures.

#1050159	Denture Curing Unit, 115V
#1050160	Brass Spigot

PROCURE 300 LIGHT OVEN

The ProCure 300 Light Oven is an advanced third generation light curing unit that provides superior lighting intensity and excellent depth of cure. The ProCure 300 has been designed to provide the maximum light intensity without the negative heat buildup.

- A highly reflective chamber for uniform light coverage
- A rotating glass platform to ensure uniform light
- A built-in fan to maintain optimum temperature to eliminate warping
- Two powerful halogen bulbs to ensure excellent intensity and depth of cure
- A protective welder

#9634590	ProCure 300 Light Oven
#9634600	ProCure 300 Light Oven w/ Sample Pack

PRO-FORM VIBRATOR

The Pro-form Vibrator is a heavy-duty vibrator powerful enough to be used in all types of dental laboratories but small enough to work great in a dental office. Heavy-duty steel spring construction provides maximum vibration and minimal noise. The unit has a weighted aluminum base for stability, a four-inch diameter rubber top, a three-speed control switch, and rubber suction feet to hold the unit in place.

#7000352 Pro-form Vibrator, 110V

ULTRA SONIC 2300 GENERAL PURPOSE CLEANER

This General Purpose Cleaner is an ultra-high performance general purpose cleaner/degreaser. The cleaner is ammonia free. 100 gram package makes 1 gallon of solution.

#1850060 Ultra Sonic 2300

ULTRA SONIC 2400 PLASTER & STONE REMOVER

The Ultra Sonic 2400 is an excellently performing plaster and stone remover. The remover completely dissolves dental plasters and stone, as well as casting and soldering investments.

#1850065 Ultra Sonic 2400, 1 gallon (3.78 L)

POWER WASH

The Power Wash requires no plumbing. Just plug it in, controlled water pressure! It draws clean water above settled dirt and below floating wax.

#1690010 Power Wash

THE TRAP

The Trap's top drain valve and all metal construction eliminate the need for costly plumbing, clean-ups and repairs. The compact design of the trap is ideal for all dental lab and dental office sub-sink areas. The built in viewing window eliminates the guess work of when it's time to change the liner. Comes with a 10-year warranty on pail only.

SARTORIUS MODEL AY-511

- Removable flip-down cover for safe transportation and stackable storage
- Integrated weight chamber for easy calibration
- Optional USB and RS232 interface adapters (field installable)
- Portable with optional 9V block-battery
- Easy one button external calibration in 3 weight options

Weighing Modes: Grams, Pounds, Ounces, Grains, Pennyweight, Newtons, Taiwanese Taels, Hong Kong Taels, Chinese Taels, Carats, Troy Ounces, User defined

#1500160	Sartorius Scale AY-511

MINI SCALE

The Mini Pocket Scale is easy and convenient to use whenever and wherever. The pocket-sized digital electronic scale has a high precision strain gauge sensor. It is battery operated. The scale is excellent for weighing wax coping from pressable ceramics and all dental alloys.

#1050090	Mini Scale

KEYSTONE THREE-WELL WAX POT

The Keystone Three-Well Wax Pot is an economical, electric wax heater with three separate compartments. This is excellent for multiple wax build-ups. The temperatures are controlled (between 50F and 350F) and the machine is designed for easy access to waxes. Comes with a 1-year warranty. Machines are available at 110V and 220V.

#7000345	3-Well Wax Pot, 110 Volt
#7000346	3-Well Wax Pot, 220 Volt

PLASTIC BELTS

These Plastic Belts are extremely smooth running. They will outlast most conventional cotton belts and comes in various sizes to fit all needs.

#1475105	6'4" (1.93 m)	#1475123	9'1" (2.77 m)
#1475110	6'6" (1.98 m)	#1475125	9'2" (2.80 m)

#1655412 250 ml

INSTRUMENTS

ADJUSTABLE SAW FRAME

This Adjustable Saw Frame is for unpinned blades. Has a nice ergonomic wood handle and solid construction.

#1380010 Adjustable Saw Frame

SWISS CUT OFFSET SAW FRAME

The teeth of this Swiss Cut Offset Sawframe are machined by our precision setting process that guarantees a cutting performance unequaled by any other blade in the world. The blades are made of the finest alloy steel that lasts longer and stays sharper. The rounded back design makes it easy to cut straight.

Our unique temper process allows the blade to be incredibly flexible and long lasting. The pinned blade size is: 5" length, .055" wide, .010" thick.

#1140290 Swiss Cut Offset Saw Frame

WHEEL SAW

This Wheel Saw is a high quality cutting wheel used for hard sheet resins and dual laminates. The cutting surface is on the edge that contacts the plastic. Fits most slow speed handpieces.

#9630100 Wheel Saw

BLADE HANDLES

These Blade Handles have an ergonomic shield design that provides a non-slip grip. The handles minimize the risk of injury during assembly, passing, disassembly and disposal. The handle has one-handed activation of the protective shield while still featuring pencil, palm and finger grips. Accommodates both left- and right-handed use and operation.

#1130090	Metal Size 3 for #10, #11, #15 blades
#1130110	Green Plastic Size 5 for #10, #11, #15 blades
#1130120	Red Plastic Size 6 for #25 blades

BARD-PARKER BLADES

These Bard-Parker Blades are interchangeable and made from quality carbon steel. The long lasting blades have uniform sharpness and come in several sizes and styles.

#1130010	#10, Dozen	#1130050	#10, 150/Box
#1130020	#11, Dozen	#1130060	#11, 150/Box

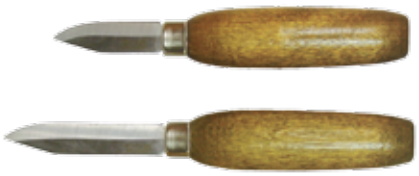
#1130040	#25, Dozen	#1130080	#25, 150/Box

PLASTER KNIVES

Our Plaster Knives are made of high quality carbon steel with wood handles.



#1490030	Short Blade, 1-3/4" (44.4 mm) long
#1490040	Long Blade, 2-1/2" (63.5 mm) long

HANDY KNIFE

The Handy Knife fits in palm of hand and is useful for carving and many other applications.

#1490010	Handy Knife

GRIFHOLD KNIFE

All Grifhold products are made to the highest specifications and priced competitively for consistent savings. Grifhold has earned international recognition for delivering high-quality custom knives, blades and specialty hand tools.

#1130180	#24 Grifhold Knife
#1130185	Replacement Blades, 5/Pkg

STRAIGHT HANDLE CHISEL

This Straight Handle Chisel is #15 Left.

#1250050 Straight Handle Chisel

SCRAPERS

Scraper #3 is a sturdy instrument with a solid wooden handle. Scraper #6 is a sturdy instrument with a solid wooden handle. Sold individually.

#1760030 Scraper #3
#1760060 Scraper #6

PLASTER NIPPERS

These Plaster Nippers are strong enough to cut plaster and stone. Available in stainless steel or carbon steel.

#1550030 Stainless Steel
#1550020 Carbon Steel

CROWN & BRIDGE SCISSORS

Our Crown & Bridge Scissors are durable and provide comfort to the user. This dental instrument is made of stainless steel and 4" long, providing the dental professional with a reliable scissor.

#1750010 Straight Scissors
#1750020 Curved Scissors

HEMOSTATS

We sell several different types of Hemostats to fit all needs.

#1460030 Kelly Straight 5-1/2" (13.9 cm)
#1460040 Kelly Curved 5-1/2" (13.9 cm)

#1460010 Mosquito Straight 5" (12.7 cm)
#1460020 Mosquito Curved 5" (12.7 cm)

UTILITY SCISSORS

These All-Purpose Utility Scissors are great for bulk trimming of thermoplastics, especially Pro-form mouthguards. The easy grip handle and stainless steel construction is very handy throughout the lab or office.

#9139720 Utility Scissors

SCISSOR TYPE CROWN HOLDER

This Scissor Type Crown Holder is made of stainless steel and interchangeable diamond tips. Crowns and bridges are gripped within the crown. The diamond tip ensures that the grip contact is made above the crown margin.

#1620046 Scissor Type Crown Holder

TWEEZER TYPE CROWN HOLDER

These Tweezers are made of stainless steel. By using them there is no danger of damage to the crown margins when the restoration is gripped securely.

#1620045 Tweezer Type Crown Holder

COLLEGE TYPE PLIERS

The College Pliers #871 is a cotton and dressing pliers. It's 6" long with serrated tips.

#1620010 College Type Pliers

CEMENT SPATULAS

These Cement Poliamide Spatulas are sold in a 10/Pkg.

#1150051 Spatulas, 10/Pkg

BAR BENDING PLIERS

These Clasp Bending Pliers are 3 pronged, size #200.

#1620020 Clasp Bending Pliers

AKERS CARVER

The Akers Carver is a precision instrument for wax caring and setup work. It comes complete with blade and spoon.

#1220010 Akers Carver

CARVERS

These Carvers are ideal for carving margins and interproximal areas on wax bridges. They come in a variety of sizes and styles.

#1780020 Baltimore Spatula #7.5

#1780010 Grittman Spatula #31

#1780040 Wax Spatula #7

#1780030 Cement Spatula #24

#1220100 Vehe Carver

#1220070 LeCron Inlay Carver #5

#1220080 Modified Roach

#1220110 Ward Carver #1

#1220090 Roach Carver

#1220050 Hollenback Carver #3
#1220060 Hollenback Carver #3S

BOSWORTH COOLEY PIC™

Cooley Pic is an accessory for removing temporary restorations, copper bands, inlays, bridges, root tips, and any operation where a strong, pointed instrument is required. Made of stainless steel.

#0921317 Double End Pic

CERAMIC SCULPTING SET

The Ceramic Sculpturing Set is made of lightweight stainless steel. The easy grip makes it comfortable for technicians. Sets come in sleek and convenient storage case.

#5260094	Yellow handle with gingival blade
#5260095	Red handle with incisal blade
#5260096	Blue handle with knife back
#5260090	Complete Kit with all 3 instruments

REPLACEMENT TIPS

#5260091	#1 Gingival Blade, Yellow
#5260092	#2 Incisal Blade, Red
#5260093	#3 Knife Back, Blue

MAGNA BAR

The Magna Bar is a wood base with magnetic bars for holding burs, mandrels, lab tools, etc.

#1510010	12" long
#1510020	18" long
#1510030	24" long

BOLEY GAUGE

The Boley Gauge is the definitive dental tool used for a variety of procedures both in the laboratory and clinically. It's perfect for determining dimensions of length, width, and thickness in millimeter increments.

#1400010 Boley Gauge

LAB SAFETY

RESPIRATORS

There are two types of respirator masks: one for dust and one for gas. Both are NIOSH/MSHA Approved and meet OSHA Guidelines.

The Blue Respirators (8246) are used for dust/mist protection and where solvents and organic vapors are a bother. The Gray Respirators (8247) are used for acid gas protection (chlorine, hydrogen and sulfur dioxide). They also provide dust/mist protection.

#5920685 Blue (8246)
#5920690 Gray (8247)

GOGGLES

These heavy duty Goggles are recommended for use with acids. They are flexible with a Lexan polycarbonate lens. ANSI Approved Z87-1-1979.

#5920655	Goggles

PROTECTIVE SAFETY GLASSES

We offer both clear protective safety glasses and UV Protective Safety Glasses. Both are made of polycarbonate single piece lens construction. The unique spherical design delivers a distortion-free view even in peripheral vision areas. These glasses are secure and have a comfortable fit even when wearing over prescription glasses. These are an economical choice while still providing needed safety precautions. The UV glasses filter more than 99% of UV and dangerous blue light (up to 540nm).

#36-00110	Clear Protective Safety Glasses	EACH
#36-00210	U.V. Protective Safety Glasses	EACH

OVERGLOVES

These Overgloves are a great alternative to the more expensive latex gloves. They can be used with procedures that do not require tactile sensitivity such as opening incoming cases, disinfecting casework and general surface cleaning.

#9045660	Large	1,000/Box
#9045670	Medium	1,000/Box
#9045680	Small	1,000/Box

LAMPS/MAGNIFIERS

MEGAVIEW

The Megaview provides a wide field of vision and is lightweight. This is a binocular head mount loupe with flip up lenses for easy use and vision. The adjustable headpiece can be worn with regular glasses and has interchangeable lenses for different magnifying strengths.

#1400080	Megaview
#1400081	1.7x lens
#1400082	2.0x lens
#1400083	2.5x lens

HEADBAND MAGNIFIER

This Headband Magnifier gives 4x power and has dual side lights.
One touch design switches between 1.8x, 2.3x, 3.7x and 4.8x magnification.
The piece of equipment is lightweight, weighing in at 110g.

#1150120	Headband Magnifier

MISCELLANEOUS

ENAMELITE AEROPAQUE SPRAY OPAQUE

Enamelite through its patent pending packaging technology developed AEROpaque, a ceramic spray opaque can system which permits a dental technician to rapidly coat single units or multiple unit bridgework.

AEROpaque will consistently deliver completed opaque layers of 1/10 of a millimeter. AEROpaque incorporates nano particle size technology to create an extremely dense yet thin opaque layer which completely covers metal substructures with a superior bond. AEROpaque dramatically reduces the in-process time normally used for paste, paint-on powder/liquid and airbrush opaque application techniques. Training curve for AEROpaque is extremely brief, usually less than 1 hour.

Introduction Kit includes (4 cans), Base, A1, A2 and A3. Full Vita shade kits available as well as single shades.

#5100182	AEROpaque Shade A1
#5100183	AEROpaque Shade A2
#5100184	AEROpaque Shade A3
#5100185	AEROpaque Shade A3.5
#5100186	AEROpaque Shade A4 Medium
#5100187	AEROpaque Shade B1
#5100188	AEROpaque Shade B2 Medium
#5100191	AEROpaque Shade Base Medium
#5100196	AEROpaque Shade D2 Medium
#5100197	AEROpaque Shade D3 Medium
#5100214	AEROpaque Z-Liner, Clear Small

ENAMELITE LOW-FUSING NOVA CERAMIC SPRAY GLAZE

Enamelites patent pending LOW-FUSING Nova Ceramic Spray Glaze (Blue Label) compliments the original Nova Ceramic Spray Glaze (White Label).

Engineered to be compatible with low-fusing porcelain systems, LOW-FUSING Nova Ceramic Spray Glaze is formulated to increase efficiency and productivity by allowing technicians to stain, add-on contacts and glaze in a single bake. LOW-FUSING Nova Ceramic Spray Glaze can be applied to single or multiple units in less than 10 seconds to one or multiple units without distorting characterization stains or anatomical details.

#5100181	Low Fusing Glaze

ENAMELITE NOVA CERAMIC SPRAY GLAZES

By utilizing its patent-pending technology, Enamelite has developed the world's first Dental Ceramic Spray Glaze for the production of crowns and bridges. Enamelites Nova Ceramic Glaze is compatible with all porcelain systems and constructions, ranging from Porcelain Fused to Metal (PFM) to milled and pressed brand-named processes with one firing--incredible!

Nova Ceramic Glaze are the quickest, easiest, and most versatile dental glaze application on the market with many satisfied customers.

#5100179	NOVA Low Fusing Glaze, Medium
#5100180	NOVA Low Fusing Glaze, Small

ENAMELITE TITANIUM CERAMIC SPRAY GLAZES

AEROpaque® spray Titanium Bonder and Opaque was developed to solve a decades old problem for Dental Laboratories to apply a very thin even coat of Bonder and opaque in just seconds to titanium substructures. Enamelite's AEROpaque® Ti Ceramic Bonding system is compatible with GC Initial Ti system. In all ceramic and scan powder products we use Honeywell Soltice 1234ze, non-flammable environmentally friendly green propellant.

#5100199	Titanium Bonder
#5100200	Titanium Opaque Spray, Bone White
#5100201	Titanium Opaque Spray, Tissue Pink

BLUE SAFE ACID NEUTRALIZER

Blue Safe Acid Neutralizer avoids acid-related accidents in the dental lab or office. Before disposing acid, use Blue Safe to neutralize the acid. It can be used on any type of acid. Just scoop and sprinkle the neutralizer powder onto the acid – wait for the color to turn yellow to dark blue.

#5920670	Blue Safe Acid Neutralizer, 3 lb.

STRIPIT

Stripit removes oxidation and contamination from both semi-precious and precious metals. Available in 1-gallon bottle. The formula also is used for various other applications:

- Removes investments from high and low heat castings and soldering flux
- Removes porcelain and opaque from coping and frameworks
- Prevents bubbling of ceramic structure due to contamination from inorganic silicates imbedded in castings
- Reduces corrosion of metal parts in the laboratory which may be caused by acid fumes

#1655900	Stripit, 4 quarts (3.78 L)
#1655900	Neutralizer

RELIEF METAL

Our Relief Metal is soft and 25 gauge. The soft metal sheets are 1 lb. and 4" wide.

#1530090	Relief Metal

P.D. ATTACHMENTS

These Precision Dowel Attachments are easy to adjust. The male and female dowels are interchangeable and both have a 2-degree taper on the sides and 1-degree on the face.

#1631701	Small Set
#1631702	Large Set

POLISHING

POLISHING COMPOUNDS

COMPOSITE POLISH
Produces a quick, high shine on all plastic restorations.

#1660100 1 lb. bar (.453 kg)

RED ROUGE
Used for final polish on gold.

#1660070 1 lb. bar (.453 kg)

TRIPOLI
Used for removing scratches in preparation of denture materials and metal prior to final polish.

#1660030 2-1/2 lb. bar (1.13 kg)

BOBBING COMPOUND
Fast cutting action on metals (Jewelers Polish).

#1660080 1 lb. bar (.453 kg)

YELLOW HIGH SHINE
Used to create exceptional high gloss on denture materials.

#1660090 2-1/2 lb. bar (1.13 kg)

WHITE DIAMOND COMPOUND
Used for a clean, dry, fast pre-polish on plastics.

#1660040 1 lb. bar (.453 kg)

GREEN PLATE POLISH
A high shine compound for use on acrylic denture materials.

#1660050 3 lb. bar (1.36 kg)

SHURE SHINE PLATE POLISH
Best selling polish for use on acrylic denture materials.

#1660060 2-1/2 lb. bar (1.13 kg)

HATHO POLISHING COMPOUNDS

Brown - Designed for prepolishing of precious metals. Use with lathe brushes, Toro miniature brushes, Geza and Poly-Buffs. Ideal for polishing deep scratches. Prepolishing of crown and bridge work.

#1670109 100g

Green - Designed for high shine polishing of metals and chrome cobalt framework. A very fine compound used for final polish. Initial surface must be prepared with a prepolish. Use with muslin, chamois, micro-fiber leather or flannel buffs.

#1670094 100g
#1670121 250g

Blue - Designed for high shine polishing of precious, non-precious metals and light curing composites. A universal compound for high shine polish. Special high grade abrasives inside, similar to diamonds. Use with muslin, chamois, micro-fiber, leather or flannel buffs.

#1670095 100g
#1670123 250g

Beige - Designed for high shine polishing of acrylics and polymer based crowns & bridges. A universal compound for high shine polish. Initial surface must be prepared with a pumice prepolish. Use with muslin, chamois, micro-fiber, leather, flannel or felt buffs.

#1670110 100g
#1670124 250g

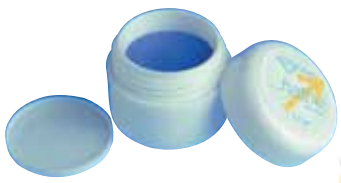
White - Designed for fine prepolishing of gold alloys and chrome cobalt framework. Use with lathe brushes, Toro miniature brushes, Geza and Poly-Buffs. Provides a smooth finish.

#1670093 100g
#1670120 250g

Red - Designed for final high shine polishing of gold alloys. The least abrasive Hatho polishing compound. Initial surface must be prepared with a prepolish. Use with muslin, chamois, micro-fiber, leather or flannel buffs.

#1670114 100g
#1670122 250g

Diamond Polish - Designed for high shine polishing of precious and non-precious metals, titaniums, acrylics, composites and ceramics. The fastest and most efficient method to polish every dental material. Initial surface must be prepared with a prepolish. Use with miniature brushes combined with polishing discs, geza and Toro brushes or muslin, chamois, micro-fiber, leather, flannel and felt buffs, micro-fiber, leather or flannel buffs.



#1670096 2.5g

NEW! HATHO THERMOPOL SET

Less work for better results is what the new Hatho ThermoPol Set is built upon. It's revolutionary design and working technique will brighten not just acrylics in faster-than-ever times, but also thermoplastics such as Valplast® and TCS®. That being said, this all-in-one kit is the only of its kind on the market, and will take your denture polishing work to a whole new level.

Our Hatho ThermoPol Set comes with the following: Multi Layer Brush, Polistar Lintygrey Compound (90 g), COSIMA Soft Buff, MIRA Polishing Buff, Polistar Cream (90 g), Polistar Pro Pink (150 g) and AlphaCard Pocket Card

#1670540	Hatho Thermopol Set	#1670544	Polistar Cream
#1670541	Multi Layer Brush	#1670546	Polistar Pro Pink
#1670542	Polistar Lintgrey Compound	#1670547	Alphacard Pocket Card
#1670543	Cosmina Soft Brush	#1670523	Mira Polishing Buff

HATHO ACRYPOL POLISHING KIT

The Hatho Acrylpol Polishing Kit is for efficient high-shine polishing of acrylic dentures and teeth. The kit includes: 2 Poly-Buffs Chung King Lathe Brushes with Scotch Brite.

#1670133 Acrypol Polishing Kit

HATHO POLISTAR POLISHING KIT

Polishing set for an efficient high-shine polishing of acrylic dentures and teeth. The product is silica free.

Kit Includes: 300 g of Polistar Lintgrey, 125 ml Polistar Emulsion, and 1 Cotton Buff

#1670200 Polistar Polishing Kit

HATHO THERMOPLASTIC POLISHING KIT

Polishing set designed for an efficient high shine on all flexible partial materials.

Includes: 2 Hatho Flex Polishers, 1 Mira Buff, 1 Yellow Mira Buff, 1 Polistar Compound and 1 Polistar White Compound

#1670160 Thermoplastic Polishing Kit

LABORATORY PUMICE POWDER

Our Laboratory Pumice Powder is the best quality powdered pumice available. The pumice is available in four grades of coarseness and three different sizes.

PURE BLAST WHITE ALUMINUM OXIDE

Pure Blast White Aluminum Oxide is used in medical, dental, aircraft and automotive applications. In the cosmetics and skin care industries, White Aluminum Oxide Microdermabrasion Crystals are used in skin exfoliation products. This is a dental-grade abrasive that comes in 50 micron, 240 grit. Overall, it's a 100% dependable cleaning agent.

#1010002	15 lbs. (6.8 kg)
#1010004	50 lbs. (22.68 kg)

PORCELAIN ACCESSORIES

INSTA-FRAC

Insta-Frac is an instant refractory material used for repairing and adding to ceramic crowns, porcelain laminates, Dicor crowns, inlays, onlays, etc. It's also used for making custom firing pegs and all types of porcelain add-ons, except margins. The material is carbon free and non-contaminating. Can be used up to 3,200-degrees Fahrenheit.

#5920305 Insta-Frac

FURNACE TONGS

These Furnace Tongs are 15" (38.1 cm) long to provide ideal reach. The scissor-type tongs can securely grab dental work from the furnace.

#1620037 Furnace Tongs

PORCELAIN TONGS

These Porcelain Tongs are 12" (30.4 cm) long to help pick up and place precious dental materials.

#1620035 Porcelain Tongs

METAL PINS

We offer several types of metal pins for dental work.

#1680096	A. Molar Pin Peg, 5/Pkg
#1680092	B. Posterior Swivel Pin Peg, 5/Pkg
#1680094	C. Anterior Swivel Pin Peg, 5/Pkg
#1680093	D. Anterior Metal Pin Peg, 5/Pkg
#1680089	E. Metal Round Head Pin Peg, 6/Pkg

V PEGS

V Pegs are single firing pins that can be taken out from the honeycomb base tray. Single individual firing pins can also be used for positioning work on the tray. Fan-shaped pins have 4 thin arms (0.4" diameter/1.02 cm) that can be bent individually.

#1680045 V Pegs, 5/Pkg

UNI-PEGS

The Uni-Pegs are easy to position and made of high-fused micro grain porcelain composition. The pegs' triangle shape provides excellent balance, support and stability. These can be assembled to form a round tray.

#1680080 Uni-Pegs, 6/Pkg

HONEY-COMB PEGS

Honey-Comb Pegs are made of nickel-chrome steel, which enable users to custom design honey-comb trays.

#1680085 Honey Comb Pegs, 4/Pkg

PORCELAIN STACKING TRAYS

These Porcelain Stacking Trays save space and time. They come with covers.

#1680010 Porcelain Stacking Trays, 5/Pkg

PORCELAIN SLANT TILE

This Porcelain Slant Tile comes with five wells and five slants.

#1680020 Porcelain Slant Tile

NINE WELL SECTION PALLET

The Nine Well Section Palette has nine sections and comes with dry and vent. Stackable and sold individually.

#5001013 Nine Well Section Pallet

TWENTY WELL MIXING PALLET

This Mixing Palette is stackable and offers ceramists the convenience of mixing and storing several shades of porcelain or the combination of needed for a single or multi-color shade. The small reservoir holes in the palette allows for easy fluid replenishing. The glazed surface protects the brushes. It has 20 small wells on the palette. Sold individually.

#5001004 Twenty Well Mixing Pallet

TWENTY-THREE WELL STAINING PALLET

This Mixing Palette is stackable and offers ceramists the convenience of mixing and storing several shades of porcelain or the combination of needed for a single or multi-color shade. The small reservoir holes in the palette allows for easy fluid replenishing. The glazed surface protects the brushes. There are more than 20 wells on this palette. Sold individually.

#5001014 Twenty-Three Well Staining Pallet

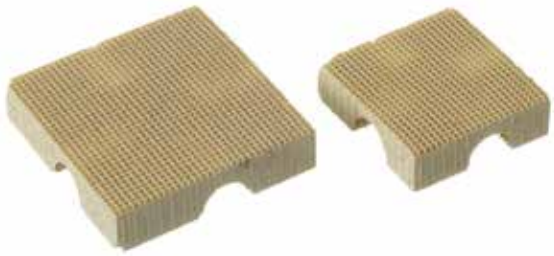
PORCELAIN SLANT TILE

This Porcelain Slant tile is the same as Porcelain Slant Tile but features dry and vent. Has 10 sections and makes work easier.

#5001002 Porcelain Slant Tile

HONEY-COMB SQUARE TRAY SET

The Honey-Comb Square Tray set has a unique structure that heats rapidly and evenly, virtually eliminating any hot spots. The set contains one large and one small tray per box.



#1680030 Honey-Comb Square Tray Set, 2/Set

HONEY-COMB ROUND FURNACE TRAY

The Honey-Comb Round Furnace tray is 2-7/8" dia. x 1/2" (73 x 12.7 mm) thick. Heats evenly and produces high quality porcelain appliances.

#1680050 Honey-Comb Round Furnace Tray

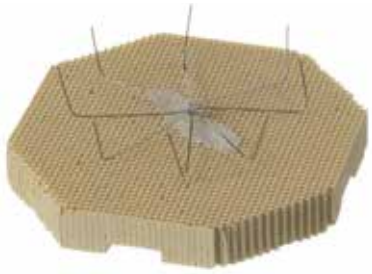
HONEY-COMB OCTAGON TRAY

The Honey-Comb Octagon Tray is 7/16" (11.1 mm) thick. Heats evenly and produces high quality porcelain appliances.

#1680065 Honey-Comb Octagon Tray

SPIDER TRAY

The Keystone Spider Tray is a new firing tray utilizing a fixed fan shaped pin specifically developed for all types of delicate ceramic work with an emphasis on all-ceramic restorations. With 8 bendable, thin metal prongs, the tray can adapt to a variety of cases. The unique shape and thinness of the blades allow a more uniform cooling of the ceramic restoration.



#1680040 Spider Tray

HEAT-SINK SAGGER TRAYS

The Heat-Sing Sagger Trays provide rapid cooling while being used in repeated firings. The tray is designed for easy insertion and removal from furnace. It can be fired up to 2,800-degrees Fahrenheit.

#5920075	2 Trays, 2-1/4" x 2-1/4" x 3/8" (57.1 x 57.1 x 9.5 mm)

CARBON INSERT CERAMIC TRAY

These Carbon Insert Ceramic Trays absorb silver vapor that is released during each firing. It's a must-use with silver palladium alloys. Items also come with 6 anterior pegs or 6 carbon replacements. Size: 2-1/4" x 2-1/4" x 1/4" (57.1 x 57.1 x 6.3 mm).

#5920040	C010, 2/Pkg
#5920045	C008, 2/Pkg plus 6 anterior pegs
#5920055	C012, 1 plus 6 carbon replacements

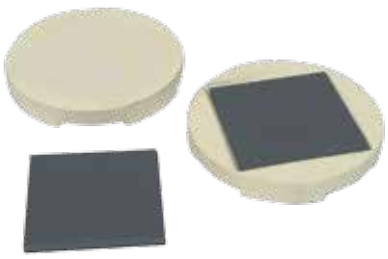
CERAMIC TRAY

This Ceramic Tray is designed for easy insertion and removal from the furnace. Items also come with 6 anterior pegs, 6 posterior pegs or 6 etch pegs. Size: 2-1/4" x 2-1/4" x 1/4" (57.1 x 57.1 x 6.3 mm).

#5920020	B002, 2/Pkg
#5920025	B006, 2/Pkg plus 6 anterior pegs
#5920030	B007, 2/Pkg plus 6 posterior pegs
#5920035	ET2, 2/Pkg plus 6 etch pegs

ROUNDHOUSE TRAYS

Roundhouse Trays allow for easy heating and cooling. They are designed for easy insertion and removal from furnace.



#5920060	RT1 Ceramic Tray, 2/Pkg
#5920065	RT2 Ceramic Insert Tray, 2/Pkg

H-BASE PEGS

H-Base Pegs feature a revolutionary tunnel, which offers closer placement and greater stability. Interlocking allows absolute precision for exact positioning. The pegs can be fired up to 2,200-degrees Fahrenheit.

#5920011 B008 Molar & Bicuspid Peg, 8/Pkg
15 mm W x 11.9 mm D x 14.2 mm H

#5920010 B001 Posterior Peg, 8/Pkg
17.4 mm W x 13.8 mm D x 20.4 mm H

#5920015 ET1 Etch Peg, 6/Pkg
16.3 mm W x 14.7 mm D x 24.2 mm H

#5920005 B004 Anterior Peg, 8/Pkg
16.1 mm W x 13.1 mm D x 19.4 mm H

ROTARY

HATHO GEZA BRUSHES

Premium bristle materials (Goat Hair and Chung King) offer the perfect miniature brush for deep, interproximal and occlusal polishing. 3/32" (.24 cm) shank, 15,000 rpm, 12/Pkg.

#1670087 Geza 100 HP
White Goat Hair

#1670089 Geza 120 HP
White Chung King

#1670088 Geza 121 HP
Black Chung King

#1670090 Geza 122 HP
Gray Chung King

HATHO HABRAS DISCS

Ideal for heavy cleaning (coarse), removing light oxide (medium), pre-polishing, semi-finishing, blending, texturizing and polishing (fine). This is an abrasive that does not generate the heat associated with rubber wheels. Embedded cubitron mineral abrasive is much harder than most metal. Removes oxides and polish without using compounds. Ideal for cleaning metal work and hard-to reach areas. 10,000 rpm. Recommended: 4 discs mounted together.

Coarse Yellow - 80 grit. Remove deep scratches from precious metals, non-precious metals, acrylic dentures and composites.

#1670083	4 Discs/Mandrel
#1670097	4 Discs w/o Mandrel
#1670101	48 Discs Bulk Package

Medium Red - 220 grit. Removes fine scratches from precious metals, non-precious metals, acrylic dentures and composites.

#1670084	4 Discs/Mandrel
#1670098	4 Discs w/o Mandrel
#1670102	48 Discs Bulk Package

Fine Blue - 400 grit. Smooths precious metals, non-precious metals, acrylic dentures and composites.

#1670085	4 Discs/Mandrel
#1670099	4 Discs w/o Mandrel
#1670103	48 Discs Bulk Package

Super Fine Pink - Pumice. Shine precious metals, non-precious metals, acrylic dentures and composites.

#1670086	4 Discs/Mandrel
#1670100	4 Discs w/o Mandrel
#1670104	48 Discs Bulk Package

High Gloss Green - 6µ. High Gloss precious metals, non-precious metals, acrylic dentures and composites.

#1670108	4 Discs/Mandrel
#1670112	4 Discs w/o Mandrel
#1670116	48 Discs Bulk Package

High Shine Orange - 1µ. High Shine precious metals, non-precious metals, acrylic dentures and composites.

#1670107	4 Discs/Mandrel
#1670111	4 Discs w/o Mandrel
#1670115	48 Discs Bulk Package

HABRAS DISC KIT

A unique three-dimensional, abrasive and flexible design that provides a uniform finish. Ideal for heavy cleaning, removing light oxide, pre-polishing, semi-finishing, blending, texturizing and polishing.

#1670113	6-Piece Kit, 10,000 rpm

HATHO HABRAS MINIATURE BRUSHES

Long-lasting polymide filaments. All brushes are embedded with polish, eliminating the need for polishing paste. The light gray brushes are embedded with aluminum oxide and are designed for pre-polishing ceramics and light-cured materials. The dark gray brushes are embedded with silicone carbide and are designed for use on all alloys. Long-lasting, durable, reduced dust while polishing, and a high sheen. 4/Pkg.

Aluminum Oxide - for ceramics and light cured materials.

HATHO POLY-BUFFS CHUNG KING LATHE BRUSHES

The exterior consists of specially selected Chung King bristles which guarantee long life and high-quality polishing. These brushes are wrapped around a core of grit-free, soft Scotch Brite™ and fine muslin cloth. The core is made from wood encased in plastic, allowing for easy mounting/dismounting.

#1670022	3" (76.2 mm) dia., Muslin Cloth 1,400 rpm, 3/Pkg

#1670018	2" (50.8 mm) dia., Scotch Brite 2,800 rpm, 1/Pkg

#1670017	1-3/4" (44.4 mm) dia., Scotch Brite 2,800 rpm, 1/Pkg

#1670018	2" (50.8 mm) dia., Scotch Brite 2,800 rpm, 1/Pkg

HATHO SPECIAL LATHE BRUSHES

Single row brush is designed for interproximal polishing on a lathe. The dual row brush is for the polishing of non-precious metals (e.g. chrome cobalt). 12/Pkg.

#1670020	1-3/4" (44.4 mm) dia., 6,000 rpm
#1670021	2" (50.8 mm) dia., 6,000 rpm

HATHO MINIATURE HANDPIECE SCOTCH BRITE™ BRUSHES

Mounted on mandrel. Same application as Polishing Discs with Scotch Brite™. 12/Pkg.

#1670016	Coarse, 5,000 rpm
#1670092	Medium, 5,000 rpm
#1670091	Fine, 5,000 rpm

HATHO MINIATURE POLISHING BRUSH

This Miniature Polishing Brush is made with a coarse cotton thread. Available in 12/Pkg.

#1670023	Coarse, normal thickness, 8,000 rpm, 12/Pkg

HATHO MINIATURE BRUSH

with polishing discs

These brushes have an inserted chamois with polishing discs. We provide two types of brushes with white goat hair and grey goat hair. Ideal speed for these brushes is 10,000 rpm.

#1670051	White Goat Hair w/ chamois, 12/Pkg
#1670052	Gray Goat Hair w/ chamois, 12/Pkg

ABBOTT ROBINSON BRUSHES

Classic, high quality natural mounted bristle brushes ideal for cleaning and polishing of denture acrylic, cleaning interproximal spaces after denture deflasking, and for general laboratory polishing applications. These well-known, industry-standard brushes also excel at applying polishing materials and at polishing of lab-processed composites, metal and ceramic crowns. Durable design features permanently attached bristles for improved performance and extended life without flaring.

#1201915	52DS
#1201956	47XF
#1201957	47XC

Z-BUR

The special hollowed, fluted design of Keystone's Z-Bur Diamond Bur is perfect for easy removal of sticky tissue conditioners and pastes commonly used to take denture impressions. The bur also works well in removing most soft liners. Normally messy removal of materials is eliminated with the Z-Bur action set at a medium speed (15,000-25,000 rpm). The slower cutting speed reduces burning and melting of the liner. The hollowed design also reduces the clogging of carbide and minimizes flying debris. Once the liner is removed the final preparation of the hard surface can be performed with carbide of choice.

#1201995 Z-Bur

ARBOR BAND CHUCK

We offer two types of Arbor Band Chucks. The first is for standard lathes with 3/8" (9.5 mm) shaft. Also we have a shaft for standard 3/4" bands (1/4" shank). These bands come in left or right hand sides of the lathe. Sold individually.

For standard lathes with 3/8" (9.5 mm) shaft
#1260020 Arbor Band Chuck

For standard lathes with 3/4" (19 mm) bands, 1/4" (6.3 mm) shank
#1260030 Left Hand
#1260040 Right Hand

BUR CHUCK

The Bur Chuck is designed to be used with small burs and mandrels as long as they do not exceed 1/4" (6.3 mm) diameter. It is to be used with lathes that have a tapered shaft. Sold individually. For standard shafts.

#1260050 Bur Chuck

TAPERED SPINDLES

Made of steel, these Tapered Spindles are designed to be used with buffing wheels, brushes, and centered wheels. The chuck is built for placement on either right or left hand shafts with 3/8" or standard tapered shaft. Sold individually.

For 1/4" (6.3 mm) shank, fits jacobs
#1260060 Stone Chucks

For lathe and knock down wheels with 1/4" (6.3 mm) arbor hole and 3/8" (9.5 mm) shaft
#1260080 Right Hand

STONE CHUCKS

The Stone Chuck is designed to accommodate 1/4" to 3/8" wheels and stones. They can be used on standard 3/8" shafts and is available for either right or left hand shafts. Made of steel for long-lasting wear. Sold individually.

For 1/4" (6.3 mm) shank, fits jacobs
#1260060 Stone Chucks

For lathe and knock down wheels with 1/4" (6.3 mm) arbor hole and 3/8" (9.5 mm) shaft
#1260080 Right Hand

CARBIDE TWIST DRILLS

These Carbide Twist Drills work on a pin machine. Available in 3/Pkg.

AFG AESTHETIC TRANSLUCENT WAXES

Keystone AFG aesthetic translucent waxes, created by Alberto Battistelli, are used to construct wax teeth that faithfully reproduce natural teeth with a layering system similar to that used by prosthodontists for dental ceramics. The pastel coloration with light shades is very similar to dentine and natural enamel and is accompanied by slightly brighter colors. This reproduces individual characterization in a way that is similar to what is normally done with super-colors or intensive masses during the construction of ceramic teeth.

AFG wax kits contain black wax to create perfect marginal closures, an opaque white wax, and an opaque grey wax for the technique of mono-color waxing, which assists in the viewing of anatomical details.

White Wax is for mono-color waxing, opal effects and imitation of decalcified areas in aesthetic waxing. Dentin A1 is for modeling of light dental nucleus. Dentin A3 is for modeling of dental nucleus or the neck. The blue/grey wax is the imitation of the areas of grey-blue transparency. Neutral is for the imitation of the effects of translucence, enamel and dilution of all the masses to make them more translucent. Orange is for modeling of the neck, the back of occlusal zones, the mamelons and the interproximal areas. The light brown is for the coloration of the neck and the proximal areas and the dark brown in for the simulation of caries. ***International Sales Only.***

CORNING INLAY WAX

Corning Inlay Wax is developed for the requirements of inlay technique. The wax is form-stable and contraction resistant (low shrinkage) from wax-up to burnout. It will not pull, flare, chip, crack, drag or expand at the margins, even when being cast in extremely thin sections. It will resist deformation due to handling and can be easily carved. Will not become sticky or flaky or gum up instruments and will burn-out cleanly with no residue.

#1880390	Regular Green, 1 lb.	#1880430	Special Hard Green, 1 lb.

MIZZY PIP PASTE

PIP is a pure white silicone paste, used for seating crowns, bridges and full, immediate and partial dentures. The brief procedure yields specific results that are easy to read and thoroughly reliable, surpassing results obtained with chemical set pressure indicating materials used to locate areas of denture discomfort. PIP is applied to the dry denture; companion PIP spray is applied to the tissue. The denture is then seated under pressure then removed. Areas where the paste has been displaced show points of excessive pressure.

BOSWORTH ZINC PHOSPHATE CEMENT

Zinc Phosphate Cement is specially blended to mix smooth and complete. This cement has excellent bonding strength and works well for crowns, inlays, fixed bridgework, orthodontic bands, and temporary fillings. Powder available in yellow or light yellow.

Tips: As the amount of powder incorporated into the mix is increased, the strength increases. Incorporate the powder incrementally. If a large amount of powder is mixed into the liquid all at once, the temperature at the site of the reaction becomes higher, resulting in an increased reaction time and loss of control of the consistency. For orthodontic bands, a heavy consistency will produce greater film thickness, which is important for band retention.

BOSWORTH AEGIS® CROWN & BRIDGE CEMENT WITH ACP

Aegis Crown & Bridge is a syringe dispensed, two paste, dual-cure modified resin polymer material. It is the first crown & bridge resin cement containing an Amorphous Calcium Phosphate (ACP) filler. Aegis C & B is ideal for use as a permanent luting cement for crown & bridge, inlay, and veneer cementation applications, and makes for excellent margin. When exposed to a curing light, Aegis C & B cures in 5-10 seconds.

THE DENTAL ADVISOR ++++

Standard Kit: 2 ml syringes Aegis C&B, 6 ml Aqua Bond™, 6 ml Dentin Resin, 20 Mixing Tips

#0921025 Standard Kit (Shade B1 Light)

BOSWORTH MASTERLINK®

MasterLink Crown and Bridge is a syringe dispensed, two paste, dual-cure resin cement, ideal for use with gold, ceramic, crowns, inlays and onlays. Masterlink features low viscosity and thin film thickness to provide ideal handling. A non-runny material makes a perfect margin the first time and every time. MasterLink is radiopaque and available in Vita Shade B1 (59), A2 (60), and C1.

Standard Kit: 1 - 9 g syringe MasterLink Cement, 5 Mixing Tips

#092176 Standard Kit

BOSWORTH SUPEREBA®

SuperEBA is an all-purpose, alumina-fortified material for final cementation of a single crown or inlay, or for use as a base, liner, or a temporary dressing for the relief of pain. SuperEBA's neutral pH and mild formulation provide additional patient comfort during the healing process. Hydrophilic nature and low film thickness provide unsurpassed convenience, making it an excellent choice for patients who are easily irritated. Adheres to tooth structure in the presence of moisture. Not to be used for implants.

Tips: Regular set has a greater than 15 minute slab set, but a shorter in the mouth set of 10-15 minutes. The fast set has a 10-15 minute slab set, but a faster in the mouth set of 4-8 minutes. Film thickness 25 microns.

CE 2195

BOSWORTH AEGIS® LINER WITH ACP

Aegis Liner is a light-cured resin with Amorphous Calcium Phosphate (ACP) formulated cavity liner/ base material. Easy to apply and will chemically bond to all adhesive and composites. Available in a convenient dispensing syringe.

Standard Kit: 4 - 1.2 ml syringe Aegis Cavity Liner with ACP

#0921730 Standard Kit

BOSWORTH COPALINER®

Copaliner cavity varnish and sealant protects the dentin and penetrates, fills, and seals the tubuli. It insulates against thermal, galvanic, and electrical shock and prevents hyperemia, death of the pulp, and discoloration. Copaliner provides a strong bond and an excellent marginal seal that will extend the life of the restoration. Its non-chloroform formula is scratch resistant and virtually insoluble in the oral environment. Over time it will develop dentinal tags for improved performance. Copaliner is ether-based with a biologically mild formula, minimizing post-operative sensitivity. CAN ONLY BE USED UNDER AMALGAM.

CE 2195

Standard Kit: .5 oz (14 ml) Solvent, .5 oz (14 ml) Varnish

#0921525 Standard Kit

COMPONENTS

#0921526 .5 oz (14 ml) Varnish
#0921527 .5 oz (14 ml) Solvent

BOSWORTH HYDROX®

Hydrox radiopaque calcium hydroxide paste is a rigid, self-setting cavity liner and pulp capping agent. Hydrox eliminates all chemical and thermal sensitivity by sealing dentinal tubules and protecting the pulp. Hydrox serves as a protective barrier that insulates the dentin and pulp from acid-containing cements and restorative materials. Works well under glass ionomers and will not affect amalgam or the polymerization of composites. The superior flowability of Hydrox permits uniform coverage and controlled placement into preparations.

Tips: Hydrox can be used as a temporary cement. Hydrox's high pH level acts to inhibit bacterial growth at the cavity wall. This property is particularly important for the treatment of teeth with complicated crown fractures, open apices, or root perforations.

CE 2195

Standard Kit: 15 g Base, 13 g Catalyst
#0921071 Standard Kit, Dentin

#0921739 1.2 ml Syringe B1 (2)

BOSWORTH GORILLA SEAL™

Gorilla Seal is a crystal clear light-cure surface sealant with a smaller oxygen-inhibited layer that allows the sealant to cure to a high gloss or glossy finish for reduced polishing. Aesthetically pleasing in its 100% crystal clear form, this resin agent can seal over veneers, temporary crowns, composite restorations and I.D. or decorative designs. Gorilla Seal may reduce staining and sensitivity in cases such as tooth bleaching, cervical erosion and veneers.

Tips: Use a halogen/LED with halogen capability for curing.

THE DENTAL ADVISOR ++++

Standard Kit: 8 ml Gorilla Seal

Standard Kit: 4 - 1.2 ml Gorilla Seal
#0921051 Standard Kit (Syringe)

BOSWORTH ESTEEM®

Esteem is a vita shade (A-2), 100% radiopaque, self-cure composite restorative material. The two-paste system, which includes a universal paste and catalyst paste, forms a durable restoration. The hardened surface can be polished to a natural appearance, almost identical to original tooth anatomy. Esteem is stain resistant and has physical properties that produces exceptional holding strength. It matches the full range of tooth structure with a single translucent shade that blends into the surrounding dentition. It mixes easily, sets quickly, and finishes beautifully. Can be used for post and core build-up.

Recommended for use with: Acid Etch, Hydrox®, and Wonder Wedges®

Tips: To prevent cross-contamination and hardening within the jars, opposite ends of the mixing stick should be used to dip into the universal and catalyst jars.
I Note: This product was formerly known as "Bosworth Natural".

CE 2195

ORANGE SOLVENT WITH LANOLIN

Orange Solvent with Lanolin is perfect for the removal of PIP paste, zinc oxide-eugenol, rubber base and other impression material from dentures, hands, face, mixing slabs and instruments.

#6120800 Orange Solvent, 32 oz. (.95 L)

BOSWORTH ORANGE SOLVENT

Orange Solvent is a wax and impression material solvent that quickly removes wax, baseplate, and resinous impression materials from acrylic teeth and denture bases. When used according to directions, Orange Solvent can be used on face and hands without injury to the most delicate skin. Orange Solvent does not contain carbon tetrachloride, acetone, chloroform, or any solvent which will injure, dissolve, or craze acrylic teeth or bases. Apply only with cotton or gauze.

#0921575 Orange Solvent, 16 oz (474 ml)

COSMETIC DENTISTRY

NIU NAIT TAKE-HOME CARE WHITENING KIT

Niu Nait Take-Home Whitening System comes in either 16% or 22% carbamide peroxide concentration. The system was developed by dentists, who aimed to achieve a long-lasting white smile with virtually no sensitivity in the comfort of your own home. The system has no strips, no hassles and no pain. Most importantly there's no sensitivity when using this product and you see results in just two weeks.

Niu Nait is available in two flavors, mint and strawberry, and come in 4, 10 or 50 syringe kits.

ETCHANT MATERIALS

SEITY ETCHANT GELS

Seity Etchant Gel is a superior quality dental etching gel specially formulated for maximum working and handling characteristics. The syringe dispensing gel stays in place and will not run onto exposed tissue. Get precise placement through small-gauge, pre-bent applicator tips. It washes off easily without leaving any residue.

#07-02777	37% Etchant Gel, Blue, 12 g syringe
#07-00377	37% Etchant Gel, Blue, 50 ml syringe

BOSWORTH ACID ETCH

Acid Etch is silica and glycerin-free, providing a cleaner, rougher, increased surface area free of bio-film. Acid Etch creates a deeper etch pattern for an easier application of bonding materials. For increased patient comfort and easy clean-up, Acid Etch is highly viscous, allowing for more accurate placement. Acid Etch is odorless, tasteless, and available in a 35% concentration aqua blue formula.

Recommended for use with: Hydrox®

Tips: Acid Etch contains phosphoric acid which may cause burns or skin sensitization in susceptible individuals. Before using this product cover the patient's eyes with protective eyewear. Avoid contact with oral tissues, eyes and skin. Do not use Acid Etch on dental pulp tissue; cover dentin close to the pulp (< 1 mm remaining) with a hard setting calcium hydroxide liner (Bosworth Hydrox).

BOSWORTH RE'CORD™

Re'Cord is a polyvinylsiloxane bite registration material specially formulated to provide enhanced accuracy, convenience, and patient acceptance. Re'Cord is blue in color, odorless, and tasteless. A fast-setting material, Re'Cord achieves snap-set hardness in under 1 minute to reduce patient discomfort and prevent costly remakes due to patient reflexive movement. Directly apply Re'Cord to the occlusal surface or use with a Bosworth Big Bite Tray for effortless bite registration in centric occlusion or at rest. Re'Cord remains virtually distortion free weeks after use.

Recommended for use with: E-Z Squeeze™ Universal Dispenser and Big Bite Trays™

BOSWORTH SUPERBITE™

Superbite is a traditional zinc oxide eugenol paste that combines controlled flowability and non-sagging body to enable unexcelled reproduction of the oral tissues that support a denture, registration of centric, and accurate seating of the casts for articulation. Superbite paste is a blue, two-component material, with a 1 minute in the mouth setting time. The absence of secondary flow and resistance to closure will enhance patient comfort.

Recommended for use with: Big Bite Trays™

#0921816	Tube Base
#0921817	Tube Catalyst

BOSWORTH PLASTOPASTE™

Plastopaste is a zinc oxide eugenol impression paste (light body) used for preliminary compound impressions, mucostatic impressions, rebasing dentures, and denture relines. Plastopaste easily mixes in 45 seconds to a consistent, extra creamy mixture, and sets hard in 2 minutes 30 seconds without distortion. Plastopaste is non-sticky, wipes easily from patient's face and hands, and can be repositioned without any visible cracks or lines. This formula has a pleasant taste and causes no eugenol burn.

Mixing Ratio: 13 g base to 5.6 g catalyst. I To disinfect: Immerse in a 1:213 iodophor for 10 minutes or 2% gluteraldehyde solution for 10 hours, prepared according to the manufacturer's instructions.

Tips: Plastopaste can be used as a temporary cement.

BOSWORTH RIMSEAL™

Rimseal is a PEMA acrylic peripheral impression material and bite registration material that can be used with custom or plastic impression trays for full denture impressions and border molding (muscle trim). Rimseal extends to the proper peripheral height without slumping. This soft material records peripheral detail without distortion and sets to become a rigid part of the tray. Rimseal is yellow in color, providing a distinct contrast color from impression materials.

BOSWORTH SUPERGEL®, SUPERGEL® FRESH & SUPERGEL® MAGIC

Supergel is a premium blended alginate material that mixes readily to a smooth, creamy consistency. Its slow dehydration and low surface tension provide consistent, accurate, and bubble-free detailed reproductions. Pleasing sassafras flavor, controlled flow, heavy body, and gag reflex reduction provide greater patient acceptance. Supergel Fresh has all the benefits of our traditional alginate but is a dust-controlled formula for less airborne particles when opening and mixing. Supergel Fresh is blue in color and berry-cherry flavored. Supergel Magic is a premium blended alginate that mixes readily to a smooth, creamy consistency. Purple during mixing changing to white when set. Sassafras flavor.

CE

Mixing Ratios: 9 g powder + 25 ml water = partial impression. 18 g powder + 50 ml water = full impression.

BOSWORTH SUPERPASTE™

Superpaste is a heavy body zinc oxide eugenol impression paste used for taking soft tissue impressions and final impressions with a denture. Superpaste combines the essentials of controlled flowability and "no sag" body to give unexcelled reproduction of the basal tissues. Its non-sticky formula sets hard in approximately 2 minutes to prevent bending or distortion and has no taste or burning sensation for patient comfort.

Tips: Superpaste is an good alternative for taking fully extended peripheral impressions on persons with a sensitivity to acrylics.

BOSWORTH PLASTOGUM®

Plastogum is a high-grade modified durable dental plaster. Plastogum can be used for full corrective denture impressions, wash impressions using a custom tray, preliminary compound impressions, or impressions for rebasing dentures. When mixed with water, it forms a putty-like consistency paste. Plastogum does not displace soft tissue, shrink after setting, flake, or soften and crumble from moisture absorption. Controlled setting time enables ease in border molding. Pleasant flavor.

BOSWORTH 100% STAINLESS STEEL IMPRESSION TRAYS

Bosworth's Stainless Steel Impression Trays are created for use with alginate or any other type of impression material where detailed reproduction and dimensionally stable results are vital. They lock impression material in the tray to prevent distortion when removing it from the mouth. Uniform thickness gives superior rigidity for consistent results. Bosworth Stainless Steel Impression Trays have a smooth finish to minimize tissue trauma, and are thin enough to allow for optimum patient comfort. They are autoclavable for extended use and wear, and come in solid or perforated styles in a large assortment of pedodontic, edentulous, regular, and XL sizes for partial or full impressions.

Twist trays are the same great impression tray with a maneuverable handle to fit both upper and lower quadrants. Just spin the handle, and place in desired area - upper right, upper left, lower right, or lower left! Autoclavable for extended use and wear. Available in either solid or perforated.

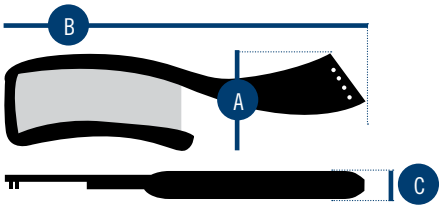
BOSWORTH BIG BITE TRAYS™

Big Bite Trays are economical, disposable bite registration trays with plastic frames and a gauze insert for use when recording centric occlusion. Big Bite Trays can be used on either side to cover a quadrant or for bi-lateral registration by clipping together right and left trays. The thin gauze mesh does not interfere with closure and ensures an accurate bite.

Recommended for use with: Re'Cord™, Superbite™

Dimensions:
A width 28.5 mm
B height 44.54 mm
C depth 9.5 mm



CE

BOSWORTH G.T.C.™

G.T.C. is a special oxygenating formula designed to clean and brighten trays (including stainless steel trays), instruments, oral evacuators, diamond instruments and burs while removing alginate, zinc oxide eugenol paste, wax, and modeling compounds. G.T.C. is effective as a deodorizer. G.T.C. is excellent for removing dried blood and for flushing and cleaning evacuators.

Mixing Ratio: 2 oz (60 ml) of G.T.C. to 1 qt of warm water.

#0921459	2 lb. (908 g) Bottle	Case: 20
#0921004	100 lb. (45.45 Kg) Drum	

BOSWORTH TAC™

TAC is a tray adhesive compound available in convenient spray can or brush-on liquid for use with alginate impression materials. TAC securely holds the alginate in the tray when the impression is removed from the patient's mouth. Excellent for orthodontic use.

Recommended for use with: Edentulous Tray Aways® and Tray Aways®.

Tips: Spray TAC on denture before applying soft reline to facilitate easy removal. Clean up with 70% alcohol.

MIZZY IMPRESSION COMPOUND CAKES & STICKS

Mizzy Compound Cakes & Sticks are pleasantly scented and flavored compound for taking full and partial impressions, and making preliminary impression trays.

Brown Medium Heat Compound:
- Plastic at 135˚F (57.2˚C)
- Ideal for snap impressions
- Working Temperature: 125˚F - 135˚F (52˚C - 57˚C)

Red Low Heat Compound:
- Maximum visibility of detail
- Working Temperature: 115˚F - 125˚F (46˚C - 52˚C)

Green Sticks:
- Has the most diverse working range
- Renders sharp details
- Will not fracture while trimming
- Chills evenly without warping
- Maximum contrast

BOSWORTH WONDER WEDGES®

Wonder Wedges are interproximal wooden wedges for holding matrix bands when performing all multi-surface fillings. Wonder Wedges keep filling and restorative materials in the matrix and reduce the formation of overhang, making polishing easier and quicker. Wonder Wedges are anatomically conformed (rounded tip and concave sides) to readily shape to the natural contour(s) of the mesial and distal spaces, minimizing the trauma to the patient's gingiva and decreasing discomfort. The end of the wedge is square for a secure grip. Made from sycamore wood, which swells slightly in a wet environment, Wonder Wedges fit tightly and will not loosen during dental treatment. Wonder Wedges are easily removed and will not chip or splinter. Choose from natural or a variety of colors in small, medium, large, or extra-large. Colored wedges will not stain.

Tips: Select the largest wedge that will fit the interproximal space to prevent the wedge from slipping.

MEDICAMENT MATERIALS

EUGENOL USP

Eugenol USP is antiseptic and analgesic. Used with zinc oxide powder for temporary cements and with zinc oxide and resins. It's an ideal antiseptic in root canal therapy.

#06-02077 Eugenol USP, 1 oz. (.02 L)

HEMOX-A

This Hemostatic Agent is a 25% buffered aluminum chloride hemostatic solution.

#25-03677 Hemox-A, 1 oz. (.02 L)

NEEDLESS INJECTOR

SYRIJET NEEDLELESS INJECTOR

Syrijet Mark II Needleless Injector is a precision instrument designed for simple, reliable operation. Saves time and effort, eliminates unnecessary patient discomfort and needle apprehension. If used as prescribed and cared for routinely, it will give you and your patients years of satisfaction.

Syrijet provides operative & surgical anesthesia for:
- Cavity preparation in upper and lower anterior teeth
- Crown and bridge preparation

Extraction:
- All permanent upper and most lower anterior teeth
- All deciduous teeth
- Deep scaling
- Flap removal
- Gingivectomy
- Excision of soft tissue lesions (fibroma, papilloma, etc.)
- Incision and drainage
- Placement or removal of sutures
- Revision of hypertrophic tissue
- Reduction of tuberosity
- Excision of mucous retention cyst (lip)
- Tissue biopsies
- Curettage
- Copper band impressions
- Cord retractions
- Post-op removal of bone
- Application of arch bars and ligature wires

Syrijet sub-topical anesthesia for painless needle insertions such as:
- Posterior superior alveolar nerve block
- Inferior alveolar nerve block
- Pre-I.V. needle insertion

#6170000 Syrijet

SURGICAL PRODUCTS

STERILE SURGICAL BLADES

Sterile Surgical Blade perfectly fit with scalpel handles. The blades are available in carbon and stainless steel. They come in a sterile package with each blade individually wrapped in a peel pouch.

GELATO APF FLUORIDE GEL

Gelato APF Gels are economical and quick application fluoride treatment. The gel is a 60-second acidulated phosphate fluoride that contains 1.23% fluoride ion. The low PH provides maximum fluoride uptake in less than 60 seconds and the improved thixotropic properties ensure closer adherence to enamel and interproximal areas. The smooth creamy gel will not run and thickens during treatment to prevent patient gagging. The gel is gluten free and offered in many different flavors for patient satisfaction and there's no bitter aftertaste following application.

16 oz. (.48 L) Flip Top Bottle

#24-08677	Bubble Gum	#24-03377	Strawberry

GELATO NEUTRAL PH FLUORIDE GEL

Gelato Neutral PH Fluoride Gels are economical and quick application fluoride treatment. The Neutral PH formula provides total treatment for a wide patient profile. It is ideal for patients with cosmetic restorations, porcelain or resin. It provides the perfect non-acidic balance, allowing patients to tolerate and accept fluoride applications with comfort with a 4 minute thixotropic formula. The gel is gluten free and there's no bitter aftertaste following application.

BOSWORTH AEGIS® PIT & FISSURE SEALANT WITH ACP

Aegis Pit and Fissure Sealant contains the "smart material" Amorphous Calcium Phosphate (ACP). The ACP filler is resilient and flexible, creating a stronger and longer lasting sealant. Aegis P&F has low shrinkage, good margin, and a slow rate of stress development so as to not chip off. Aegis P&F can be used with any light-curing device. Aegis' controlled flowability keeps the sealant on the tooth while completely filling the pits and fissures. When properly maintained and placed, Aegis forms a chemical barrier that may help keep patients free from carious lesions on the occlusal surfaces. Sealant cures to opaque on enamel.

Recommended for use with: Acid Etch and Bosworth ProphyBrite®.

BOSWORTH PIT & FISSURE SEALANT WITH FLUORIDE

Pit & Fissure Sealant is a light-cured resin with Fluoride. The controllable flowability keeps the sealant on the tooth while completely filling the pits and fissures. This sealant cures to an opaque film on enamel.

Recommended for use with: Acid Etch.

Standard Kit: 4 - 1.2 ml syringes P&F Sealant
#092156 Standard Kit

BOSWORTH GORILLA SEAL™

Gorilla Seal is a crystal clear light-cure surface sealant with a smaller oxygen-inhibited layer that allows the sealant to cure to a high gloss or glossy finish for reduced polishing. Aesthetically pleasing in its 100% crystal clear form, this resin agent can seal over veneers, temporary crowns, composite restorations and I.D. or decorative designs. Gorilla Seal may reduce staining and sensitivity in cases such as tooth bleaching, cervical erosion and veneers.

Tips: Use a halogen/LED with halogen capability for curing.

TONGUE SCRAPERS

Did you know that more than 85% of bad breath originates in the mouth, not the stomach? Tongue Scrapers provide a handy way to clean the tongue's surface and make sure that bad breath bacteria are scraped away. Cleaning on a regular basis is known to significantly reduce bacteria and food particles on the tongue. Reduces mouth odors, overall bacteria and helps to keep the mouth fresh and clean.

PROPHY PRODUCTS

GELATO PROPHYLAXIS PASTE

Gelato has been a forerunner of great-tasting prophylaxis paste, bringing on new flavors such as Pina Colada and Orange Sherbet. But what also makes Gelato Prophylaxis Cups great is a non-splatter formula that contains 1.23% Fluoride Ion with a unique blend of cleaning and polishing agents.

Gelato paste comes in boxes of 200 individual disposable cups for convenient use. The disposable cups also eliminate cross contamination and include a prophy ring for ease of application on the patient's teeth. For more options, the paste also comes in 6 ounce and 12 ounce jars.

Gelato Prophylaxis Paste is offered in 4 different grits: fine, medium, coarse and x-coarse. The fine grit is best for light stain removal and amalgam polishing. It's recommended to use the fine grit on children. For normal cleaning and polishing the medium grit is an ideal choice. The coarse grit is used in medium to heavy stain and plaque removal.

BOSWORTH PROPHYBRITE™

The ProphyBrite air polisher provides quick and gentle patient care. This unit delivers a fine sodium bicarbonate and water slurry for easy removal of plaque and stains. Ideal for cleaning and preparing teeth prior to placement of orthodontic brackets, sealants, bleaching, and fluoride treatments. Offers chair side convenience. Unit is easy to install, light weight, and portable from operatory to operatory. Connects to most four-hole handpiece coupler/air and water connection. A specific four-hole hose connection should be designated for optimal results. Comes with a DVD.

Tips: Nozzles are autoclavable. Do not autoclave nozzles if clogged. Adaptors are for use with Bosworth ProphyBrite only.

BOSWORTH CORA-CAINE®

Cora-Caine is a pain-relieving adhesive ointment for new or intermediate dentures. The active ingredient is 16% Benzocaine. Cora-Caine provides immediate relief and a secure fit by soothing tender ridges and relieving the discomfort of sore spots. Acting as a gel-like cushion between the denture and the tissue, Cora-Caine is applied directly onto the denture to provide positive retention and enhance stability. Cora-Caine is pink in color and has no smell or aftertaste. Available for the dental office in a box of 36 count 4 g tubes or for home use in a 1 oz tube. Remains effective up to 24 hours. Perfect product for denture break-in period.

Tips: Cora-Caine is a great product to include in a new denture kit. Do not use Cora-Caine for patients who have a history of allergy to local anesthetics such as procaine, butacaine, or other “-caine” anesthetics.

PRO-FORM MOUTHGUARD LAMINATES

Pro-form manufactures the only pre-made laminated mouthguard material in the industry. This material has long been considered the leader in custom-made mouthguards. By laminating two layers of soft EVA together, the laminate has excellent tensile strength. All of these features make the Pro-form mouthguard laminate the material of choice for custom-made mouthguards. Square cut to 5"x 5". Also available cut to round in both 120 mm and 125 mm.

EXTRA-PRO LAMINATES

Keystone Industries now manufactures a triple layered, extra thick (.200) laminated material for mouthguards. Made for optimum protection for athletes like pros, colleges and varsity high school players. Available in solid colors in packages of 12. If you need extra bulk and protection, you might want to try our triple-layered Extra-Pro Laminate.

MOUTHGUARD STRAPS

Keystone Industries offers easy-to-attach helmet straps to be used with Pro-form mouthguards. The strap works great for any sport that has a helmet, such as football, hockey and lacrosse. The strap is especially helpful due to its safety release feature. This allows the mouthguard to break away under less than 12 pounds of pressure.

#9597420	Clear, 25 straps
#9597400	Clear, 12 straps
#9597360	Black, 25 straps
#9597340	Black, 12 straps

BLEACHING LAMINATES

It's become an acceptable dental technique to bleach teeth using carbamide peroxide and a bleaching tray. The Bleaching Laminate is ideally suited for making the bleaching tray and withstanding bleaching products. It is thin, only .020 inches thick once it's formed over the model. It has a foam liner to absorb the bleach, thus decreasing the bleaching time for the patient. The Bleaching Laminate is our best-selling item for bleaching processes.

CE

#9605780	Bleaching Laminates, 50/Pkg

DUAL LAMINATES/E-GASKET

The Pro-form Dual Laminate (E-gasket) is a unique combination of two materials formed into a single laminated sheet. It was made with bruxing cases in mind. The soft liner assures patient comfort and the hard surface assures long-lasting wear. Also, acrylic will bond to the hard surface to allow the dental technician to modify the occlusal surface. Available in 3 different thicknesses: 2, 3 and 5mm.

CE

#9604700	2mm E-Gasket, 12 sheets/Pkg
#9603580	3mm Dual Laminates, 12 sheets/Pkg
#9603605	5mm Dual Laminates, 12 sheets/Pkg

NITEGUARDS

This laminate or layered soft/soft material was made specifically for the making of niteguards. The layering gives the thermoplastic a more abrasion-resistant characteristic that will withstand grinding better than traditional soft sheet materials.

CE

#9602550	Niteguards, 12 sheets/box

BASE PLATE MATERIAL

This Base Plate Material is used for denture base or wax bite plates. Made of pure high-impact styrene, the material melts at a low temperature and is easy to work with. Available in 5" x 5" (12.7 x 12.7 cm) sheets and also in round.

CE

0.040 thickness	#9613510	#9613530

CROWN & BRIDGE MATERIAL

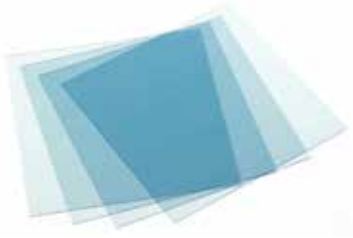
Our Crown & Bridge Material is a thin, clear rigid material that works great for temporary bridges. The material is easy to work with while it does not bond to acrylic. Available in 5" x 5" (12.7 x 12.7 cm) sheets.

CE

#9613680	0.020 thickness, 50/Pkg
#9613700	0.020 thickness, 625/Pkg

RETAINER MATERIAL

This stiff but clear material is ideal for orthodontic retainer. The long-lasting material enables acrylics to stick, but also provides the long-lasting form that retainers need. Available in 5" x 5" (12.7 x 12.7 cm) sheets.



CE

#9614810	Clear 0.030 thickness, 50/Pkg
#9614870	Clear 0.030 thickness, 625/Pkg

#9614816	Super Clear 0.030 thickness, 50/Pkg
#9614875	Super Clear 0.030 thickness, 625/Pkg

PRO-SPLINT MATERIAL

Our new pro split material is a thicker choice for your work in hard and thin splints, surgical trays, retainers, and bleaching trays. It has a less risk of bubbling compared to other splint material due to its thickness, and becomes crystal clear after the heating process is complete.

CE

	25/Pkg	625/Pkg

CE

#9617430 Spacer Foam, 25/Pkg

VACUUM FORMERS

MACHINE III

The Machine III has been a staple in Keystone Industries' long-lasting line of highly-recommended vacuum former machines. The price, features and reliability make it the first choice in dental vacuum formers. The machine has more power than any other dental vacuum former, which results in a more accurate and definite dental thermoplastic appliance.

The aluminum construction is long-lasting, eliminating the possibility of rust. The heating element is symmetrically engineered for even heat distribution throughout the thermoplastic material. Made in the USA.

The Machine III is 8-1/4" w x 14" h and it weighs 19 lbs.

#7000330 Machine III, 110 Volt, UL/cUL/CE marked
#7000332 Machine III, 220 Volt, UL/cUL/CE marked

SINGLE CHAMBERED VACUUM FORMER

The Single Chambered Vacuum Former is an economical answer that can still excellently fabricate most thermo-plastic appliances. The all-aluminum construction eliminates rusting and the heating element is symmetrically engineered for uniform heat distribution. The hexagonal post keeps the frame from rotating or sliding. This vacuum former uses 5" x 5" (12.7 x 12.7 cm) resin sheets. Made in the USA.

The Vacuum Former is 9-3/4" x 8-1/4" x 13-1/2" and it weighs 15.8 lbs.

PROLINE AIR VAC 2000

Don't let the size of this machine misguide you. The powerful pressure unit provides superior adaptation for dental plastics using laboratory or operatory internal air compressors. Because the unit has no motor, it is compact and very quiet. Also, the vacuum pressure from an office compressor is usually greater than the pressure generated from smaller vacuum units. The greater the pressure, the better definition and adherence the dental appliances will have. The Air Vac uses 5" x 5" (12.7 x 12.7 cm) resin sheets or round resin sheets. The Air Vac is 6-3/4" w x 9-1/2" h and weighs 10 lbs. Made in the USA.

#7000470	110 Volt, UL/cUL/CE marked
#7000471	220 Volt, UL/cUL/CE marked

PRO-FORM COMFORT

The Pro-form Comfort is manufactured from high quality materials for a light and compact feel. The energy efficient machine has a vacuum that's powerful and quiet to help speed up the thermoforming process while delivering utmost precision.

The machine raises and lowers the thermo-forming material by an electric motor, eliminated error and maximizing accuracy. Compatible with round and square vacuum forming materials. ***International Sales Only.***

#9617502	220 Volt
#9617503	110 Volt

PRO-FORM DELUXE

The Pro-form Deluxe is manufactured from high quality materials for a light and compact feel. The energy efficient machine has a vacuum that's powerful and quiet to help speed up the thermoforming process while delivering utmost precision.

The programmable machine raises and lowers the material by an electric motor, eliminating error and maximizing accuracy. Pro-form Deluxe's program ability also ensures that each thermoforming sheet is heated to its precise temperature. Compatible with round and square vacuum forming materials.
International Sales Only.

#9617504	220 Volt
#9617505	110 Volt

PRO-FORM SILENT

The Pro-form Silent is the most efficient machine in the Pro-form series. With the same pump as the other machines, the Pro-form Silent manually lowers the thermoplastic laminates. The machine is still made of the same high-quality materials as the Comfort and Deluxe models, such as the sturdy base and the same powerful vacuum. The Pro-form Silent is a basic machine that will get you started in making high quality Pro-form products. Compatible with round and square vacuum forming materials. ***International Sales Only.***

VACUUM FORMER ACCESSORIES

PRESSURE DOME

This new attachment works in conjunction with Keystone Industries' vacuum formers to create a better fitting dental appliance. The dome uses positive pressure during vacuuming allowing for a form-fitting mold of thermoplastics. The Pressure Dome hooks into any existing air compressor lines (needs 80 PSI line pressure with 3/8 line) to provide extra pressure when adapting thermoplastics over an existing model. It will fit over any vacuum unit that makes 5" x 5" (12.7 x 12.7 cm) plastics. Works great for making laminated mouthguards, heavy-duty splints, hard/soft dual laminated splints, Proflex base plates, model duplication, orthodontic retainers and more.

#9594050 Pressure Dome

PRO-FORM CENTRI-FUSE

The demand of athletic mouthguard customization has grown significantly during the past few years. It's not uncommon to see professional athletes showing off their custom mouthguards with personal numbers, team logos or phrases on it. That's why Keystone Industries is thrilled to launch the centri-fuse kit, an innovated product that makes the application of decals to mouthguards quicker, easier and more cost effective.

The typical lamination process for customize mouthguards can become expensive and time consuming, however with centri-fuse, customization has never been easier or more affordable. The centri-fuse system gives the advantage of applying the decal while eliminating the necessity of a second forming.

The adhesive material is applied by using a flameless torch to create superb clarity and excellent adhesion while eliminating bubbles. The material is user friendly and adjustments are made in a matter of a few minutes with conventional tools.

The centri-fuse kit includes everything needed to start up an easy mouthguard customization system.

Kit includes: 20 centri-fuse strips, Flameless Torch, Primer, Brush, Scissors, Trimming and Polishing Brush, Pre-printed Decals.

With this kit, you're able to meet the growing demand of custom mouthguards. The centri-fuse system will let you print anything you want and fuse it to a vacuum formed mouthguard, making it truly a custom mouthguard.

#1009100 centri-fuse Kit
#1009101 centri-fuse Replacement Sheets

PRO-FORM ELECTRIC KNIFE

This is a great little electric knife useful in trimming and cutting a variety of thermoplastic dental materials. The unit has solid state circuitry, an interchangeable handpiece with up to four other replacement handpieces available, 2 outlet stations to accommodate more than one person, all stainless steel construction to resist rusting, and 10 amps of power.

The 10 amps allow you to cut most materials easily and smoothly by providing extra heat at the tip. Excellent for bleaching trays, impression trays, splints, mouthguards and more.

#9144730 Electric Knife, 110V

MICROTORCH

This Microtorch is a 2-in-1 open flame torch and flameless heat tool with a heat shrink attachment. The torch is excellent use to heat materials, ignite materials, pinpoint torch, shrink tubing, solder and desolder, terminate specialty connectors and more.

#1820005 Microtorch

INSTA COOL

Use Insta Cool to immediately chill dental appliances for better adaptation and faster production. Using Insta Cool assures fast, excellent fitting results.

#7000333 Insta Cool, 10 oz. can (283 g)

MOLD RELEASE SPRAY

This Mold Release Spray is and extremely versatile release agent and lubricant. The silicone spray produces a dry anti-stick surface coating, which is particularly suited as a model spray prior to vacuum forming mouthguard or other thermoplastic materials.

#5940310 Mold Release Spray, 11 oz. can (311 g)

BLOCK OUT COMPOUND

This Block Out Compound is used to block out areas of models or can be rolled around a model base for easy periphery trimming. The reusable material will not melt under heat or stick to models, plastics or vacuum formers.

#1570210 Block Out Compound, Black, 1 lb. (453 g)

Z-BUR

The special hollowed, fluted design of Keystone's Z-Bur Diamond Bur is perfect for easy removal of sticky tissue conditioners and pastes commonly used to take denture impressions. The bur also works well in removing most soft liners. Normally messy removal of materials is eliminated with the Z-Bur action set at a medium speed (15,000-25,000 rpm). The slower cutting speed reduces burning and melting of the liner. The hollowed design also reduces the clogging of carbide and minimizes flying debris. Once the liner is removed the final preparation of the hard surface can be performed with carbide of choice.

#1201995	Z-Bur

UTILITY SCISSORS

These All-Purpose Utility Scissors are great for bulk trimming of thermoplastics, especially Pro-form mouthguards. The easy grip handle and stainless steel construction is very handy throughout the lab or office.

#9139720	Utility Scissors

HATHO MINIATURE HANDPIECE SCOTCH BRITE™ BRUSHES

Mounted on mandrel. Same application as Polishing Discs with Scotch Brite™. Available in packs of 12.

#1670016	Coarse, 5,000 rpm
#1670092	Medium, 5,000 rpm
#1670091	Fine, 5,000 rpm

HEAVY DUTY STRAP BOXES

This is an ideal box for a mouthguard with an attached helmet strap. The cases are made of high-density polypropylene with a hinged lid. A slit on the front of the box allows for the mouthguard strap to come out of the box. We provide personal imprinting for this product as well.

#9575615	Black Strap Box	12/Pkg
#9575635	Gray Strap Box	12/Pkg

HIGH GLOSS ORTHO BOXES

High Gloss Ortho Boxes are perfect for storing mouthguards, retainers, bleaching trays and splints. Made of flexible plastic, the box has a hinge design and secure latching system to ensure maximum protection. The box is 3/4-inch (19 mm) deep. Available in packages of 12. Imprinting available, see page 8.

TERMS & POLICIES

PAYMENT OPTIONS:

Open accounts may be established following approval of a completed Credit Application.

Open account invoices are payable 30 days from date of invoice. Past due accounts are subject to finance charge of 1-1/2% per month. Payment may be made by check or C.O.D. Prepayment accounts and accounts awaiting open account status may pay using Visa, Mastercard and American Express. All orders are payable in U.S. dollars. All freight charges are subject to a $25 fee.

ORDERING:

Phone Orders: Monday - Friday, 8:30 AM to 5:30 PM, Eastern Standard Time.

Placing Orders via Fax: +49 77 31 91 21 02 or email: sales@keystoneind.com

Minimum Order: $100.00 for Domestic and $250.00 for International. Orders under minimum amount are subject to a $10.00 handling charge.

Drop Ship Orders: Are subject to a $5.00 fee.

DELIVERY:

Keystone delivers domestic orders via insured ground service carrier. Next Day Air, Second Day Air, and Third Day Select Delivery are available at an additional charge upon request. Hazardous materials are subject to the carrier's handling charge and some items may not be shipped by air.

NOTE: For orders outside the continental U.S., call for shipping rates. Claims for damages or shortages must be made within 7 days of receipt. Damaged shipping cartons must be noted as such when signed for. All carton counts must be checked and signed for by the receiver in order for any discrepancies to be reconciled with the shipper.

RETURN POLICY:

All returns require prior return authorization. Contact our customer service department or your sales representative for return authorization.

The following conditions must be complied with:

- All products must be returned complete with all accessories and instruction sheets, if applicable, in original packaging and in saleable condition.
- A copy of the invoice and reason for the return must accompany all returns.
- Returned products not purchased within the previous sixty (60) days are subject to a minimum 15% restocking charge.

RETURN POLICY cont'd

- No merchandise or equipment may be returned for credit after 120 days of purchase.
- No merchandise or equipment may be returned for credit, regardless of its purchase date, if it is within fifteen (15) months of it's expiration date.
- Used handpieces and equipment may not be returned for credit. Please verify that you have received exactly what you ordered before you use it.
- Defective merchandise will be repaired or replaced in accordance with manufacturer warranties.
- Returns must be sent by a traceable carrier (e.g. UPS).
- Return freight costs are the responsibility of the customer unless the return is due to a Keystone error.
- Returns not following the above policies may be refused or subject to a restocking charge.

CANADIAN RETURN POLICY:

In the event Keystone makes an error filling your order, please contact our customer service department or your sales representative immediately upon receipt of your order to request a pick up for the incorrect items. Keystone will contact our Canadian shipper, UPS to request a pick up and UPS will coordinate the item's return with our Credit/Returns Department. We will issue all credits upon receipt of the parcel according to the return freight charges that result from company errors, so if it is determined that it was not our error, a fee for the return freight will be deducted from the credit amount due the customer.

Items not returnable:

- Hazardous items
- Items that cannot be returned to the vendor (including expired items)
- Special Order Items: Products that we do not ordinarily stock are not returnable.

ALL RETURNS SHOULD BE SENT TO:
KEYSTONE INDUSTRIES
52 West King Street
Myerstown, PA 17067
