REGULATORY COMPLIANCE

Keystone Industries maintains a totally integrated quality management system in full compliance with the US Food and Drug Administration's cGMP regulations governing medical devices (21 CFR 820) and pharmaceuticals (21 CFR 210 & 211) as well as other applicable federal regulations. Keystone also meets the requirements of the European Medical Device Directive and Canadian Medical Device Regulations and is certified through SGS North America, Inc. to EN ISO 13485:2012, governing the requirements for medical devices sold into Europe and ISO 13485:2003 for devices sold into Canada.

In addition, Keystone strives to conform to all applicable regulatory requirements for all products sold into other foreign markets. Keystone Industries has documented procedures governing all quality related activities from the placing of sales and purchase orders, through production, distribution and post distribution monitoring, including continuous risk management and adverse event reporting.

Through an environment of continuous process improvement and our commitment to excellence, Keystone strives to achieve the highest level of regulatory compliance, satisfy our customer requirements and be a leader in the dental products industry.

All SDS's are available on our website for download.

Alert Pouch

An excellent, durable zip-lock delivery ppuch made of heavy-duty 2 ml plastic. The 5" x 8" (12.7 x 20.3 cm) pouch comes with a convenient 1.5 ml pouch system that enables the prescription to stay dry with the casework. Liquid- and air-tight zip-lock.

BAGS MEET ALL OSHA STANDARDS FOR DELIVERY.

#9557520	Alert Pouch	1,000/Pkg

Biohazardous Pouch

This pouch offers the solution for transporting biohazardous material while limiting occupational exposure to potentially infectious materials. The liquid- and air-tight zipper ensures the contents remain in the pouch. The 5" x 8" (12.7 x 20.3 cm) pouch is made of heavy-duty plastic. Biohazard labels are visible to ensure that all handlers are aware of the biohazardous contents.

BAGS MEET ALL OSHA STANDARDS FOR DELIVERY.

#9075450	Biohazardous Pouch	100/Pkg
#9557540	Biohazardous Pouch	1,000/Pkg

Occlusal Surface Protection

Keystone makes fluoride trays for the dental industry. These same trays work great as protective packaging for dentures and partials. Order the large lowers and wrap the occlusal surface of your outgoing cases.

#9525130 Occlusal Surface Protection, 50/Pkg

shipping boxes

Plastic Mailer – Large

Ship away dental work with no worries with this large plastic mailer. The box is perfect for a small articulator and four full models. Made of chemical-tolerant plastic, this box keeps its form during transportation and protects contents. The top closes securely with a unique locking system. Imprinting available, see page 13.

Size: 7-1/2" x 5-1/2" x 4" (19 x 13.9 x 10.1 cm)
Imprint Size: 5" x 1-1/4" (12.7 x 3.1 cm)
Weight: 5-1/2 oz. (.15 kg)

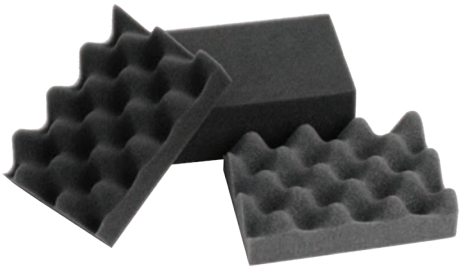
Convoluted Fillers



These Convoluted Fillers give maximum protection to larger dental cases. To maximize protection of appliance or impression, use one filler set per box with a barrier bag. The filler eliminates the need for bubble wrap or tissue.

#9085050	Medium, 2/Pkg 2-7/8" x 1-13/16" x 1-1/4" (7.30 x 4.6 x 3.17 cm)
#9084820	Large, 2/Pkg 4" x 2-3/8" x 1-1/4" (10.16 x 6.03 x 3.17 cm)

Articulator Boxes

A new, reinforced mailer or delivery box for your expensive articulators and fragile casework. These heavy-duty boxes have a removable handle for carrying and reinforced wall thickness for better protection. Each box also includes a dense foam filler set to help further protect your valuable work. Box is 8" x 8" x 8" (20.3 x 20.3 x 20.3 cm).

#9577810 Articulator Box, each

Model Storage Boxes

This is an ideal box for long-term storage of patient models. These boxes are made from double-strength corrugated cardboard to provide maximum protection. Each box has four separate compartments and four identification labels for ideal organization. The boxes are shipped flat to optimize storage space and are easy to assemble. The boxes are 7" x 7" x 2" (17.7 x 17.7 x 5 cm) in size.

#9582740	Model Storage Boxes	25/Pkg
#9582750	Model Storage Boxes	100/Pkg

Shipping Boxes

Get this inexpensive cardboard container for all your dental laboratory's shipping needs. The sturdy 5-1/4" x 5-1/4" x 5" (13.3 x 13.3 x 12.7 cm) box is ideal for a wide variety of appliances for dental labs and dental practices alike. The boxes are shipped flat and are easily assembled. There are 100 boxes per package.

#9090690	Shipping Boxes	100/Pkg

BESTSELLER

Shipping Containers

These small, protective containers are an excellent way to protect valuable models, dentures and more. The heavy-duty plastic containers provide clear viewing of the internal contents, are prepackaged with protective foam fillers, and have a solid locking mechanism to hold the contents. Packaged 100 containers per case.

#20-00110 #2, 1-1/2" x 3/8" (38.1 x 9.5 mm)

Cotton Tipped Applicators

These quality applicators are versatile and add ease of applications. They are made of wooden dowels with a tight 100% cotton bud that minimizes lint and prevents shredding. The soft pliable cotton doesn't damage mucosa and the wooden stem is strong.

#20-00210 3" (76.2 mm) 1,000/Box

Non-Woven Sponges

These Non-Woven Sponges are perfect for general use. The 4-ply, non-sterile sponge is soft, smooth, strong and virtually lint free. The standard sponges are 30-gram weight rayon/polyester blend while the plus size sponges are made from 35-gram weight rayon/polyester blend. The lighter weights provide good absorbency with little adhesion to wounds. These sponges are ideal for sustained patient use, disinfecting and general cleaning.

#10-20010	2" x 2" (50.8 x 50.8 mm)	5,000/Box
#10-20310	4" x 4" (10.1 x 10.1 cm)	2,000/Box

BESTSELLER

Bosworth Flexo® CE 1639

Flexos are latex free flexible hygienic saliva ejectors that will adapt to any mouth. They maintain their shape and do not collapse when bent. The specially designed soft, smooth tips provide patient comfort and will not pull tissue. Their non-clog design and consistent shape retention will ensure a perfect free flowing fit. Available in clear and four bright, translucent colors: blue, green, red, and yellow.

#1662214	Clear with Clear removable tips (100)
#1662213	Rainbow Pack (1000) 200 ea. fixed tips
#1662215	Clear with White fixed tips (100)
#1662216	Blue with White fixed tips (100)
#1662217	Yellow with White fixed tips (100)
#1662218	Green with White fixed tips (100)
#1662219	Red with White fixed tips (100)

Saliva Ejectors

Our Saliva Ejectors are soft and pliable to uniquely contour each patient's mouth and hold shape. The tips are soft and bonded to the tube for maximum patient safety. These ejectors provide optimal suction without aspirating tissue and ensure non-clogging operation.

#12-00110	Clear/Blue Tip	100/Pkg
#12-00210	White/White Tip	100/Pkg

Surgical Aspirator Tips

These Surgical Aspirator Tips have smooth edges for maximum patient comfort. Made of durable, high quality polyethylene, the aspirator tips have a 30-degree angle and fit all high-volume evacuation systems. This item may be used for cheek retraction since the tips do not bend.

#12-01010	Green, 1/4" (6.3 mm) Orifice	25/Pkg
#12-01110	White, 1/8" (3.1 mm) Orifice	25/Pkg

face masks & shields

HB Anti-Fog Face Shield

When working on a patient or in the lab, often times infectious, hazardous or undesirable substances will splatter. The HB Anti-Fog Shield is a lightweight, disposable face shield that provides protection of eyes and face from accidental exposure to hazardous substances. Keystone's HB Anti-Fog Shield offers OSHA-level protection against splash of bodily fluids in the face for medical, dental and emergency medical healthcare workers.

#1983000	Full Face Shield	25/Pkg

needles

Needles

We offer sterile Prehma Disposable Dental Needles that come in short and long sizes. The needle is a sharp tri-bevel point for maximum comfort. The needles have a universal screw-in system that works with an inch-type of metric-type syringes. The plastic hubs are pre-threaded for an easy, straight attachment into the syringe. The needle is siliconized for smooth motion during injection.

procedure accessories

Disposable Air/Water Syringe Tips

These Air/Water Syringe Tips are designed to replace a practice's existing metal autoclavable tips. There is no adapter required. The tips have an inner core water chamber that seats into the syringe, eliminating water contamination and delivers superior air/water spray. No sharp edges which reduces o-ring wear.

Protective Safety Glasses

We offer both clear protective safety glasses and UV Protective Safety Glasses. Both are made of polycarbonate single piece lens construction. The unique spherical design delivers a distortion-free view even in peripheral vision areas. These glasses are secure and have a comfortable fit even when wearing over prescription glasses. These are an economical choice while still providing needed safety precautions. The UV glasses filter more than 99% of UV and dangerous blue light (up to 540nm).

#36-00110	Clear Protective Safety Glasses	EACH
#36-00210	U.V. Protective Safety Glasses	EACH

sterilization products

Sterilization Pouches

These Sterilization Pouches are made with a built-in, lead-free internal indicator. The internal indicator ensures that the correct sterilization temperature is reached inside the pouch, ensuring sterile instruments and tools. This eliminates the need for internal indicator strip inside the pouch. The external indicator will change color when the optimal sterilization temperature is reached. Packaged in boxes of 200.

cad/cam spray

cad/cam scanning spray

One of the newer Enamelite™ sprays available, our CAD/CAM spray was created with detailed accuracy in mind. The spray offers features that other materials aren't able to match, such as covering materials with the thinnest, most uniform and accurate coat. This allows for a more accurate scan, and in turn, a more accurate fit. This has been made possible through Enamelite's patented aerosol packaging technology used across the entire line of dental ceramic sprays, making glazing a fast and easy process.

#5100176 CAD/CAM Scanning Spray, 88g (3.1 oz)

low fusing sprays

low fusing spray features and benefits include:

- Stain and glaze in one firing
- Reduces labor cost, increases efficiency
- Won't puddle at margins
- Glaze multiple thin, uniform, & accurate coats IN SECONDS
- Faster drying than brush-on applications
- Compatible with ALL dental ceramics
- Protected by US & International patents

low fusing spray glaze

Engineered to be compatible with all porcelain systems, Enamelite™ Low Fusing Ceramic Spray Glaze is formulated to increase efficiency and productivity by allowing technicians to stain, add-on contacts and glaze in a single bake. The Spray Glaze can be applied to single or multiple units in less than 10 seconds to one or multiple units without distorting characterization stains or anatomical details.

#5100179 Low Fusing Spray Glaze, Medium 111g (3.9 oz)
#5100180 Low Fusing Spray Glaze, Small 46g (1.6 oz)

fluorescent low fusing spray glaze

In addition to the regular Enamelite™ Low Fusing Spray, we also offer the Enamelite Fluorescent Low Fusing Ceramic Spray Glaze, which is used with non-fluorescing dental materials. This spray guarantees shade matching under natural and artificial light for non-fluorescing dental materials such as zirconia, lithium-disilicate, and lithium-silicate restorations.

#5100181 Fluorescent Low Fusing Spray Glaze, 46g (1.6 oz)

Enamelite Spray Glaze - The Ultimate in Technique and Results

By Dennis Urban CDT

Dental laboratories and dentists are always looking for ways to cut the time factor in glazing restorations. With Enamelite, the innovative and effective spray glaze system from Keystone Industries, both laboratories and dental practices can achieve the highest quality glazing results in just minutes.

Enamelite can produce excellent results in just one firing. Even with conventional staining techniques, Enamelite can be sprayed over the restoration and fired and the final result is a restoration that yields to superior aesthetics.

Enamelite can be used on any dental ceramic material including PFM's, all ceramic restorations, full contoured zirconia, e.Max, layered zirconia, layered e.Max and even all on 4 and all on 6 types of fixed cases. Even zirconia bridges! The time factor in the application of the glaze is greatly reduced and takes virtually seconds instead of minutes.

Advantages for the patient are ultimate aesthetics and plaque resistance. Enamelite also produces a surface luster comparable to natural tooth surfaces. The purpose of glazing is to seal the surface structure of porcelain restorations. Inefficient glazing can lead to the wear of opposing dentition and the increase of plaque. This increases with porcelain against porcelain restorations which are not glazed efficiently and correctly with the right glaze. Because of the even spraying capabilities of Enamelite, the same effective result can be produced again and again.

With Enamelite Fluorescent Low Fusing Ceramic Spray Glaze, you can now achieve more natural aesthetics on all restorations in any lighting condition especially with monochromatic and monolithic restorations. Enamelite Fluorescent Low Fusing Ceramic Spray Glaze produces the results that nature intended on value, hue and chroma. These three categories of color puts forth a natural look to any fixed restoration.

Some of the feature and benefits on Enamelite are:

Features
- Patented aerosol packaging technology
- Easy aerosol delivery system
- For all types of restorations
- Consistency
- Speedy application
- Learning curve is minimal
- Faster drying
- Multiple units can be glazed in one firing

Benefits
- Consistent results
- Elimination of glaze liquids
- Smooth surface results
- Better translucency
- Can be sprayed over porcelain stains
- No risk of cross contamination

The application technique takes seconds:
- Sand blast restoration
- Stain restoration if desired
- Shake can well
- Spray 2 to 4 inches from restoration
- Spray short bursts
- Fire

Remember to spray multiple units simultaneously on a pillow tray and always shake can between sprays.

Simple, easy, and effective the Enamelite Fluorescent Low Fusing Ceramic Spray Glaze System will save time, money and achieve patient satisfaction with all types of restorations.

abrasives

Green Mounted Stones

I-3 I-5 I-9 F2 P2

T1 T4 W3 W6

Made from finest quality silicon carbide grit, these Green Mounted Stones are fast and cool cutting. This economical choice has excellent durability and 12 popular shapes. These Green Mounted Stones are guaranteed to meet your porcelain, composite, gold and silver finishing requirements. 3/32" Shank (23.8 mm). 12/Box.

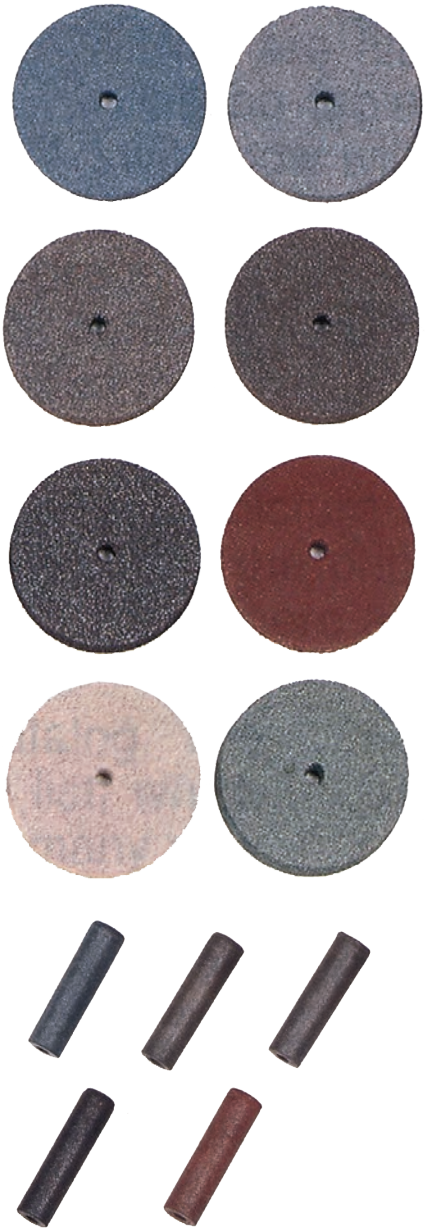
Superior Rubber Polishing Wheels & Clasp Polishers



Polishing Wheels are 7/8" x 1/8" (22.2 x 3.1 mm)
Clasp Polishers are 15/16" x 1/4"(23.8 x 6.3 mm)
Packaged in boxes of 100.

SUPERIOR REGULAR – An industry standard for years. Pure fine silicon carbide abrasive in a synthetic rubber binder combines an excellent finish on chrome with long wear. Also popular for polishing gold. Dark grey color. 240 grit.

#1900550 Wheel #1640010 Clasp

SUPERIOR HARD – Same quality as SUPERIOR REGULAR only harder. Provides exceptionally long wear on chrome. Dark gray in color. 240 grit.

#1900560 Wheel #1640020 Clasp

SUPERIOR MEDIUM SOFT – Pure medium grit silicon carbide abrasive in a flexible rubber binder for fast scratch-free finishing of chrome. Light grey in color. 150 grit.

#1900540 Wheel

SUPERIOR BLUE FLEX – Softer and more flexible than the “Blue Gloss”. This wheel is made with a new rubber binder containing a highly friable pure fine silicon carbide abrasive. Made for both chrome and noble metals. 220 grit.

#1900795 Wheel

SUPERIOR BLUE – The popular “Blue Gloss” wheel improved with new polishing additives. Contains pure fine treated silicon carbide abrasive in a unique cushioned binder. Provides a lustrous finish on chrome, semi-precious and precious metals. 220 grit.

#1900810 Wheel #1640070 Clasp

SUPERIOR GREEN – An “All Purpose” polishing wheel for all metals. Pure medium fine silicon carbide abrasive in a premium flexible rubber bond provides fast high quality finishing. Quickly becoming an industry favorite. 180 grit.

#1900805 Wheel #1640060 Clasp

SUPERIOR BLACK – Developed for fast chrome finishing, this harder but still flexible premium rubber bond with pure medium coarse silicon carbide, combines excellent finish and wear qualities. Very popular with chrome labs. 150 grit.

#1900800 Wheel #1640050 Clasp

SUPERIOR RED – A specially formulated resilient binder combined with carefully graded pure fine silicon carbide abrasive provides a high quality lustrous finish on precious and non-precious metals. More flexible and not too aggressive, it is a favorite for finishing precious alloys. 240 grit.

#1900815 Wheel #1640080 Clasp

SUPERIOR HARD RED – Same quality as SUPERIOR RED only harder. Provides exceptionally long wear on precious and non-precious alloys. 240 grit.

#1900816 Wheel #1640081 Clasp

SUPERIOR WHITE – Non-contaminating for use on ceramic gold and porcelain. Specially formulated with pure fine aluminum oxide abrasive in a cushioned binder to provide a polished finish to porcelain. 220 grit.

#1900820 Wheel

SUPERIOR GREEN UTILITY – Pure coarse silicon carbide abrasive in a highly flexible binder for fast, effective polishing on gold, porcelain and acrylic. 90 grit.

#1900580 Wheel

Deluxe Silicone Points & Wheels

Sold in boxes of 100.
Black for all metals. Medium grit.
White for all metals, amalgam, porcelain & composites. Coarse grit.
Blue for final polishing of porcelain or metals. Fine grit.
Pink for porcelain. X-fine grit.

#1900600	5/8" dia. (15.8 mm)	500/Box

Point & Wheel Truer

This stone facilitates speedy truing of points and wheels. Perfect for laboratories which need to quickly true abrasives. Quickly and easily reshapes and dresses mounted points. Sold individually.

#1830010 Point & Wheel Truer

Roughing Disc

This is the 1-1/4" x .085" (31.8 x 2.2mm) Roughing Disc. It's made of a pure, coarse aluminum oxide abrasive in a heavy-duty, non-contaminating body. The disc provides exceptionally fast metal removal when cutting or grinding. The disc runs free and cool cutting on all metal alloys. 50/Box.

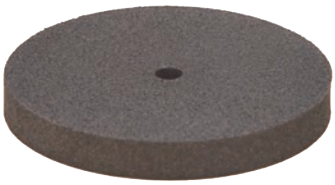
#1300425 1-1/4" x .085" (31.8 x 2.2 mm)

Red Engine Wheels

These Red Engine Wheels are made of aluminum oxide grit for chrome and gold work. The wheels come in square edge and knife edge in 7/8" diameter or 5/8" diameters. 12/Pkg.

#1900380 7/8" x 1/8" S.E. (22.2 x 3.1 mm)
#1900420 5/8" K.E. (15.8 mm)

Rubber Acrylic & Baseplate Wheel



The Rubber Acrylic and Baseplate Wheel is a coarse grit, rubber bonded wheel. The wheel is excellent for grinding acrylic at normal lathe speed and for baseplates at low speed. Sold individually.

#1900050 3" x 3/8" (76 x 9.5 mm)

Red Grinding Wheel

This Red Grinding Wheel is specially manufactured for the fine polishing of all metals. These wheels are sold individually but are long-lasting.

#1300176 3" x 3/8" x 1/4" (76 x 9.5 x 6.35 mm)

Green Grinding Wheels

These Green Grinding Wheels are specially suited for grinding porcelain teeth. The long-lasting discs will not wear or chip porcelain. The wheels have 1/4" lead reinforced center hole and comes in 120 grit. Sold individually.

#1900030 3" x 1/4" (76 x 6.35 mm)

White Acrylic Knock-Down Wheels

These White Acrylic Knock-down Wheels are developed for trimming base plates, acrylic, and stone models. The aluminum oxide grit facilitates rapid shaping with minimum pressure. The wheels generate little heat and will not clog. Sold individually.

#1900090 4" x 1/2" (101 x 12.7 mm)
#1900080 3" x 3/8" (76 x 9.5 mm)

Black Utility Grinding Wheel

The Black Utility Grinding Wheel is excellent for trimming denture base plate materials, stone models and acrylics. The top-grade wheel delivers rapid cutting and will not clog at low speeds. The wheel has a 1/4" lead reinforced center hole. Comes in 46-60 grit. Sold individually.

#1900060 3" x 1/4" (76 x 6.35 mm)

Red Flash Disc

The Red Flash Disc is the most popular and finest disc available from Keystone Industries. The cut-off wheel quality is strong, fast and free cutting on all chrome, precious and semi-precious alloys. Made of aluminum oxide, the disc can withstand up to 25,000 rpm. 100/Box.

#1300430 15/16" x 0.025" (23.8 x 0.63 mm)

Ultra-flex Disc

The Ultra-flex Disc is the thinnest disc available to the crown and bridge craftsman. This disc is two-thirds as thin as and more flexible than the Ultra-thin Disc, supplementing the Ultra-thin where maximum thinness is required. These are excellent for interproximals and margins. Made of silicon carbide, the gray color discs work best between 10,000 and 12,000 rpm. 25/Box.

#1300475 7/8" x 0.006" (22.2 x 0.15 mm)

Veri-thin® Disc

These Veri-thin Discs are much thinner than the regular Joe Dandy Discs, but still maintains the strength and fast, cool cutting qualities. These discs, made of silicon carbide, are especially suited for cutting and finishing porcelain and gold. Ideal speeds for the discs are between 10,000 and 12,000 rpm. 50/Box.

#1300450 7/8" x 0.015" (22.2 x 0.38 mm)
#1300440 3/4" x 0.015" (19 x 0.38 mm)

Ultra-thin® Disc

Ultra-thin Abrasive Discs have the exceptional combination of thinness, strength and cutting qualities, which have made them an indispensable industry standard. These abrasives are used for fine cutting and finishing on porcelain interproximals and margins. The pure fine silicon carbide abrasive is a unique formulation that will not discolor porcelain. Best used between 10,000 and 12,000 rpm. 25/Box.

#1300470 7/8" x 0.009" (22.2 x 0.23 mm)

Dura-thin® Disc

These Dura-thin Discs are the ultimate, non-contaminating companion to the Ultra-thin Discs. Made of fine aluminum oxide abrasive is specially formulated for fine cutting and finishing of ceramic metals. Ideal speeds for the discs are between 10,000 and 12,000 rpm. 25/Box.

#1300460 7/8" x 0.010" (22.2 x 0.25 mm)

Cut-off Wheels

These strong Cut-off Wheels are long lasting and fast cutting. The wheels can be used on chrome cobalt and other non-precious metals. 100/Box.

#1300650 1-3/8" x 0.027" (35 x 0.7 mm)
#1300660 1" x 0.027" (25 x 0.7 mm)

Joe Dandy Type Discs

The Joe Dandy Type Discs are made of pure rubber-bonded silicon carbide abrasive in a special binder. The discs are 0.023" (0.6 mm) thick. They are used for fast, cool cutting and finishing on porcelain, acrylic, gold, alloys and other materials. 100/Box.

#1300180 1/2" (12.7 mm) Flat Double Cutting
#1300380 1/2" (12.7 mm) Cup Inside Cutting
#1300190 5/8" (15.8 mm) Flat Double Cutting
#1300200 3/4" (19 mm) Flat Double Cutting
#1300250 3/4" (19 mm) Flat Safe-Sided
#1300210 7/8" (22.2 mm) Flat Double Cutting
#1300260 7/8" (22.2 mm) Flat Safe-Sided
#1300310 7/8" (22.2 mm) Cup Double Cutting
#1300220 1" (23.8 mm) Flat Double Cutting

Keystone Cut-off Wheels

These Cut-off Wheels are strong and durable. Made with pure aluminum oxide provides non-contaminating fast free cutting of all metals. The wheels come in a reddish-brown color and have a max of 25,000 rpm. 100/Box.

#1900320 Thick, 1-1/4" dia. x 0.062" (31.8 x 1.6 mm)
#1900310 Medium, 1-1/2" dia. x 0.040" (38.2 x 1.1 mm)
#1900300 Thin, 1-1/2" dia. x 0.025" (38.2 x 0.63 mm)

Brown High Speed Disc

This Brown High Speed Disc is for those who favor the long-time standard for chrome and gold. Made of aluminum oxide. 100/Box.

#1300170 15/16" x 0.025" (0.94 x 0.63 mm)

Roughing Discs

These Roughing Discs are made of a pure, coarse aluminum oxide abrasive in a heavy-duty, non-contaminating bond. The disc provides exceptional fast metal removal when cutting or grinding. The disc runs free and cool cutting on all metal alloys.

#1300680 1-1/4" x 0.086" (32 x 2.2 mm)

Porcelain Finishing Discs

These Porcelain Finishing Discs are a fine quality abrasive paper discs perfect for finishing gold and porcelain. The discs are made of silicon carbide-like sandpaper. 500/Box.

#1300140	Coarse	80 grit	7/8" (22.2 mm)

3/4" (19 mm) 3/32" shank	#1520035	#1502515

Field Abrasive Rolls

Field "Strong Stitch" Abrasive Rolls are available in various coarsenesses. The abrasive rolls are used for finishing and polishing. 100/Box.

#1720010	#3, 60 grit (1/2" dia x 3/4" ht x 5/32" hole)
#1720050	#4, 60 grit (1/2" dia x 1" ht x 5/32" hole)
#1720105	#4, 80 grit (1/2" dia x 1" ht x 5/32" hole)
#1720070	#5, 60 grit (3/4" dia x 1" ht x 5/16" hole)
#1720090	#6, 60 grit (13/16" dia x 1" ht x 7/16" hole)
#1720095	#6, 80 grit (13/16" dia x 1" ht x 7/16" hole)

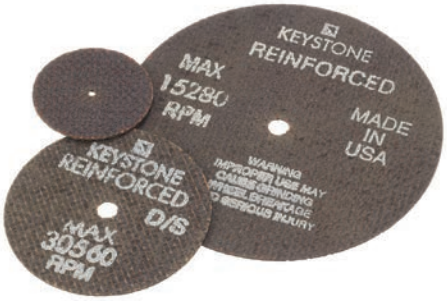
Field Roll Mandrels

3 4 6

Field Roll Mandrels are long lasting and durable. Sold individually.

#1730020	No. 3 Roll	1/4" shank (6.3 mm)
#1730040	No. 4 Roll	1/4" shank (6.3 mm)
#1730060	No. 6 Roll	1/4" shank (6.3 mm)

Econo Cutters



These Econo Cutters are a great combination of economical and performance. The .035 thick cutters are thin but still strong enough to get the job done. Sold individually.

#1300490	1-1/2" dia. (38.1 mm)	Max 40,745 RPM
#1300480	2-1/2" dia. (63.5 mm)	Max 30,560 RPM
#1300500	4" dia. (101.6 mm)	Max 15,280 RPM

Econo Cutter Mandrel

These Econo Cutter Mandrels are special mandrels required for 2-1/2" (63.5 mm) diameter and 4" (101.6 mm) diameter econo cutters. Sold individually.

#1300510 Econo Cutter Mandrel

Carbo Model Trimmer Wheels

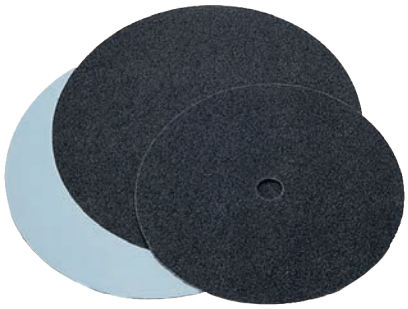
Keystone Carborundum Model Trimmer Wheels are reversible and available in two sizes. These discs are compatible with most common untis such as to Handler, Torit, Buffalo, Foster and Tooth Master. Sold individually.

For Handler, Torit, Buffalo, Foster and Tooth Master units. Coarse, 1 hole
#1900620 10" x 1/4" x 1" (25.4 x .6 x 2.5 cm)

Coarse, 1 hole
#1900630 12" x 1/4" x 1" (30.5 x .6 x 2.5 cm)

Coarse wheel for Foster unit only, 2 hole
#1900635 12" x 1/4" x 1" (30.4 x .6 x 2.5 cm)

Waterproof Model Trimmer Discs



These superior quality coated abrasive discs will cut models three to four times faster than most discs. These Waterproof Model Trimmer Discs reduce noise by 75% and are available in two sizes.

Complete set, backing wheel and washer, 6 discs
#1900640 10" (25.4 cm)

Refill, 25/Pkg
#1900695 12" (30.4 cm)

Mizzy Heatless Wheels

Heatless Original Wheels (grey) are made of a silicone carbide abrasive to make a unique, non-loading binder for rapid reduction through the final shaping of non-precious, semi-precious, precious alloys, porcelain, acrylic, denture teeth and natural dentition, without generating excessive heat. These wheels come in 15 different sizes and in regular grit. They also withstand a maximum of 20,000 rpm.

The White Heatless Wheels are non-contaminating, aluminum oxide wheels that can be used on either porcelain or precious and semi-precious metal. They cut fast, run true, wear evenly, and won't ever clog. They also come in 15 different sizes. Sold 50/Box.

		REGULAR	WHITE

Mizzy Red Heatless Wheels

The Red Heatless Wheels have a ceramic-coated abrasive grain that ensures a smooth, free cutting wheel at the coolest temperatures. This is due to the unusual micro-chipping action of the crystals as they wear. The wheels are made of non-contaminating pure alpha aluminum oxide hexagonal crystals with a tough ceramic coating. Great for use on all non-precious and semi-precious metals, porcelains, cercons and lava – there's no need to change back to a silicon carbide wheel. The wheels are long lasting and exhibit excellent uniform wear and are available in the most popular Mizzy sizes. Sold 50/Box.

#6131600	Size 1, 3/16" x 1" (4.8 x 25.4 mm)
#6131603	Size 3, 3/32" x 1" (4.8 x 25.4 mm)
#6131605	Size 5, 1/8" x 7/8" (3.1 x 22.2 mm)
#6131608	Size 8, 1/8" x 3/4" (3.1 x 19 mm)

Key-flex Discs

Key-flex Discs are made of stainless steel with diamond particles. Easy, smooth cutting discs that last a long time. Available in three different sizes: Key-flex Discs, Key-flex Super, Key-flex Micro. Sold individually.

0.3mm thick, 7/8" (2.22 cm) diameter
#1290500 Key-Flex Thin

0.3mm thick, 7/8" diameter Double-sided 1/8" (.32 cm) abrasive band
#1290510 Key-Flex Super

0.2mm thick, 7/8" diameter Double-sided 1/8" (.32 cm) abrasive band
#1290520 Key-Flex Micro

NEW! Clearmet

Clearmet is a revolutionary new clear thermoplastic resin specifically designed for durability and biocompatibility. The thermoplastic microcrystalline transparent polyamide material is intended for use in an injection molding process. Unlike conventional metal partials, Clearmet is an ultra- transparent framework. And unlike other clear partial resin, Clearmet requires little to no polishing. Patients can now enjoy a lightweight partial without a metal taste or undesirable metal clasps showing on their teeth. No one will ever know a partial denture restoration is being worn.

#1009225 Small: 5 tubes/package, 1.77" (25.5mm x 45mm)
#1009227 Medium: 5 tubes/package, 3.03" (25.5mm x 77mm)

WATCH THE TECHNIQUE VIDEO!

Dentists love Clearmet. Your dental lab will too.

VS.

Some unique Clearmet features include:

- Frame is invisible in the mouth
- Stain resistant, odor-free material
- Clasps are adjustable with a warm three-prong plier, making it easy to adjust chairside
- Can be relined and repaired in saddle areas
- Clasps are tooth bearing, not tissue bearing
- 90% into undercut creates excellent retention

"I can tell you without any reservations that this material is by far the best, most comfortable, lightest partial denture material I have ever used. The patient response has been outstanding, and I'm positive I'll never go back to any other material."

- Dr. Louis Trovato
Hatboro, PA

Diamond D® Acrylic

High Impact Acrylic

Advanced natural-looking dentures require artistry as well as technical expertise. Diamond D® was specially formulated for exceptional working and handling characteristics for anatomic sculpting. This revolutionary resin has just the right translucency and color variations found in natural tissue as well as high impact and flexural strength. The demand for function and aesthetics in dental fabrication is growing. Diamond D® can help you take your business to a new level. Does not contain gluten.

Diamond D Heat Cure Acrylic is certified as Class IIa in Europe and is approved for permanent prosthetic use with implants.

Sledgehammer Acrylic CE

Sledgehammer Heat Cure is a high impact, cross-linked, color stable denture base with excellent working properties. It's compatible with most injection systems. Available in 4 aesthetics, cadmium free shades with matching repair, pour and microwavable materials. Can be used with Sledgehammer 20 Minute Monomer for shortened cure time. Does not contain gluten.

Sledgehammer Self Cure is easy to mix, cross-linked, non-slumping formula that matches all Sledgehammer shades as well as other leading brands. Great bond strength makes it perfect for relines and repairs using the salt and pepper or dough technique. A high quality, cadmium free acrylic offered at a significant savings.

BESTSELLER

Bosworth Trim® and Trim® II CE

PEMA Temporary Resin Acrylic

Trim and Trim II are fast-setting, non-irritating PEMA temporary resin acrylic crown and bridge materials formulated for extended use. The powder and liquid in each kit are identical in formula and the powders can be mixed to obtain specialty colors. The resin is dimensionally stable, will not distort when withdrawn from undercuts while setting and is suitable for use as a bite registration material. Trim is available in two shades (light and dark). Trim II is available in six shades for greater diversity in achieving the perfect shade match for patients.

Recommended for use with: Glaze™, Masque™ and Pressure Pot. Bulk packaging available.

Mixing Ratio: 6.3 g of powder to 3 ml of liquid. This amount would make 9 full jacket crowns. I Working time: 3-4 minutes.

Tips: Order Trim VW (Very White) powder in addition to the standard kit to produce a temporary as white as bleached teeth.

Note: Trim and Trim II cannot be mixed with Trim Plus materials.

Versacryl CE

Thermo-soft Adjustable Reline

WATCH THE TECHNIQUE VIDEO!

This unique product has been developed to create thermo-adjustable relines. Imagine having the luxury to simply heat a denture and re-adjust the fit in seconds and if it's not satisfactory the procedure can be repeated anytime by the dentist, the technician or even the patient themselves.

The Versacryl Reline is not a regular "soft reline" material. It is a heat sensitive liner that softens in warm water between 120˚F - 205˚F. At body temperature the Versacryl has an extremely comfortable cushiony effect that yields to pressure and actually creates better suction than conventional soft liners.

Versacryl is a cross-linked acrylic denture material guaranteed to create a chemical bond with all other denture acrylics. Versacryl is available in Heat Cure or Self Cure and no special equipment is needed to process.

LAB KIT INCLUDES:
2 x 50 g Powder (clear and pink veined)
1 x 60 ml Hardener Monomer Liquid
1 x 60 ml Softener Monomer Liquid
2 measuring cups, eye dropper and instructions

BESTSELLER

Bosworth Dentusil™ CE

Silicone Soft Reline Material

DentuSil™ is a chairside soft silicone relining material which combines the ease of cartridge dispensing with the flexibility and resilience of a silicone soft reline material to provide denture patients with a comfortable, reliable reline in just one office visit. DentuSil™'s silicone base absorbs less water, making the reline more resistant to stains and odors. Its translucent pink color provides a natural, healthy appearance. Adhesive is specially formulated to hold material in place, providing a secure reline in just minutes. Contains 10 applications. DentuSil lasts in the mouth for approximately one year and has a shelf life of two years. Easily cleaned with a soft brush.

Tips: DentuSil contains no monomer and is perfect for use on patients with sensitivity to acrylics. DentuSil can be used to cushion dentures as overdentures heal. Use DentuSil in the dental laboratory by placing the denture on the patient's model in the dental flask. Do not use with condensation reaction type silicone materials or adhesive.

Recommended for use with: E-Z Squeeze™ Universal Dispenser and Static Mixing Tips for 5 inch cartridges.

#0921276	**Standard Kit** 50ml Cartridge, Mixing Tips, 10ml Liquid Adhesive, 10ml Silicone Release, Applicator Brushes
#0921278	Dentusil Adhesive (10ml)

Bosworth New Truliner® CE

PEMA Denture Corrective Relining Material

New Truliner is a PEMA denture corrective relining material. New Truliner's advanced formula reduces stinging and burning sensation which allows for a restoration on a denture's original fit in as little as 5 minutes. Color stability and a high density surface guarantee greater patient satisfaction. New Truliner chemically fuses to the denture in 15-20 minutes and is formulated to last up to a year. Once cured, rebased surfaces can be trimmed and polished like the original denture without showing a line of demarcation.

Mixing Ratio: 7.6 ml liquid (1 full glass vial) to 15 ml powder (1 full plastic vial).
Tips: Before making a permanent denture reline, treat the tissue with a tissue conditioner such as Softone to eliminate the possibility of the final corrective reline duplicating the disturbed or deformed mucosa caused by the deficient denture.

Note: New Truliner liquid and powder is NOT interchangeable with Original Truliner liquid and powder. New Truliner is a PEMA formula and Original Truliner is a PMMA formula.

Recommended for use with: Cora-Caine®, Glaze™, Masque™, and Pressure Pot

Standard Kit: 8 oz. (227g) Powder, 6 oz. (177 ml) Liquid,
1/3 oz. (10 ml) Bonding Liquid

#0921976 6 oz (177 ml) Liquid
#0921983 1/3 oz (10 ml) Bonding Liquid

Bosworth Original Truliner® CE

PMMA Denture Corrective Relining Material

Original Truliner is a PMMA color stable, permanent reline material formulated for extended life (3-5 years). The extremely fine-milled powder cures to a dense consistency and prevents the reline from assuming odors, tastes, or stains. Original Truliner is a unique reverse curing acrylic (cures from the inside out) which releases the free monomer before it is inserted in the mouth, eliminating chemical and thermal sensitivity and forming a permanent bond in as little as ten minutes that will not chip or discolor. Can also be used for repairs and orthodontic appliances.

Mixing Ratio: 7.6 ml liquid (1 full glass vial) to 15 ml powder (1 full plastic vial).
Tips: Before making a permanent denture reline, treat the tissue with a tissue conditioner such as Bosworth Softone to eliminate the possibility of the final corrective reline duplicating the disturbed or deformed mucosa caused by the deficient denture.

Note: New Truliner liquid and powder is NOT interchangeable with Original Truliner liquid and powder. New Truliner is a PEMA formula and Original Truliner is a PMMA formula.

Recommended for use with: Cora-Caine®, Glaze™, Masque™, and Pressure Pot

#0921946 6 oz (177 ml) Liquid

Bosworth Trusoft™ CE

PEMA Denture Acrylic Relining Material

Trusoft is a plasticized acrylic PEMA that is specifically designed as an intermediate liner for patients requiring a prolonged adjustment period prior to using a hard liner or denture base material (Softone is for shorter adjustment periods). Its elasticity will ensure against pressure pain, tender ridges, sensitive areas, and irritated tuberosities. Trusoft is formulated to remain resilient for up to 30 days. Can be used for every patient as a precautionary measure but is especially necessary for patients who are slow to heal or sensitive to wearing a new denture. Patient is ready for a permanent reline (New or Original Truliner) when he or she can exhibit control and acceptance with Trusoft.

Mixing Ratio: 6.8 ml (glass vial) to 9 g (plastic vial) powder. I Tips: Trusoft can be used in between tissue treatments with Softone.

Recommended for use with: CoraCaine® and Masque™

Standard Kit: 3 oz. (85 g) Powder, 4 oz. (118 ml Liquid, 1/3 oz. (10 ml) Bonding Liquid

Bosworth Light Liner CE

Light-Cure Chairside Reline Composite

Light Liner is a chairside reline material that light cures in minutes. Available in a soft or hard non-methyl methacrylate formula, this microfilled composite flows easily and offers the convenience of a one visit procedure without multiple pour-ups or impressions. Accurate relines and quality repairs are achieved in minutes at a fraction of the cost of sending it to the lab. Light Liner is a dual-cure, self-bonding material that will not shrink, resists staining, and is color stable. Light Liner is virtually as strong as the denture, chemically bonding to it to prevent flaking or peeling. FOR DENTURE RELINING ONLY.

Recommended for use with: Cora-Caine® and Masque™ I Bulk packaging available.

Standard Kit: 8 - 6g Composite Powder, 8 -4 Composite Liquid, 30cc Air Barrier

#0921463 Standard Kit, Hard
#0921464 Standard Kit, Soft

Bosworth TruRepair® CE

Fast Bonding Acrylic Repair Material

TruRepair is a fast-bonding acrylic repair material for repairing fractured dentures, replacing broken or dislodged denture teeth, and any additional office or lab emergency. A special internally-pigmented spherical globe of powder blends with denture base materials to produce a color-stable match. TruRepair liquid is cross-linked.

Mixing Ratio: 2-3 parts powder to 1 part liquid.
Recommended for use with: Pressure Pot and Masque™

Standard Kit: 2- 3 oz. (85 g) Powders, 4 oz. (118 ml) Liquid
#092160 Standard Kit, 1- 3 oz. Vein & 1- 3 oz. Pink
#092160C Standard Kit, 2- 3 oz. Clear
#092160P Standard Kit, 2- 3 oz. Pink
#092160V Standard Kit, 2- 3 oz. Vein

COMPONENTS
#092161 3 oz. (85 g) Powder, Pink
#092162 3 oz. (85 g) Powder, Vein
#092163 3 oz. (85 g) Powder, Clear
#092164 4 oz. (118 ml) Liquid

Bosworth Glaze™ CE

Self Cure Resin Polish

Glaze is a fast-setting, self-cure resin which reduces polishing time and dries to a clear, hard surface with a high gloss finish. Glaze can be brushed onto a clean composite or acrylic material to achieve a polished surface that enhances the appliance and reduces the need for additional polishing. Recommended for use on provisional, reline, and orthodontic appliances. Glaze fills microscopic voids and reduces bacterial growth. Sets in 20 seconds.

Standard Kit: 12cc Glaze, 12cc Glaze Solvent

#0921236 Standard Kit

BEST SELLER

Bosworth Softone™ CE

Tissue Conditioner

Softone is a resilient acrylic denture tissue conditioner and functional impression material that conditions, massages, and rehabilitates damaged tissue. Softone's unique flow and natural give stimulate the natural healing process and restores tissue to a sound physiological state. Softone has a clean, refreshing taste that will not absorb odors for greater patient comfort and compliance. Softone allows the denture to stay in the mouth throughout the treatment process. For patients requiring a temporary soft reline or prolonged adjustment period before the permanent hard reline, use Bosworth Trusoft.

Mixing Ratio = 6.8 ml (1 glass vial) to 9.0 g (1 plastic vial) of powder.
Tips: Upper and lower arches can be treated at the same appointment as long as the dentist treats each denture separately. Softone will trim easier if using a heated knife to seal material and reduce peeling. Softone reline may be cleaned by rinsing with a mild, alcohol-free cleaner or by brushing with a soft toothbrush and a mild non-abrasive toothpaste. Polishing may be expedited by first chilling denture in refrigerator or ice water. Softone is a temporary impression material formulated to last up to 4 days in the mouth.

Recommended for use with: TAC™

Reline Bond

Reline Bond forms a positive and lasting fusion between old denture material and the added new material. It eliminates unsightly white or bleaching lines which often appear on relines. Available in a 4 oz. (118.3 ml) can.

#1011355 Reline Bond

articulators

Apex #2 Articulators

The Apex #2 Articulators have a higher arch than the K-Chrome Articulator, but still provides maximum accuracy. Allows for easy and accurate work on dental work.

#1050000 Apex #2 Chrome Articulator
#1050005 Apex #2 Bronze Articulator

Crown & Bridge K-Chrome Articulator

The Keystone Crown & Bridge K-Chrome Articulator is specifically engineered for crown and bridgework. It's easy to adjust and easy to separate parts. These articulators are machined for quality and accuracy.

#1050140 C&B K-Chrome Articulator

Plastic C&B Disposable Articulator

The Precision Articulator is great for transferring mounted cases between the same articulator without the loss of accuracy. The incisal tables can unscrew and be easily replaced. The articulator has smooth lateral and protrusive movements. There's an anterior leg for easy viewing.

#1050165 Plastic C&B Disposable Articulator

Spring Chrome Articulator

A spring-loaded articulator for crown and bridgework. Reversible top permits two heights. Also allows for protrusive and retrusive lateral movements.

#1050080 Spring Chrome Articulator

Deluxe Articulator

The Keystone Deluxe Articulator is excellent for sending important cases between labs and the doctors. The articulator is lightweight, Teflon-coated and made with very accurate, interchangeable mouths. The item has a full range of movements, including lateral excursions. This is a high-quality articulator is set at a low, economical price.

#1050095 Deluxe Articulator
#1050141 Screw and Nut
#1050096 Articulator Pins, 10/Pkg

Deluxe Magnetic Articulator

The Deluxe Magnetic Articular comes with magnetic split casting to ensure easy removal and exact settings of models. This articulator is excellent for checking cases. It's completely interchangeable, lightweight and Teflon coated.

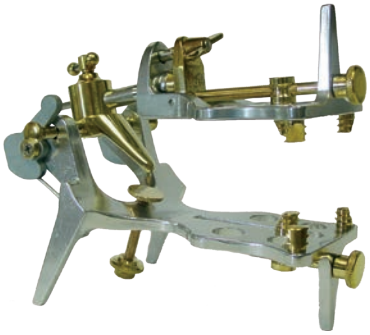
#1050075 Deluxe Magnetic Articulator
#1050076 Magnets, 4/Pkg
#1050077 Curved Disc, each
#1050141 Screw and Nut
#1050096 Articulator Pins, 10/Pkg

Deluxe Magnetic Articulator with Pin

The Deluxe Magnetic Articulator with Pin is an excellent articulator for denture work. This item has the same advantages as the Deluxe Magnetic Articulator, but it has incisal pins for the use with denture production.

#1050074	Deluxe Magnetic Articulator
#1050076	Magnets, 4/Pkg
#1050077	Curved Disc, each
#1050141	Screw and Nut
#1050096	Articulator Pins, 10/Pkg

Galetti Articulator



The Galetti Articulator is solidly constructed of metal alloy casting. The high quality articular provides easy, speedy and firm grasps of models of any size. This item has perfect occlusal-articulator balance to prevent cuspidal interferences and maintains a balanced prosthetic appliance.

The Galetti Articulator allows for easy separation of upper and lower components to form two different stable working bases. The ball bearing joint allows for free motion of the upper appliance to check the occlusal-articulator balance. The hinge axis with bilateral motion gives the capability for anterior, posterior and lateral movements to show working and balancing movements.

No plaster work or accessories are required with Galetti Articulators and they are easy to clean.

#1050200	Galetti Articulator

K-Brass/K-Chrome Denture Articulator

The K-Brass Denture Articulator has the same features as the K-Chrome Denture Articulator but is made of softer and longer-lasting brass. The simple articulator is machined to produce maximum accuracy. The articulator gives easy access to all surfaces, easy to adjust and can be taken apart and assembled quickly.

#1050147	K-Brass Denture Articulator
#1050145	K-Chrome Denture Articulator

Lab-O-Mate Articulator

The Keystone Lab-O-Mate Articulator is easy to use in dental labs. The incisal guide pin allows for adjustment of the vertical dimension during teeth alignment and adjustments. Made of high-quality materials and is long-lasting.

#1050012 Lab-O-Mate Articulator

Luxury Articulator

Our Luxury Articulators still offer the finest quality while remaining at an affordable price. This Luxury Articulator is a four-piece magnetic mounting disc set with two plastic steel mounting magnet plates. There is a curved plate, a flat plate and long incisal and central pins. The mount is backed with black Teflon coating. The articulator is easy to clean.

#1180170	4" (101.6 mm) x 42 ply
#1180180	5" (101.6 mm) x 30 ply
#1180190	5" (127 mm) x 45 ply
#1180200	6" (152.4 mm) x 30 ply

burners & torches

30B Blowpipe

For gas and compressed air uses in a lab, this 30B Blowpipe is the most modern and attractive in its field. It operates on any fuel gas (except acetylene) including natural, mixed, propane, butane and more with compressed air. All these fuel gases are handled with equal ease thanks to this Blowpipe.

#1820175 30B Blowpipe

Bunsen Burner

This Bunsen Burner is available for natural gas only. It has a chrome plated brass with adjustable air inlets. Gas inlet suitable for 8mm (5/16") ID tubing. Dimensions: 10 cm (4") height, 7.5 cm (3") base diameter.

#1190010 Model #111 Bunsen Burner
#1012920 Latex Tubing 1/4" I.D. x 3/32", sold by the foot

Deluxe Bunsen Burner

This Deluxe Bunsen Burner is made for natural gas only. The adjustable flame control provides ease of use. Also the base permits 30-degree angle or diagonal position of the flame. Works great in labs that need flexibility and adjustments.

#1190012 Deluxe Bunsen Burner

Plastic Alcohol Torch

This Plastic Alcohol Torch is used for easy, quick applications in the lab. This plastic torch uses denatured alcohol only. Wick is long-lasting and keeps a steady flame.

#1820015 Alcohol Torch
#1820018 Wicks, 12/Pkg

Microtorch

This Microtorch is a 2-in-1 open flame torch and flameless heat tool with a heat shrink attachment. The torch is excellent use to heat materials, ignite materials, pinpoint torch, shrink tubing, solder and desolder, terminate specialty connectors and more!

#1820005 Microtorch

National Blowpipe

National Blowpipes are economical and easy to operate. There is no other torch as well-known as these pipes. National Blowpipes operate on any fuel gas because of the patented proportional gas mixer. There's no need to change mixers, instead just select the proper tip. There is a rotating leak-proof union to ensure safety and compliance.

#1280050	Type A	#1280080	Type D

debubblizers

Klean Cast Debubblizer

The Klean Cast Debubblizer can be used on wax patterns, impressions and models. The non-contaminating, alcohol-free solution eliminates surface oils from the wax to ensure a smooth finish. Does not contain any solvents, therefore, it does not distort or effect the wax in any way.

#1014100	8 oz. (.23 L)
#1014101	32 oz. (.95 L)

Mizzy Blue Debubblizer

Blue Debubblizer produces smooth, accurate, bubble-free castings. The solution is formulated to gently reduce the surface tension of impressions prior to the pouring of models and wax patterns. This allows for a better flow and adaptation of the dental material being poured, virtually eliminating the formation of bubbles and voids on the surface of models and castings.

#6121800	32 oz. (.95 L)
#6121900	1 gallon (3.79L)

Sure-Flo

Sure-Flo is a liquid debubblizer that's great for eliminating bubbles in models. Easy, ready-to-use and helps save time and money.

#9046760 Sure-Flo, 16 oz. (.48 L)

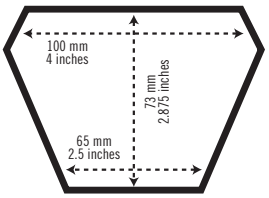
denture accesories

Bosworth Fastray™ LC

Light-Cured Tray Material

Fastray LC is a light-cured custom tray material supplied in pre-formed sheets. When used with a separator, Fastray LC will not distort or stick to fingers and models. Procedure time is reduced and odor is eliminated due to no powder and liquid mixing. Fastray LC provides a firm, stable custom tray that is ready to use immediately after trimming and polishing.

Recommended for use with: Masque™ I Tips: Fastray LC is a light sensitive material.
Keep box closed. Material may set after 15 minutes of light exposure.



#0921405 Standard Kit, Blue (50 Wafers)
#0921406 Standard Kit, Pink (50 Wafers)
#0921407 Standard Kit, White (50 Wafers)

All-Purpose Duplicating Material

This All-Purpose Duplicating Material can be used with all stone and investment models also for pour acrylic dentures.

- A quality, reversible duplicating material for use with all investment types
- Ideal for use with all duplicating conditioners
- No wash required

#1310310 1 gallon (3.78 L)
#1310315 5 gallon (18.92 L)

Diamond D® Ultra Wash

Diamond D Ultra Wash eliminates skinning of separator from model surface. It also enhances bond of acrylic to teeth and promotes cleaner deflasking and denture break out. This wash allows for total wax elimination from denture mold. Dental specific product used in place of detergent.

#1013120 Diamond D® Ultra Wash 1 Gallon (3.79 L)

Diamond D® Ultra Sep

The Diamond D Ultra Sep is a state-of-the-art tin foil substitute that penetrates and adheres to stone and plaster. Then, the stone and plaster breaks away easily from the acrylic after processing. The Diamond D Ultra Sep will produce unsurpassed results and save time in denture finishing.

#1010175 1 Quart (0.95L)
#1010170 1 Gallon (3.79L)

Diamond D® Wax Gloss

Our Diamond D Wax Gloss leaves a beautiful glossy finish on all waxes, denture wax try-ins, and bite blocks. This will certainly add to the final presentation quality to wax setups. Available in 1 quart bottles.

#1010180 1 Quart (0.95 L)

Diamond D® Mylar Pouches

These pouches, made of the strong and durable Mylar material, are used for the safe handling, transport and storage of denture cases. Before your lab sends out a finished case, you can put the denture in this liquid-tight sealed bag with a little bit of water to stay fresh and prevent cross contamination.

#1013047 Mylar Pouches, 100/Pkg
#1013048 Mylar Pouches, 250/Pkg

Kefoil

Kefoil is a specially formulated multi-purpose liquid separator and is an excellent tin foil substitute. An alcohol-free substance.

#1360020 Clear 1 gallon (3.79L)
#1360025 Pink 1 gallon (3.79L)

Diamond D® Sep Brushes

There are two types of Diamond D Sep Brushes. The Diamond D Sep Brush is used to apply tin foil substitute to stone and plaster surfaces. The Diamond D Sep Brush II is used to remove excess tin foil substitute from denture teeth.

#1170405 Diamond D Sep Brush
#1170400 Diamond D Sep Brush II

Palatinal Brush

The Palatinal Brush has a unique design that is ideal for polishing hard to reach palate area. The new designed brush if fitted on a tapered spindle and a plastic center with automatic centration. The brush is used with pumice for high shine.

#1670152 Palatinal Brush

3 Post Reline Jig

This is a great little addition to our laboratory equipment. The 3 Post Reline Jig is perfect for repairs, relines and other dental applications. With three points there's better accuracy and more stability when using the jig. The item has a sturdy build and an easy removable top plate. Sold individually.

#1190014 3 Post Reline Jig

Reline Jig

This Reline Jig is a chrome two-post jig used for accurate reline applications. It's made of chrome plate zinc alloy and the posts features tapered tops to aid in upper plate alignment.

#1502400 Reline Jig

Tin Foil

We have good quality Tin Foil that is 6" wide. The 1-pound roll comes in two different thicknesses: .001 and .002.

#1370010 .001 Thickness, Thin - 53 ft. (16.2 m)
#1370020 .002 Thickness, Thick - 26 ft. (7.9 m)

Plastic Sheets

Made of Veri-Thin material, .001 thickness. Available in 5" x 5" or 4" x 4" sheets.

#1610010 4" x 4" (10.1 x 10.1 cm)
#1610020 5" x 5" (12.7 x 12.7 cm)

Heat Sealing Bags

These Heat Sealing Bags are versatile and easy to use. Dental cases slip easily into the bags. Bags are 5" x 6" (12.7 x 15.2 cm) and .002" thick. Available in 500/Pkg.

#1450010 Heat Sealing Bags

die & model fabrication

BESTSELLER

Double Dowel Pins

Our Double Dowel Pins are state-of-the-art twin pins with die guards and sleeves. They are easy to use with a Pindex Machine. The pins add stability which eliminates rotation. They also are extremely precise with no distortion.

#1310055 Double Dowel Pins, 1,000/Pkg

Reverse Dowel Pins

Reverse Dowel Pins are economical plastic stabilizing pins. They are tapered to insure fit with most drills. Best used when removing die is required (porcelain veneer).

#1310070 Reverse Dowel Pins, 1,000/Pkg

Stick Dowel Pins

These Stick Dowel Pins are made of all brass.

#1310040 Stick Dowel Pins, 100/Pkg

Swiss Dowel Pins

These Swiss Dowel Pins are made of top quality brass.

#1310011 Small, 100/Pkg
#1310010 Small, 1,000/Pkg
#1300015 Medium, 1,000/Pkg

J-Pin

This J-Pin is a die locating device with positive 2-point indexing. The all-brass piece is made with retention wire. It can easily be bent to 180-degrees and fixed into an impression.

#1310200 Small Anterior (805-JT), 500/Pkg
#1310210 Medium Universal (805-JS), 500/Pkg

Adjustable Saw Frame

This Adjustable Saw Frame is for unpinned blades. Has a nice ergonomic wood handle and solid construction.

#1380010 Adjustable Saw Frame

Offset Pin Saw Frame

This Offset Pin Saw Frame uses 5" (12.7 cm) blades. Also available is an Opti-Saw (off-set) with 12 blades.

#1140285 Offset Pin Saw Frame

Pin Saw Frame

This Pin Saw Frame is for 5" (12.7 cm) blades. Frame is adjustable.

#1140280 Pin Saw Frame

Swiss Cut Offset Saw Frame & Blades

The teeth of this Swiss Cut Offset Saw frame are machined by our precision setting process that guarantees a cutting performance unequaled by any other blade in the world. The blades are made of the finest alloy steel that lasts longer and stays sharper. The rounded back design makes it easy to cut straight.

#1140290 Swiss Cut Offset Saw Frame
#1140200 .010 (0.25 mm) Swiss Cut Saw Blades, 10/Pkg
#1140195 .010 (0.25 mm) Swiss Cut Saw Blades, 100/Pkg

Saw Blades

We offer various pinned Saw Blades. The sharp, precise blades have 18 teeth per inch.

Pinned 5" (12.7 cm) length, .055" wide, .010" (0.25 mm) thick
#1140170 Blue, 100/Pkg #1140160 Blue, 10/Pkg

Pinned 4" (10.1 cm) length, .065" wide, .010" (0.25 mm) thick
#1140190 Brown, 100/Pkg #1140180 Blue, 10/Pkg

Pinned 5" (12.7 cm) length, .110" wide, .007" (0.18 mm) thick
#1140250 Blue, 100/Pkg #1140240 Blue, 10/Pkg

Boley Gauge

The Boley Gauge is the definitive dental tool used for a variety of procedures both in the laboratory and clinically. It's perfect for determining dimensions of length, width, and thickness in millimeter increments.

#1400010 Boley Gauge

Double Sided Caliper

These Double Sided Metal Calipers are a perfect calibration instrument for metal or wax.

#1210030 For metal
#1210040 For wax

Iwanson Calipers

Iwanson Calipers are a double sided caliper for either metal or wax.

#1210050 For metal
#1210060 For wax

Dial Caliper

This precise Dial Caliper has a full measuring range from 0-10 mm. The scale is clearly visible due to an oversized face for easy reading. Simple to operate, saves time and effort.

#1210005 Dial Caliper

Die Spacer

These Die Spacers are fast drying and heat resistant. It provides an excellent uniform seating of the restoration. Comes in 1 oz. (29.6 ml) bottles.

#1028520	Orange	#1028525	Silver
#1028524	Yellow	#1028527	Thinner
#1028523	Blue		

Newarea Die Spacer

These Die Spacers are durable varnishes for the perfect preparation of your working basis. They can be used for conventional and all-ceramic restorations. They are extrmemly resistant to steam and scratches, and have a high coverage and final hardness.

#1911600	Clear, 15 ml (3µm)	#1911603	Silver, 15 ml (12µm)
#1911601	Blue, 15 ml (7µm)	#1911604	Gold, 15 ml (12µm)
#1911602	Red, 15 ml (7µm)		

Newarea Special Liquids

Various special liquids.

#1911606	Contact Marker, Red, 15 ml
#1911607	Contact Marker, Blue, 15 ml
#1911608	Thinner for Contact Marker, 15 ml
#1911609	Water Spacer, Grey, 15 ml
#1911610	Water Spacer, Beige, 15 ml
#1911611	Isolating Lube Die, Wax, 15 ml

Our Universal Die Hardener does not build up and is absorbed completely by the plaster. Maximum bond strength to our spacers.

#1911612	Universal Die Hardener, 15 ml

Procure Block Out Material

ProCure now has a low viscosity, pigmented light-cured resin in syringe form that is excellent for blocking out models. This unique resin can be used in a variety of situations including bleaching reservoirs, die prep situations, and for filling voids and chips in prepared models. The kit comes with 5 pre-filled 1.2 cc syringes and 15 tips. Tips can be ordered separately.

#9637020	Block Out Material

Die Lube

This Die Lube is a quick-dry lubricant. It flows smoothly on any surface and contains no mineral oil. It evaporates quickly into a microscopic thin film that doesn't lose detail or fit.

#1287100 Die Lube, 32 oz. (.95 L)

Plug-It

Plug-It contains a special cyanoacrylate material of accelerator and base that permits a controlled setting time. The item is useful for filling air bubbles, basing up decay areas and short cusps, stabilizing dies during finishing procedures, and connecting bridge segments.

#1028680 Base, .5 oz.
#1028690 Solvent, 1 oz.
#1028685 Accelerator, 2 oz.
#1028695 Accelerator, 1 quart

Permabond 910

Permabond 910 is the original 100% methyl cyanoacrylate adhesive that adheres excellently to metal surfaces. The low viscosity liquid allows rapid curing at room temperatures when pressed into a thin film between two parts. It will cure to fixture strength in 10 seconds on most surfaces and rapidly develops high strength with fully cure obtained in 4 hours.

#1020050 Permabond 910, 1 oz.

Keybond

This Keybond has a thin viscosity for hard-to-bond surfaces.

#1020065 Keybond, 20g

Tri-Dynamics Tri-Epoxy

Tri-Dynamics Tri-Epoxy is a new advanced formula that is dimensionally stable and aesthetically pleasing. It's easy to release from the mold. All boxes include 12 epoxy resin jars, 12 epoxy hardener syringes & 12 stirrers.

equipment

Bosworth Pressure Pot

WATCH THE TECHNIQUE VIDEO!

Bosworth's Pressure Pot is a hydraulic water press used in creating bubble-free relines, repairs, splints, temporaries, and orthodontic appliances. It guarantees a dense, super smooth, porosity-free surface on any self-curing acrylic with just 10-15 p.s.i. Create a temporary with Pressure Pot to increase strength by reducing voids and porosity. Pressure Pot does not require electricity, heat, or air pressure. It is lightweight and easily transportable.

Recommended for use with: Masque™

Total weight of unit: 6 lbs 2 oz

- Inside Diameter: 5 in/12.7 cm
- Inside Height: 3.5 in/8.9 cm
- Depth: 5.5 in/14 cm
- Outside Diameter: 5.625 in/14.3 cm
- Overall Height: 7.5 in/19.1 cm
- Width: 6 in/15.2 cm

#092135 Pressure Pot

Pressure Pail

The Pressure Pail has a lot of excellent features that other pressure pots do not. Internal pressure can be generated either hydraulically using water or pneumatically using air from a compressor. The Pressure Pail is large enough (6" diameter by 6" deep), to hold a standard reline jig or smaller articulator. Easy crank handle, replaceable O-ring, and all-aluminum construction makes this pot excellent for curing all types of cold-cured acrylics. Use for repairs, relines, splint production, retainers and more. Airline adapter sold separately.

#9622760 Pressure Pail
#9622780 Airline Adapter
#9124560 O-ring

Denture Curing Unit

The Keystone Denture Curing Unit can be used for both boil out and curing. It cures up to 4 double flask compresses or 8 denture arches. The all-stainless construction makes for easy cleaning and anti-corrosion. The one-piece unit is sealed with no seams that will leak. There's a thermostatic control for variable holding temperatures.

#1050159 Denture Curing Unit, 115V
#1050160 Brass Spigot

Procure 300 Light Oven

The ProCure 300 Light Oven is an advanced third generation light curing unit that provides superior lighting intensity and excellent depth of cure. The ProCure 300 has been designed to provide the maximum light intensity without the negative heat buildup.

- A highly reflective chamber for uniform light coverage
- A rotating glass platform to ensure uniform light
- A built-in fan to maintain optimum temperature to eliminate warping
- Two powerful halogen bulbs to ensure excellent intensity and depth of cure

#9634590 ProCure 300 Light Oven
#9634600 ProCure 300 Light Oven w/ Sample Pack

Pro-form Vibrator

The Pro-form Vibrator is a heavy-duty vibrator powerful enough to be used in all types of dental laboratories but small enough to work great in a dental office. Heavy-duty steel spring construction provides maximum vibration and minimal noise. The unit has a weighted aluminum base for stability, a four-inch diameter rubber top, a three-speed control switch, and rubber suction feet to hold the unit in place.

#7000352 Pro-form Vibrator, 110V

Ultra Sonic 2300 General Purpose Cleaner

This General Purpose Cleaner is an ultra-high performance general purpose cleaner/degreaser. The cleaner is ammonia free. 100 gram package makes 1 gallon of solution.

#1850060 Ultra Sonic 2300

Ultra Sonic 2400 Plaster & Stone Remover

The Ultra Sonic 2400 is an excellently performing plaster and stone remover. The remover completely dissolves dental plasters and stone, as well as casting and soldering investments.

#1850065 Ultra Sonic 2400, 1 gallon (3.78 L)

Power Wash

The Power Wash requires no plumbing. Just plug it in, controlled water pressure! It draws clean water above settled dirt and below floating wax.

#1690010 Power Wash

The Trap

The Trap's top drain valve and all metal construction eliminate the need for costly plumbing, clean-ups and repairs. The compact design of the trap is ideal for all dental lab and dental office sub-sink areas. The built in viewing window eliminates the guess work of when it's time to change the liner. Comes with a 10-year rust warranty on pail only.

#7000360 The Trap
#7000403 Trap Liners, 6/Pkg
#7000364 J Bolt
#7000361 Trap Gasket

Dispos-a-trap

The Dispos-a-trap combines convenience with economy for laboratories. These are safe, reliable and sanitary containers. The containers are translucent to allow for easy monitory of waste levels.

#7000365 3-1/2 gallon (13.2 L) Complete
#7000366 5 gallon (18.9 L) Complete
#7000367 3-1/2 gallon (13.2 L) Bucket Only
#7000368 5 gallon (18.9 L) Bucket Only
#7000369 Hoses only

Harris Oxygen Regulator

We offer two sizes of Harris Oxygen Regulators. The large regulator is for G and H tanks while the small regulator is for D and E tanks.

#1821090 Large (G&H tank)
#1820195 Small (D&E tank)

Air Gun

The Air Gun is designed to eliminate the overheating of restorations, grinding tools, or fingers, while providing a clear view of the immediate working area.

#1030010 Air hose with Nozzle
#1030020 Air Hose only
#1030030 Nozzle only

Mini Scale

The Mini Pocket Scale is easy and convenient to use whenever and wherever. The pocket-sized digital electronic scale has a high precision strain gauge sensor. It is battery operated. The scale is excellent for weighing wax coping from pressable ceramics and all dental alloys.

#1050090 Mini Scale

Three-Well Wax Pot

The Keystone Three-Well Wax Pot is an economical, electric wax heater with three separate compartments. This is excellent for multiple wax build-ups. The temperatures are controlled (between 50F and 350F) and the pot is designed for easy access to waxes. Comes with a 1-year warranty.

#7000345 3-Well Wax Pot, 110 Volt

Plastic Belts

These Plastic Belts are extremely smooth running. They will out last most conventional cotton belts and comes in various sizes to fit all needs.

#1475105	6'4" (1.93 m)
#1475110	6'6" (1.98 m)
#1475119	8'4" (2.54 m)
#1475145	8'6" (2.59 m)
#1475125	9'2" (2.80 m)
#1475140	9'8" (2.95 m)

Cotton Belts

Our Cotton Belt is a quality four-ply cotton belt, which are endless woven.

#1470010	6'6" (1.98 m)
#1470030	9'6" (2.90 m)
#1470040	9'8" (2.95 m)

Plastic Beaker

This is a standard 400 ml Plastic Beaker. Used for handling and storing strip-it and other lab chemicals.

#1622706 Plastic Beaker

Plastic Liquid Dispensers

These plastic liquid dispensers are used to dispense Stripit, ceramic and acrylic liquids, light oils, non-flammable cleaning solutions and distilled water. The dispenser bottle is an exclusive molded one-piece cap and angle spout. They are simple, reliable and durable. Flow can be adjusted from single drops to razor-sharp stream by simply trimming the spout end.

#1655410	125 ml
#1655412	250 ml

instruments

Adjustable Saw Frame

This Adjustable Saw Frame is for unpinned blades. Has a nice ergonomic wood handle and solid construction.

#1380010 Adjustable Saw Frame

Swiss Cut Offset Saw Frame & Blades

The teeth of this Swiss Cut Offset Saw Frame are machined by our precision setting process that guarantees a cutting performance unequaled by any other blade in the world. The blades are made of the finest alloy steel that lasts longer and stays sharper. The rounded back design makes it easy to cut straight.

Our unique temper process allows the blade to be incredibly flexible and long lasting. The pinned blade size is: 5" length, .055" wide, .010" thick.

#1140290 Swiss Cut Offset Saw Frame
#1140200 .010 (0.25 mm) Swiss Cut Saw Blades, 10/Pkg

Double Sided Caliper

These Double Sided Metal Calipers are a perfect calibration instrument for metal or wax.

#1210030 For metal
#1210040 For wax

lab safety

Respirators

There are two types of respirator masks: one for dust and one for gas. Both are NIOSH/MSHA Approved and meet OSHA Guidelines.

The Blue Respirators (8246) are used for dust/mist protection and where solvents and organic vapors are a bother. The Gray Respirators (8247) are used for acid gas protection (chlorine, hydrogen and sulfur dioxide). They also provide dust/mist protection.

#5920685 Blue (8246)
#5920690 Gray (8247)

Protective Safety Glasses

We offer both clear protective safety glasses and UV Protective Safety Glasses. Both are made of polycarbonate single piece lens construction. The unique spherical design delivers a distortion-free view even in peripheral vision areas. These glasses are secure and have a comfortable fit even when wearing over prescription glasses. These are an economical choice while still providing needed safety precautions. The UV glasses filter more than 99% of UV and dangerous blue light (up to 540nm).

#36-00110	Clear Protective Safety Glasses	EACH
#36-00210	U.V. Protective Safety Glasses	EACH

lamps & magnifiers

Megaview

The Megaview provides a wide field of vision and is lightweight. This is a binocular head mount loupe with flip up lenses for easy use and vision. The adjustable headpiece can be worn with regular glasses and has interchangeable lenses for different magnifying strengths.

#1400080	Megaview
#1400081	1.7x lens
#1400082	2.0x lens
#1400083	2.5x lens

Headband Magnifier

This Headband Magnifier gives 4x power and has dual side lights. One touch design switches between 1.8x, 2.3x, 3.7x and 4.8x magnification. The piece of equipment is lightweight, weighing in at 110g.

#1150120	Headband Magnifier

miscellaneous

Blue Safe Acid Neutralizer

Blue Safe Acid Neutralizer avoids acid-related accidents in the dental lab or office. Before disposing acid, use Blue Safe to neutralize the acid. It can be used on any type of acid. Just scoop and sprinkle the neutralizer powder onto the acid – wait for the color to turn yellow to dark blue.

#5920670	Blue Safe Acid Neutralizer, 3 lb.

Stripit

Stripit removes oxidation and contamination from both semi-precious and precious metals. The formula also is used for various other applications:

- Removes investments from high and low heat castings and soldering flux
- Removes porcelain and opaque from coping and frameworks
- Prevents bubbling of ceramic structure due to contamination from inorganic silicates embedded in castings
- Reduces corrosion of metal parts in the laboratory which may be caused by acid fumes

#1655900 Stripit, 4 quarts (3.78 L)

Tri-Dynamics Laboratory Etching Gels

Our Laboratory Etching Gels from Tri-Dynamics are a must-have for your dental laboratory. They are all easy to control and apply, and Keystone offers two different gels for different surfaces: Ceramic and Metal.

Ceramic Etch Gel: will chemically etch entire surface where gel comes into contact with ceramic material. This will create a roughened undercut surface. **Metal Etch Gel:** will selectively remove base materials from the alloy to create a roughened undercut surface. This has a nickel base, containing 10% hydrochloric acid, 4% nitric acid and 1% hydrofluoric acid. The higher gold content, the better it works. NOTE: Does not work well with silver, copper, and gallium.

#5920840 Ceramic Etch Gel, 15 ml
#5920850 Metal Etch Gel, 15 ml

P.D. Attachments

These Precision Dowel Attachments are easy to adjust. The male and female dowels are interchangeable and both have a 2-degree taper on the sides and 1-degree on the face.

#1631701 Small Set
#1631702 Large Set

#1010004 50 lbs. (22.68 kg)

porcelain accessories

Insta-Frac

Insta-Frac is an instant refractory material used for repairing and adding to ceramic crowns, porcelain laminates, Dicor crowns, inlays, onlays, etc. It's also used for making custom firing pegs and all types of porcelain add-ons, except margins. The material is carbon free and non-contaminating. Can be used up to 3,200-degrees Fahrenheit.

#5920305 Insta-Frac

Furnace Tongs

These Furnace Tongs are 15" (38.1 cm) long to provide ideal reach. The scissor-type tongs can securely grab dental work from the furnace.

#1620037 Furnace Tongs

Porcelain Tongs

These Porcelain Tongs are 12" (30.4 cm) long to help pick up and place precious dental materials.

#1620035 Porcelain Tongs

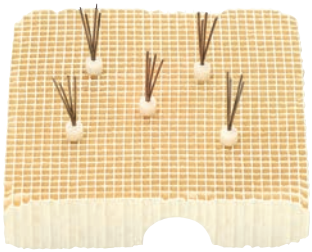
Metal Pins

A. B. C.

We offer a few types of metal pins for dental work.

#1680096 A. Molar Pin Peg, 5/Pkg
#1680092 B. Posterior Swivel Pin Peg, 5/Pkg
#1680089 C. Metal Round Head Pin Peg, 6/Pkg

V Pegs



V Pegs are single firing pins that can be taken out from the honeycomb base tray. Single individual firing pins can also be used for positioning work on the tray. Fan-shaped pins have 4 thin arms (0.4" diameter/1.02 cm) that can be bent individually.

#1680045 V Pegs, 5/Pkg

Uni-Pegs

The Uni-Pegs are easy to position and made of high-fused micro grain porcelain composition. The pegs' triangle shape provides excellent balance, support and stability. These can be assembled to form a round tray.

#1680080 Uni-Pegs, 6/Pkg

Honey-Comb Pegs

Honey-Comb Pegs are made of nickel-chrome steel, which enable users to custom design honey-comb trays.

#1680085 Honey Comb Pegs, 4/Pkg

Porcelain Stacking Trays

These Porcelain Stacking Trays save space and time. They come with covers.

#1680010 Porcelain Stacking Trays, 5/Pkg

Porcelain Slant Tile

This Porcelain Slant Tile comes with five wells and five slants.

#1680020 Porcelain Slant Tile

Porcelain Slant Tile

This Porcelain Slant tile comes with five wells and five slants and features dry and vent. Has 10 sections and makes work easier.

#5001002 Porcelain Slant Tile

Twenty Well Mixing Pallet

This Mixing Palette is stackable and offers ceramists the convenience of mixing and storing several shades of porcelain or the combination of needed for a single or multi-color shade. The small reservoir holes in the palette allows for easy fluid replenishing. The glazed surface protects the brushes. It has 20 small wells on the palette. Sold individually.

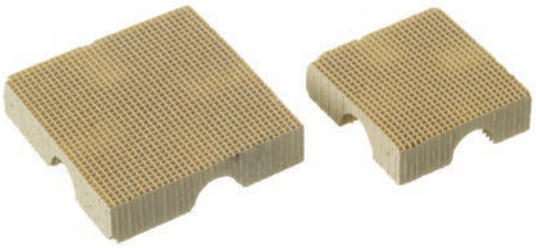
#5001004 Twenty Well Mixing Pallet

Twenty-Three Well Staining Pallet

This Mixing Palette is stackable and offers ceramists the convenience of mixing and storing several shades of porcelain or the combination of needed for a single or multi-color shade. The small reservoir holes in the palette allows for easy fluid replenishing. The glazed surface protects the brushes. There are more than 20 wells on this palette. Sold individually.

#5001014 Twenty-Three Well Staining Pallet

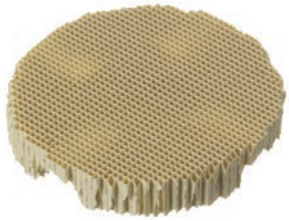
Honey-Comb Square Tray Set



The Honey-Comb Square Tray set has a unique structure that heats rapidly and evenly, virtually eliminating any hot spots. The set contains one large and one small tray per box.

#7110500 Honey-Comb Square Tray Set, 2/Set

Honey-Comb Round Furnace Tray



The Honey-Comb Round Furnace tray is 2-7/8" dia. x 1/2" (73 x 12.7 mm) thick. Heats evenly and produces high quality porcelain appliances.

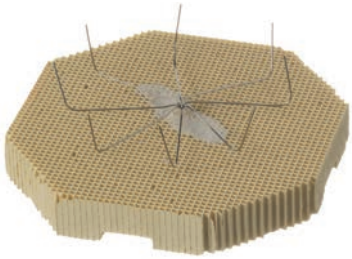
#7110501 Honey-Comb Round Furnace Tray

Honey-Comb Octagon Tray

The Honey-Comb Octagon Tray is 7/16" (11.1 mm) thick. Heats evenly and produces high quality porcelain appliances.

#7110502 Honey-Comb Octagon Tray

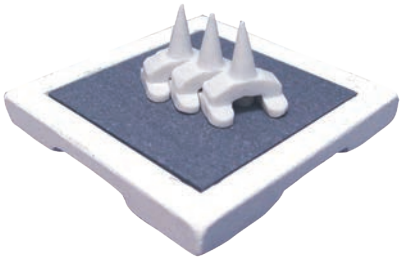
Spider Tray



The Keystone Spider Tray is a new firing tray utilizing a fixed fan shaped pin specifically developed for all types of delicate ceramic work with an emphasis on all-ceramic restorations. With 8 bendable, thin metal prongs, the tray can adapt to a variety of cases. The unique shape and thinness of the blades allow a more uniform cooling of the ceramic restoration.

#1680040 Spider Tray

Carbon Insert Ceramic Trays



These Carbon Insert Ceramic Trays absorb silver vapor that is released during each firing. It's a must-use with silver palladium alloys. Items also come with 6 anterior pegs or 6 carbon replacements. Size: 2-1/4" x 2-1/4" x 1/4" (57.1 x 57.1 x 6.3 mm).

#5920040	C010, 2/Pkg
#5920045	C008, 2/Pkg plus 6 anterior pegs
#5920055	C012, 1 plus 6 carbon replacements

Ceramic Trays

This Ceramic Tray is designed for easy insertion and removal from the furnace. Items also come with 6 anterior pegs, 6 posterior pegs or 6 etch pegs. Size: 2-1/4" x 2-1/4" x 1/4" (57.1 x 57.1 x 6.3 mm).

#5920020	B002, 2/Pkg
#5920025	B006, 2/Pkg plus 6 anterior pegs
#5920030	B007, 2/Pkg plus 6 posterior pegs

H-Base Pegs

H-Base Pegs feature a revolutionary tunnel, which offers closer placement and greater stability. Interlocking allows absolute precision for exact positioning. The pegs can be fired up to 2,200-degrees Fahrenheit.

#5920011 B008 Molar & Bicuspid Peg, 8/Pkg

rotary

Hatho Habras Discs

Ideal for heavy cleaning (coarse), removing light oxide (medium), pre-polishing, semi-finishing, blending, texturizing and polishing (fine). This is an abrasive that does not generate the heat associated with rubber wheels. Embedded cubitron mineral abrasive is much harder than most metal. Removes oxides and polish without using compounds. Ideal for cleaning metal work and hard-to reach areas. 10,000 rpm. Recommended: 4 discs mounted together.

Coarse Yellow - 80 grit. Remove deep scratches from precious metals, non-precious metals, acrylic dentures and composites.

#1670083 4 Discs/Mandrel
#1670097 4 Discs w/o Mandrel
#1670101 48 Discs Bulk Package

Medium Red - 220 grit. Removes fine scratches from precious metals, non-precious metals, acrylic dentures and composites.

#1670084 4 Discs/Mandrel
#1670098 4 Discs w/o Mandrel
#1670102 48 Discs Bulk Package

Fine Blue - 400 grit. Smooths precious metals, non-precious metals, acrylic dentures and composites.

#1670085 4 Discs/Mandrel
#1670099 4 Discs w/o Mandrel
#1670103 48 Discs Bulk Package

Super Fine Pink - Pumice. Shine precious metals, non-precious metals, acrylic dentures and composites.

#1670086 4 Discs/Mandrel
#1670100 4 Discs w/o Mandrel
#1670104 48 Discs Bulk Package

High Gloss Green - 6µ. High Gloss precious metals, non-precious metals, acrylic dentures and composites.

#1670108 4 Discs/Mandrel
#1670112 4 Discs w/o Mandrel
#1670116 48 Discs Bulk Package

High Shine Orange - 1µ. High Shine precious metals, non-precious metals, acrylic dentures and composites.

#1670107 4 Discs/Mandrel
#1670111 4 Discs w/o Mandrel
#1670115 48 Discs Bulk Package

Hatho Habras Disc Kit

A unique three-dimensional, abrasive and flexible design that provides a uniform finish. Ideal for heavy cleaning, removing light oxide, pre-polishing, semi-finishing, blending, texturizing and polishing.

#1670113 6-Piece Kit, 10,000 rpm

Hatho Geza Brushes

Premium bristle materials (Goat Hair and Chung King) offer the perfect miniature brush for deep, interproximal and occlusal polishing. 3/32" (.24 cm) shank, 15,000 rpm, 12/Pkg.

#1670087	Geza 100 HP, White Goat Hair
#1670089	Geza 120 HP, White Chung King
#1670088	Geza 121 HP, Black Chung King
#1670090	Geza 122 HP, Gray Chung King

Hatho Polishing Discs

Ideal for working on softer materials, such as dentures and removal of soft denture reline material. The core is wood encased in plastic, allowing easy mounting/dismounting from the lathe and ensures the disk remains “true”.

AFG Aesthetic Translucent Waxes

Keystone AFG aesthetic translucent waxes, created by Alberto Battistelli, are used to construct wax teeth that faithfully reproduce natural teeth with a layering system similar to that used by prosthodontists for dental ceramics. The pastel coloration with light shades is very similar to dentin and natural enamel and is accompanied by slightly brighter colors. This reproduces individual characterization in a way that is similar to what is normally done with super-colors or intensive masses during the construction of ceramic teeth.

AFG wax kits contain black wax to create perfect marginal closures, an opaque white wax, and an opaque grey wax for the technique of mono-color waxing, which assists in the viewing of anatomical details.

White Wax is for mono-color waxing, opal effects and imitation of decalcified areas in aesthetic waxing. Dentin A1 is for modeling of light dental nucleus. Dentin A3 is for modeling of dental nucleus or the neck. The blue/grey wax is the imitation of the areas of grey-blue transparency. Neutral is for the imitation of the effects of translucence, enamel and dilution of all the masses to make them more translucent. Orange is for modeling of the neck, the back of occlusal zones, the mamelons and the interproximal areas. The light brown is for the coloration of the neck and the proximal areas and the dark brown in for the simulation of caries.

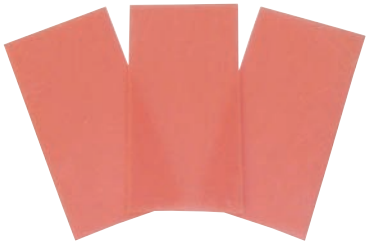
Base Plate Wax CE

Our Base Plate Wax is made from the finest ingredients. The wax is great for general purpose uses while remaining an economical wax. Available in red or pink color and comes in 5-pound cases.

#1880175	Red
#1880170	Pink



Mizzy Allcezon Base Plate Wax

Mizzy Allcezon Base Plate Wax is composed of general, all-purpose wax for bites, registration and impressions. Pink color, available in 1 lb. or 5 lb. boxes.

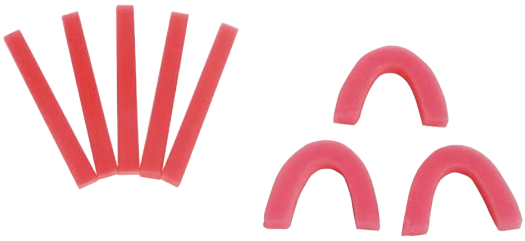
#6160100 Mizzy Allcezon Base Plate Wax, 1 lb. (453 g)
#6160300 Mizzy Allcezon Base Plate Wax, 5 lb. (2,268 g)

Newcera® Block Out Wax

Block out wax comes in honey color. Melting point: 70˚C/158˚F.

#1910543 Honey, 70g

Bite Blocks



These Bite Blocks are pink recessed, medium soft with 3/8" wax for occlusal rims. U-shaped and pliable for custom reshaping at room temperatures to fit the individual arch. Available in 100/Box.

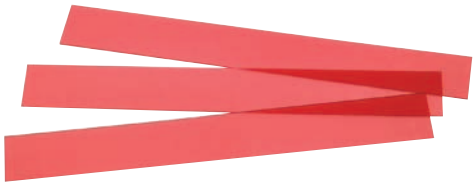
#1880240 Bite Blocks
#1880250 Bite Sticks

Mizzy Byte Ryte Wax

Mizzy Byte Ryte Wax is the sheet form of bite wax with same properties as cake form.

#6160700 Yellow, 1 lb. (453 g)
#6160800 Yellow, 5 lb. (2,268 g)

Boxing Strip Wax



The Boxing Strip Wax is soft, tacky red wax perfect for boxing impressions.

#1880260	Red Regular, 5 lb. (2,268 g)
#1880262	Red Regular, 1 lb. (453 g)
#1880264	Red Xtra Thin, 1 lb. (453 g)

Newcera® CAD/CAM Discs

NewCera CAD/CAM Discs has a melting point of 115˚C/239˚F.

Technical specification: ~ 27,500Up/m
Feed rate: 20-25mm/sec
2 Cutters 2mm
Comes with ridge and without ridge.

#1911555	Grey, 20mm
#1911556	Beige, 18mm
#1911557	Grey with Ridge, 20mm
#1911558	Beige with Ridge, 18mm

Newcera® CAD/CAM Sculpturing Wax

NewCera CAD/CAM Sculpturing Wax has a melting point of 62˚C/144˚F.

#1910549	Green, 70g
#1910546	Beige, 70g
#1910552	Grey, 70g

Newcera® Cervical Wax

The NewCera Cervical Wax has high stability, low shrinkage, excellent carving properties, and a low melting point. Melting point: 60˚C/140˚F.

#1910537 Red, 70g

Newcera® Rock Cervical Wax

This cervical wax has a melting point of 65˚C/149˚F.

#1911560 Black, 70g

Slaycris Crown & Bridge Wax

Slaycris Wax is medium soft wax prepared for use in all types of crown and bridge work. Available in 3 oz. tin.

#1880795 Regular Green

Dipping Wax

Keystone Dipping Wax is available in Green or Yellow. Available in a 10 oz. jar.

#1890050 Green
#1890040 Yellow

Newcera® Dipping Wax

NewCera Dipping Wax comes in hard and soft wax pellets.

#1910544 Red, Hard 300g
#1910545 Yellow, Soft 300g

Corning Inlay Wax

Corning Inlay Wax is developed for the requirements of inlay technique. The wax is form-stable and contraction resistant (low shrinkage) from wax-up to burnout. It will not pull, flare, chip, crack, drag or expand at the margins, even when being cast in extremely thin sections. It will resist deformation due to handling and can be easily carved. Will not become sticky or flaky or gum up instruments and will burn-out cleanly with no residue.

#1880390	Regular Green, 1 lb. (0.45 kg)

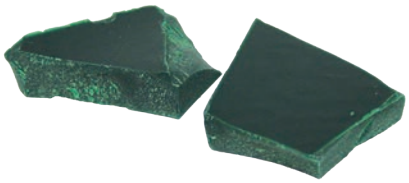
#1880450	White, 1 lb. (0.45 kg)

Keystone Inlay Wax



Keystone Inlay Wax provides the highest quality. Perfect for all inlay wax needs. Available in 1 lb. (0.45 kg) box.

#1880385	Regular Blue
#1880387	Regular Green
#1880450	White

Mizzy Impression Compound Cakes & Sticks

Mizzy Compound Cakes & Sticks are pleasantly scented and flavored compound for taking full and partial impressions, and making preliminary impression trays.

Brown Medium Heat Compound:
- Plastic at 135˚F (57.2˚C)
- Ideal for snap impressions
- Working Temperature: 125˚F - 135˚F (52˚C - 57˚C)

Red Low Heat Compound:
- Maximum visibility of detail
- Working Temperature: 115˚F - 125˚F (46˚C - 52˚C)

Green Sticks:
- Has the most diverse working range
- Renders sharp details
- Will not fracture while trimming
- Chills evenly without warping
- Maximum contrast

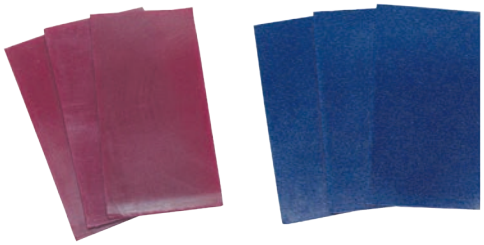
Set-Up Wax

The Set-Up Wax has a great tenacity and ideal for partial prosthesis. There's no distortion of the wax, due to small range (<5%) of melting points and there's also no runniness or droplet formation. One sheet is enough for two prostheses. Available in a 5-pound box.

#1880155 Pink

Special Formula Wax



The Special Formula Wax is formulated to check for premature occlusion and as an articulating medium. Available sizes 5-7/8" x 2-7/8" (14.92 x 7.30 cm) and comes in 1-pound box.

#6162700 Dr. Schuyler's Articulating Wax
#6162600 Dr. Cohn's Special Formula Wax

Sprue Wax

Sprue Wax is specifically formulated and designed to be used as sprues. Comes in red color and 6" long rods.

#1880730 Red 8 gauge, 1 lb. (453 g)

Newcera® Sticky Wax

NewCera Sticky Wax has a melting point of 75˚C/167˚F.

#1910542 Orange Neon, 70g

Sticky Wax

The Sticky Wax is used to hold or weld materials or pieces together. It can also be used to connect or repairs wax patterns. The wax is melted with a gas flame and used as a modeling wax. Available in 1 lb. boxes.

#1880750 Red Lumps
#1880770 Yellow Lumps
#1880775 Corning Yellow Sticks, 120
#1880760 Corning Yellow Lumps

Stippled Wax Sheets

The Sticky Wax is used to hold or weld materials or pieces together. It can also be used to connect or repairs wax patterns. The wax is melted with a gas flame and used as a modeling wax. Available in 1 lb. boxes.

#1880790 Green, 22 gauge (0.6 mm)
#1880785 Green, 24 gauge (0.5 mm)

Utility Wax

Utility Wax is especially suited for built up and post-damming purposes. Available in Red Round, White Round, Red Square and White Square. Comes in 1 lb. boxes, 3/16" size.

#1880180	Red Round Strips
#1880200	Red Square Rope
#1880190	White Round Strips
#1880210	White Square Rope

Kewax Wire Wax

Kewax Wire Wax the best wax money can buy. The wax is extruded to a uniformed diameter and provides the proper tackiness and adhesion.

Wax Palate Patterns

This works great for gold, acrylic, partial or full palates. It improves denture quality by obtaining natural living tissue finish, beautiful esthetics and greater comfort. Reduces labor costs. Less waxing and finishing (saves hand waxing) and is convenient to use.

#1600010 Wax Palate Patterns, 100/Pkg

Klean All Boil Out Agent

Klean All Boil Out Agent keeps the wax in suspension. The agent does not leave any residue on models. This goes into solution easily and dissolves any grit from the wax. It's odor-free and non-chlorinated.

#1014102 Klean All, 32 oz.
#1014103 Klean All, 1 gallon

Ke-Solv

Ke-Solv is a non-toxic solvent for wax removal. Works quickly and is a must-have for any lab.

#1480010 Ke-Solv, 1 gallon

Keystone Line Pen

Keystone Line-Pen is a reliable blue marking pencil for the margin line. Convenient and can be used on plaster.

#1911563 Keystone Line Pen

Newcera® Iso Pen

High quality isolation pen.

#1911562 Iso Pen

Newcera® Wax Brush

High quality wax brush.

#1911565 Wax Brush

articulating

Articulating Papers

Our Articulating Paper is soft, smooth and non-sticking. The super sensitive paper is great for marking at every point of articulations. The horseshoe-shaped articulated papers are especially useful for patients who tend to bite unilaterally during the occlusion test due to diminished resilience. Has a high resistance to tearing.

Mizzy PIP Paste CE

PIP is a pure white silicone paste, used for seating crowns, bridges and full, immediate and partial dentures. The brief procedure yields specific results that are easy to read and thoroughly reliable, surpassing results obtained with chemical set pressure indicating materials used to locate areas of denture discomfort. PIP is applied to the dry denture; companion PIP spray is applied to the tissue. The denture is then seated under pressure then removed. Areas where the paste has been displaced show points of excessive pressure.

#6120210	PIP without Remover, 1 1/4 oz.
#6120220	PIP without Remover & brushes, 1 1/4 oz.

Mizzy PIP Spray CE

PIP Spray is the perfect companion product to PIP paste. This mint flavored wetting agent can be sprayed onto teeth and soft tissue to produce smooth, accurate bubble-free surfaces on all types of impression material. Use as a rinse to eliminate ropy saliva.

#6140100	PIP Spray, 4 oz. (.11 L)
#6140200	PIP Spray Concentrate (makes 32 oz.), 16 oz. (9.47 L)

cements & liners

Fleck's Zinc Phosphate Cement CE 1639

Since the advent of zinc phosphate cement, many other types of cement have been introduced. None, however, have demonstrated clinical superior in terms of strength, resistance to dissolution, and overall retention like Fleck's Zinc Phosphate Cement has. And of all zinc phosphate, Fleck's is the leading brand and cement of choice of dentists.

Mizzy Z•O•E Cement CE 1639

Mizzy Z•O•E Cement is ideal for cementing temporary crowns and bridges, and trial cementing of permanent restorations. The Z•O•E Cement protects the pulp from thermal shock. Cavities lined with Z•O•E Cements can be filled promptly.

#6070520	Z•O•E Kit: 21g powder, 7.5ml liquid
#6070510	21g Z•O•E Cement Powder
#6070500	7.5 ml Z•O•E Cement Liquid

Bosworth SuperEBA® CE 1639

EBA Cement

SuperEBA is an all-purpose, alumina-fortified material for final cementation of a single crown or inlay, or for use as a base, liner, or a temporary dressing for the relief of pain. SuperEBA's neutral pH and mild formulation provide additional patient comfort during the healing process. Hydrophilic nature and low film thickness provide unsurpassed convenience, making it an excellent choice for patients who are easily irritated. Adheres to tooth structure in the presence of moisture. Not to be used for implants.

Tips: Regular set has a greater than 15 minute slab set, but a shorter in the mouth set of 10-15 minutes. The fast set has a 10-15 minute slab set, but a faster in the mouth set of 4-8 minutes. Film thickness 25 microns.

Bosworth Copaliner® CE 1639

Varnish & Sealant

Copaliner cavity varnish and sealant protects the dentin and penetrates, fills, and seals the tubuli. It insulates against thermal, galvanic, and electrical shock and prevents hyperemia, death of the pulp, and discoloration. Copaliner provides a strong bond and an excellent marginal seal that will extend the life of the restoration. Its non-chloroform formula is scratch resistant and virtually insoluble in the oral environment. Over time it will develop dentinal tags for improved performance. Copaliner is ether-based with a biologically mild formula, minimizing post-operative sensitivity. CAN ONLY BE USED UNDER AMALGAM.

Standard Kit: .5 oz (14 ml) Solvent, .5 oz (14 ml) Varnish

#0921525 Standard Kit

COMPONENTS
#0921526 .5 oz (14 ml) Varnish
#0921527 .5 oz (14 ml) Solvent

Bosworth Masque®

Silicone Lubricant & Separator

Masque is a silicone lubricant and coating agent that is insoluble in the mouth and keeps acrylic from bonding to the teeth. Masque is unaffected by monomers and heat. It cannot run, is tasteless, odorless, non-oily and completely compatible with oral tissue. Masque can be applied whenever a lubricant or coating agent is required. Use wherever you do not want acrylic to bond. To remove Masque, simply wipe clean and rinse.

#0921530 1 oz (29 g) Syringe with Plunger

Mixing Poly Pads

Mixing Poly Pads are extra heavy with a high poly-coated finishes. It can be used for mixing cements, composites, rubber base materials and silicates. Non-skid foam base.

Orange Solvent with Lanolin

Orange Solvent with Lanolin is perfect for the removal of PIP paste, zinc oxide-eugenol, rubber base and other impression material from dentures, hands, face, mixing slabs and instruments.

#6120800 Orange Solvent, 32 oz. (.95 L)

chairside acrylics

Bosworth Trim® and Trim® II

PEMA Temporary Resin Acrylic

Trim and Trim II are fast-setting, non-irritating PEMA temporary resin acrylic crown and bridge materials formulated for extended use. The powder and liquid in each kit are identical in formula and the powders can be mixed to obtain specialty colors. The resin is dimensionally stable, will not distort when withdrawn from undercuts while setting and is suitable for use as a bite registration material. Trim is available in two shades (light and dark). Trim II is available in six shades for greater diversity in achieving the perfect shade match for patients.

Recommended for use with: Glaze™, Masque™ and Pressure Pot
Bulk packaging available.

Tips: Order Trim VW (Very White) powder in addition to the standard kit to produce a temporary as white as bleached teeth.

Note: Trim and Trim II cannot be mixed with Trim Plus materials.

Bosworth Dentusil™

Silicone Soft Reline Material

DentuSil™ is a chairside soft silicone relining material which combines the ease of cartridge dispensing with the flexibility and resilience of a silicone soft reline material to provide denture patients with a comfortable, reliable reline in just one office visit. DentuSil™'s silicone base absorbs less water, making the reline more resistant to stains and odors. Its translucent pink color provides a natural, healthy appearance. Adhesive is specially formulated to hold material in place, providing a secure reline in just minutes. Contains 10 applications. DentuSil lasts in the mouth for approximately one year and has a shelf life of two years. Easily cleaned with a soft brush.

Tips: DentuSil contains no monomer and is perfect for use on patients with sensitivity to acrylics. DentuSil can be used to cushion dentures as overdentures heal. Use DentuSil in the dental laboratory by placing the denture on the patient's model in the dental flask. Do not use with condensation reaction type silicone materials or adhesive.

Recommended for use with: E-Z Squeeze™ Universal Dispenser and Static Mixing Tips for 5 inch cartridges.

#0921276	**Standard Kit** 50ml Cartridge, Mixing Tips, 10ml Liquid Adhesive, 10ml Silicone Release, Applicator Brushes
#0921278	Dentusil Adhesive (10ml)

Bosworth New Truliner®

PEMA Denture Corrective Relining Material

New Truliner is a PEMA denture corrective relining material. New Truliner's advanced formula reduces stinging and burning sensation which allows for a restoration on a denture's original fit in as little as 5 minutes. Color stability and a high density surface guarantee greater patient satisfaction. New Truliner chemically fuses to the denture in 15-20 minutes and is formulated to last up to a year. Once cured, rebased surfaces can be trimmed and polished like the original denture without showing a line of demarcation.

Mixing Ratio: 7.6 ml liquid (1 full glass vial) to 15 ml powder (1 full plastic vial).
Tips: Before making a permanent denture reline, treat the tissue with a tissue conditioner such as Softone to eliminate the possibility of the final corrective reline duplicating the disturbed or deformed mucosa caused by the deficient denture.

Note: New Truliner liquid and powder is NOT interchangeable with Original Truliner liquid and powder. New Truliner is a PEMA formula and Original Truliner is a PMMA formula.

Recommended for use with: Cora-Caine®, Glaze™, Masque™, and Pressure Pot

Standard Kit: 8 oz. (227g) Powder, 6 oz. (177 ml) Liquid, 1/3 oz. (10 ml) Bonding Liquid

#0921976 6 oz (177 ml) Liquid
#0921983 1/3 oz (10 ml) Bonding Liquid

Bosworth Original Truliner®

PMMA Denture Corrective Relining Material

Original Truliner is a PMMA color stable, permanent reline material formulated for extended life (3-5 years). The extremely fine-milled powder cures to a dense consistency and prevents the reline from assuming odors, tastes, or stains. Original Truliner is a unique reverse curing acrylic (cures from the inside out) which releases the free monomer before it is inserted in the mouth, eliminating chemical and thermal sensitivity and forming a permanent bond in as little as ten minutes that will not chip or discolor. Can also be used for repairs and orthodontic appliances.

Mixing Ratio: 7.6 ml liquid (1 full glass vial) to 15 ml powder (1 full plastic vial).
Tips: Before making a permanent denture reline, treat the tissue with a tissue conditioner such as Bosworth Softone to eliminate the possibility of the final corrective reline duplicating the disturbed or deformed mucosa caused by the deficient denture.

Note: New Truliner liquid and powder is NOT interchangeable with Original Truliner liquid and powder. New Truliner is a PEMA formula and Original Truliner is a PMMA formula.

Recommended for use with: Cora-Caine®, Glaze™, Masque™, and Pressure Pot

Bosworth Trusoft™

PEMA Denture Acrylic Relining Material

Trusoft is a plasticized acrylic PEMA that is specifically designed as an intermediate liner for patients requiring a prolonged adjustment period prior to using a hard liner or denture base material (Softone is for shorter adjustment periods). Its elasticity will ensure against pressure pain, tender ridges, sensitive areas, and irritated tuberosities. Trusoft is formulated to remain resilient for up to 30 days. Can be used for every patient as a precautionary measure but is especially necessary for patients who are slow to heal or sensitive to wearing a new denture. Patient is ready for a permanent reline (New or Original Truliner) when he or she can exhibit control and acceptance with Trusoft.

Tips: Trusoft can be used in between tissue treatments with Softone.

Recommended for use with: CoraCaine® and Masque™

Bosworth Light Liner

Light Cure Chairside Reline Composite

Light Liner is a chairside reline material that light cures in minutes. Available in a soft or hard non-methyl methacrylate formula, this microfilled composite flows easily and offers the convenience of a one visit procedure without multiple pour-ups or impressions. Accurate relines and quality repairs are achieved in minutes at a fraction of the cost of sending it to the lab. Light Liner is a dual-cure, self-bonding material that will not shrink, resists staining, and is color stable. Light Liner is virtually as strong as the denture, chemically bonding to it to prevent flaking or peeling. FOR DENTURE RELINING ONLY.

Recommended for use with: Cora-Caine® and Masque™

Standard Kit: 8 - 6g Composite Powder, 8 -4 Composite Liquid, 30cc Air Barrier

#0921463 Standard Kit, Hard
#0921464 Standard Kit, Soft

BESTSELLER

Bosworth Softone™

Tissue Conditioner

Softone is a resilient acrylic denture tissue conditioner that conditions, massages, and rehabilitates damaged tissue. Softone's unique flow and natural give stimulate the natural healing process and restores tissue to a sound physiological state. Softone has a clean, refreshing taste that will not absorb odors for greater patient comfort and compliance.
Softone allows the denture to stay in the mouth throughout the treatment process. For patients requiring a temporary soft reline or prolonged adjustment period before the permanent hard reline, use Bosworth Trusoft.

Tips: Upper and lower arches can be treated at the same appointment as long as the dentist treats each denture separately. Softone will trim easier if using a heated knife to seal material and reduce peeling. Softone reline may be cleaned by rinsing with a mild, alcohol-free cleaner or by brushing with a soft toothbrush and a mild non-abrasive toothpaste. Polishing may be expedited by first chilling denture in refrigerator or ice water. Softone is a temporary impression material formulated to last up to 4 days in the mouth.

Bosworth Glaze™

Self Cure Resin Polish

Glaze is a fast-setting, self-cure resin which reduces polishing time and dries to a clear, hard surface with a high gloss finish. Glaze can be brushed onto a clean composite or acrylic material to achieve a polished surface that enhances the appliance and reduces the need for additional polishing. Recommended for use on provisional, reline, and orthodontic appliances. Glaze fills microscopic voids and reduces bacterial growth. Sets in 20 seconds.

Standard Kit: 12 ml Glaze, 12 ml Glaze Solvent

dental dams

dental dams

These Dental Dams are made of highly flexible material that provide increased stretch and manipulation to reduce cross-contamination. Works well to eliminate frequent rinsing and use of multiple cotton rolls during a procedure. The dam minimizes risk of patient aspiration of foreign object. Also, the sheets have an excellent tensile and tear strength. Made with powder-free latex 5 mg per sheet.

Bosworth Superbite™ CE
Zinc Oxide Eugenol Paste

Superbite is a traditional zinc oxide eugenol paste that combines controlled flowability and non-sagging body to enable unexcelled reproduction of the oral tissues that support a denture, registration of centric, and accurate seating of the casts for articulation. Superbite paste is a blue, two-component material. The absence of secondary flow and resistance to closure will enhance patient comfort.

Recommended for use with: Big Bite Trays™

Standard Kit: 7.5 oz. (212 g) Base, 3.25 oz. (92 g) Catalyst

#0921815 Standard Kit

COMPONENTS
#0921816 Tube Base
#0921817 Tube Catalyst

Bosworth Plastopaste™ CE
Zinc Oxide Impressions Paste

Plastopaste is a zinc oxide eugenol impression paste (light body) used for preliminary compound impressions, mucostatic impressions, rebasing dentures, and denture relines. Plastopaste easily mixes in 45 seconds to a consistent, extra creamy mixture, and sets hard in 2 minutes 30 seconds without distortion. Plastopaste is non-sticky, wipes easily from patient's face and hands, and can be repositioned without any visible cracks or lines. This formula has a pleasant taste and causes no eugenol burn.

Mixing Ratio: 13 g base to 5.6 g catalyst. I To disinfect: Immerse in a 1:213 iodophor for 10 minutes or 2% gluteraldehyde solution for 10 hours, prepared according to the manufacturer's instructions.

Tips: Plastopaste can be used as a temporary cement.

Standard Kit: 7.5 oz. (212 g) Base, 3.25 oz. (92 g) Catalyst

#0921590 Standard Kit

COMPONENTS
#0921591 7.5 oz. (212 g) Tube White Base
#0921592 .25 oz. (92 g) Tube Brown Catalyst

Bosworth Rimseal™
Peripheral Impression Material

Rimseal is a PEMA acrylic peripheral impression material and bite registration material that can be used with custom or plastic impression trays for full denture impressions and border molding (muscle trim). Rimseal extends to the proper peripheral height without slumping. This soft material records peripheral detail without distortion and sets to become a rigid part of the tray. Rimseal is yellow in color, providing a distinct contrast color from impression materials.

Standard Kit: 8 oz. (227 g) Powder, 6 oz. (177 ml) Liquid

#0921710 Standard Kit (Yellow Powder)

COMPONENTS

#0921711 8 oz. (227 g) Powder

#0921742 6 oz. (177 ml) Liquid

BEST SELLER

Bosworth Supergel® & Supergel Fresh®
Alginate Impression Material

Supergel is a premium blended alginate material that mixes readily to a smooth, creamy consistency. Its slow dehydration and low surface tension provide consistent, accurate, and bubble-free detailed reproductions. Pleasing sassafras flavor, controlled flow, heavy body, and gag reflex reduction provide greater patient acceptance. Supergel Fresh has all the benefits of our traditional alginate but is a dust-controlled formula for less airborne particles when opening and mixing. Supergel Fresh is blue in color and berry-cherry flavored.

Mixing Ratios: 9 g powder + 25 ml water = partial impression. 18 g powder + 50 ml water = full impression.

Bosworth Edentulous Tray Aways®

Edentulous Tray Aways® are single-use, disposable perforated edentulous impression trays that can be easily drilled for implant impressions. These unique and economical trays allow for maximum material retention and accuracy without the use of an adhesive. These high impact styrene trays provide an excellent impression with outstanding details. Edentulous Tray Aways are anatomically designed to be patient friendly and to allow for a perfect fit in just one visit.

Recommended for use with: TAC™, Supergel®

BESTSELLER

Bosworth Tray Aways® CE

Tray Aways are the disposable impression trays of choice suited for use with alginate or other types of impression materials where detailed reproduction and dimensionally-stable results are vital. Made from rigid, high-impact styrene, Tray Aways assist in generating a consistent, unsurpassed impression free of distortion or bite through. Smooth, rounded edges, interior retention slots, and vertical perforations enhance material retention.

Recommended for use with: TAC™and Supergel®.

Bosworth 100% Stainless Steel Impression Trays

Bosworth's Stainless Steel Impression Trays are created for use with alginate or any other type of impression material where detailed reproduction and dimensionally stable results are vital. They lock impression material in the tray to prevent distortion when removing it from the mouth. Uniform thickness gives superior rigidity for consistent results. Bosworth Stainless Steel Impression Trays have a smooth finish to minimize tissue trauma, and are thin enough to allow for optimum patient comfort. They are autoclavable for extended use and wear, and come in solid or perforated styles in a large assortment of pedodontic, edentulous, regular, and XL sizes for partial or full impressions.

Twist trays are the same great impression tray with a maneuverable handle to fit both upper and lower quadrants. Just spin the handle, and place in desired area - upper right, upper left, lower right, or lower left! Autoclavable for extended use and wear. Available in either solid or perforated.

Bosworth Big Bite Trays™

Big Bite Trays are economical, disposable bite registration trays with plastic frames and a gauze insert for use when recording centric occlusion. Big Bite Trays can be used on either side to cover a quadrant or for bi-lateral registration by clipping together right and left trays. The thin gauze mesh does not interfere with closure and ensures an accurate bite.

Recommended for use with: Re'Cord™, Superbite™

#0921841 50 Trays (25 left, 25 right)

Disposable Impression Trays

Our Plastic Impression Perforated Trays are disposable. The keyway perforations and side-wall slots ensures enough retention. The posterior rimlock feature minimizes secondary flow or gagging. The finger rest is for easy removal and the smooth edges provide patient comfort. The rigid design captures the best impression without distortion. Available in Blue, 12/bag. Comes in 9 sizes (#1-#9) for easy patient anatomy matching.

Bosworth G.T.C.™

G.T.C. is a special oxygenating formula designed to clean and brighten trays (including stainless steel trays), instruments, oral evacuators, diamond instruments and burs while removing alginate, zinc oxide eugenol paste, wax, and modeling compounds. G.T.C. is effective as a deodorizer. G.T.C. is excellent for flushing and cleaning evacuators.

#0921459 2 lb. (908 g) Bottle

Bosworth Tac™

Tray Adhesive

TAC is a tray adhesive compound available in convenient spray can or brush-on liquid for use with alginate impression materials. TAC securely holds the alginate in the tray when the impression is removed from the patient's mouth. Excellent for orthodontic use.

Recommended for use with: Edentulous Tray Aways® and Tray Aways®.

Standard Kit: 2 x 1/2 oz (14.8 ml) Bottles
#0921881 Standard Kit (Brush-on Liquid)

#0921882 4 oz (118 ml) Bulk Bottle
#0921883 8 oz (236 ml) Bulk Bottle

Mizzy Impression Compound Cakes & Sticks

Mizzy Compound Cakes & Sticks are pleasantly scented and flavored compound for taking full and partial impressions, and making preliminary impression trays.

Brown Medium Heat Compound:
- Plastic at 135˚F (57.2˚C)
- Ideal for snap impressions
- Working Temperature:
  125˚F - 135˚F (52˚C - 57˚C)

Red Low Heat Compound:
- Maximum visibility of detail
- Working Temperature:
  115˚F - 125˚F (46˚C - 52˚C)

Green Sticks:
- Has the most diverse working range
- Renders sharp details
- Will not fracture while trimming
- Chills evenly without warping
- Maximum contrast

Mylar Strips

These Mylar Strips are made of genuine mylar 0.002 gauge/60mm thick. The strips have smooth finished edges for patient comfort. They resist solvents, are very strong, will not stretch curl or break. Available in 4" x 3/8" (101.6 x 9.5 mm) strips.

#36-01022	Mylar Strips, 100/Pkg
#36-01122	Mylar Strips, 1000/Pkg

Bosworth Wonder Wedges

Wonder Wedges are interproximal wooden wedges for holding matrix bands when performing all multi-surface fillings. Wonder Wedges keep filling and restorative materials in the matrix and reduce the formation of overhang, making polishing easier and quicker. Wonder Wedges are anatomically conformed (rounded tip and concave sides) to readily shape to the natural contour(s) of the mesial and distal spaces, minimizing the trauma to the patient's gingiva and decreasing discomfort. The end of the wedge is square for a secure grip. Made from sycamore wood, which swells slightly in a wet environment, Wonder Wedges fit tightly and will not loosen during dental treatment.

Tips: Select the largest wedge that will fit the interproximal space to prevent the wedge from slipping.

fluorides

Gelato APF Fluoride Gel

Gelato APF Gels are economical and quick application fluoride treatment. The gel is a 60-second acidulated phosphate fluoride that contains 1.23% fluoride ion. The low PH provides maximum fluoride uptake in less than 60 seconds and the improved thixotropic properties ensure closer adherence to enamel and interproximal areas. The smooth creamy gel will not run and thickens during treatment to prevent patient gagging. The gel is gluten free and offered in many different flavors for patient satisfaction and there's no bitter aftertaste following application.

Gelato Neutral PH Fluoride Gel

Gelato Neutral PH Fluoride Gels are economical and quick application fluoride treatment. The Neutral PH formula provides total treatment for a wide patient profile. It is ideal for patients with cosmetic restorations, porcelain or resin. It provides the perfect non-acidic balance, allowing patients to tolerate and accept fluoride applications with comfort with a 4 minute thixotropic formula. The gel is gluten free and there's no bitter aftertaste following application.

preventives

Bosworth Aegis® Pit & Fissure Sealant with ACP

Aegis Pit and Fissure Sealant contains the “smart material” Amorphous Calcium Phosphate (ACP). The ACP filler is resilient and flexible, creating a stronger and longer lasting sealant. Aegis P&F has low shrinkage, good margin, and a slow rate of stress development so as to not chip off. Aegis P&F can be used with any light-curing device. Aegis’ controlled flowability keeps the sealant on the tooth while completely filling the pits and fissures. When properly maintained and placed, Aegis forms a chemical barrier that may help keep patients free from carious lesions on the occlusal surfaces. Sealant cures to opaque on enamel.

Recommended for use with: Bosworth ProphyBrite®.

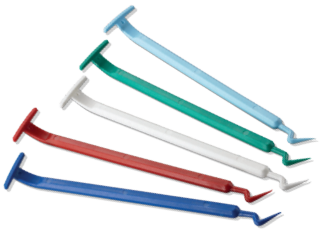
Tongue Scrapers



Did you know that more than 85% of bad breath originates in the mouth, not the stomach? Tongue Scrapers provide a handy way to clean the tongue's surface and make sure that bad breath bacteria are scraped away. Cleaning on a regular basis is known to significantly reduce bacteria and food particles on the tongue. Reduces mouth odors, overall bacteria and helps to keep the mouth fresh and clean.

prophy products

Gelato Prophy Paste CE

BESTSELLER

Gelato Prophy Paste provides smooth, pliable and splatter-free application. The 1.23% fluoride ion Gelato paste, 5-time winner of The Dental Advisor's Top Prophy Paste (2013, 2014, 2015, 2016 and now 2017!), is perfect for high-luster polishing and stain removal, but it remains gentle enough on the enamel with minimal enamel loss.

Gelato paste comes in boxes of 200 individual disposable cups for convenient use. The disposable cups also eliminate cross contamination and include a prophy ring for ease of application on the patient's teeth. For more options, the paste also comes in 6 ounce and 12 ounce jars.

Gelato Prophylaxis Paste is offered in 4 different grits: fine, medium, coarse and x-coarse. The fine grit is best for light stain removal and amalgam polishing. It's recommended to use the fine grit on children. For normal cleaning and polishing the medium grit is an ideal choice. The coarse grit is used in medium to heavy stain and plaque removal.

Bosworth Prophy Powder

Less abrasive than prophy paste, use sodium bicarbonate prophy powder on enamel to remove stubborn stains, plaque and soft debris. Bosworth's prophy powder is compatible with most air polishing units.

#16690	10 oz Grape
#16691	10 oz Spearmint
#16692	10 oz Orange
#16630	10 oz Strawberry
#16632	10 oz Lemon-Lime

#16696	Tri-Pack (3 oz Grape, 3 oz Orange, 3 oz Spearmint)
#16636	Tri-Pack (3 oz Lemon-Lime, 3 oz Mint, 3 oz Strawberry)

Bosworth ProphyBrite™

The ProphyBrite air polisher provides quick and gentle patient care. This unit delivers a fine sodium bicarbonate and water slurry for easy removal of plaque and stains. Ideal for cleaning and preparing teeth prior to placement of orthodontic brackets, sealants, bleaching, and fluoride treatments. Offers chair side convenience. Unit is easy to install, light weight, and portable from operatory to operatory. Connects to most four-hole handpiece coupler/air and water connection. A specific four-hole hose connection should be designated for optimal results. Comes with a DVD.

Tips: Nozzles are autoclavable. Do not autoclave nozzles if clogged.

Kit includes: Nozzle (2), Air Polisher, Powder Chamber Cap (2), Cleaning Files (2.5 cm, 8 cm, and 10 cm), O-Rings (cap, powder and water), Bosworth Prophy Powder (3 oz, 85 g sample).

topical anesthetics

Gelato Topical Anesthetic Gel

The Gelato 20% Benzocaine Anesthetic Gels are fast-acting with no systemic absorption. The 20% benzocaine provides temporary relief of pain during procedures, including local anesthetic injections, periodontal curettage, impression taking, scaling, intra-oral radiographs, root planning and prophylaxis. The gel comforts patients with ulcers, wounds or other minor mouth irritations. Also, Gelato has no bitter aftertaste.

1 oz. Jar (.03 L)

Bosworth Cora-Caine®

Cora-Caine is a pain-relieving adhesive ointment for new or intermediate dentures. The active ingredient is 16% Benzocaine. Cora-Caine provides immediate relief and a secure fit by soothing tender ridges and relieving the discomfort of sore spots. Acting as a gel-like cushion between the denture and the tissue, Cora-Caine is applied directly onto the denture to provide positive retention and enhance stability. Cora-Caine is pink in color and has no smell or aftertaste. Available for the dental office in a box of 36 count 4 g tubes or for home use in a 1 oz tube. Remains effective up to 24 hours. Perfect product for denture break-in period.

Tips: Cora-Caine is a great product to include in a new denture kit. Do not use Cora-Caine for patients who have a history of allergy to local anesthetics such as procaine, butacaine, or other "-caine" anesthetics.

#9597400	Clear, 12 straps	#9597340	Black, 12 straps

Bleaching Laminates

It's become an acceptable dental technique to bleach teeth using carbamide peroxide and a bleaching tray. The Bleaching Laminate is ideally suited for making the bleaching tray and withstanding bleaching products. It is thin, only .020 inches (.5 mm) thick once it's formed over the model. It has a foam liner to absorb the bleach, thus decreasing the bleaching time for the patient. The Bleaching Laminate is our best-selling item for bleaching processes.

#9605780 Bleaching Laminates, 50/Pkg

Dual Laminates/E-Gasket CE

The Pro-form Dual Laminate (E-gasket) is a unique combination of two materials formed into a single laminated sheet. It was made with bruxing cases in mind. The soft liner assures patient comfort and the hard surface assures long-lasting wear. Also, acrylic will bond to the hard surface to allow the dental technician to modify the occlusal surface. Available in 3 different thicknesses: 2, 3 and 5 mm.

#9604700 2mm (.080) E-Gasket, 12 sheets/Pkg
#9603580 3mm (.120) Dual Laminates, 12 sheets/Pkg
#9603605 5mm (.200) Dual Laminates, 12 sheets/Pkg

Niteguards CE

This laminate or layered soft/soft material was made specifically for the making of niteguards. The layering gives the thermoplastic a more abrasion-resistant characteristic that will withstand grinding better than traditional soft sheet materials.

Uses:Nightguards/Bruxing

#9602550 Niteguards, .120 (3mm) thickness, 12 sheets/box

Base Plate Material

This Base Plate Material is used for denture base or wax bite plates. Made of pure high-impact styrene, the material melts at a low temperature and is easy to work with. Available in 5" x 5" (127 x 127 mm) sheets and also in round.

Uses: Wax bite blates/bite registration & denture try-ins

	25/Pkg	100/Pkg	625/Pkg
0.060 (1.5 mm) thickness	#9616210	#9616120	#9616180

Machine III

WATCH THE ASSEMBLY VIDEO!

WATCH THE TECHNIQUE VIDEO!

The Machine III has been a staple in Keystone Industries' long-lasting line of highly-recommended vacuum former machines. The price, features and reliability make it the first choice in dental vacuum formers. The machine has more power than any other dental vacuum former, which results in a more accurate and definite dental thermoplastic appliance.

The aluminum construction is long-lasting, eliminating the possibility of rust. The heating element is symmetrically engineered for even heat distribution throughout the thermoplastic material. Made in the USA.

The Machine III is 8-1/4" w x 14" h (20.1 cm w x 36.6 cm h) and it weighs 19 lbs. (8.6 kg).

Pro-form® Single Chambered Vacuum Former

The Single Chambered Vacuum Former is an economical answer that can still excellently fabricate most thermo-plastic appliances. The all-aluminum construction eliminates rusting and the heating element is symmetrically engineered for uniform heat distribution. The hexagonal post keeps the frame from rotating or sliding. This vacuum former uses 5" x 5" (12.7 x 12.7 cm) resin sheets. Made in the USA.

The Vacuum Former is 9-3/4" x 8-1/4" x 13-1/2" and it weighs 15.8 lbs.

vacuum former accessories

Pressure Dome

This new attachment works in conjunction with Keystone Industries' vacuum formers to create a better fitting dental appliance. The dome uses positive pressure during vacuuming allowing for a form-fitting mold of thermoplastics. The Pressure Dome hooks into any existing air compressor lines (needs 80 PSI line pressure with 3/8 line) to provide extra pressure when adapting thermoplastics over an existing model. It will fit over any vacuum unit that makes 5" x 5" (12.7 x 12.7 cm) plastics. Works great for making laminated mouthguards, heavy-duty splints, hard/soft dual laminated splints, Proflex base plates, model duplication, orthodontic retainers and more.

#9594050 Pressure Dome

Pro-form® Centri-fuse

WATCH THE TECHNIQUE VIDEO!

The demand of athletic mouthguard customization has grown significantly during the past few years. It's not uncommon to see professional athletes showing off their custom mouthguards with personal numbers, team logos or phrases on it. That's why Keystone Industries is thrilled to launch the centri-fuse kit, an innovated product that makes the application of decals to mouthguards quicker, easier and more cost effective.

The typical lamination process for customize mouthguards can become expensive and time consuming, however with centri-fuse, customization has never been easier or more affordable. The centri-fuse system gives the advantage of applying the decal while eliminating the necessity of a second forming.

The adhesive material is applied by using a flameless torch to create superb clarity and excellent adhesion while eliminating bubbles. The material is user friendly and adjustments are made in a matter of a few minutes with conventional tools.

Kit includes: 20 Centri-fuse strips, Flameless Torch, Primer, Brush, Scissors, Trimming and Polishing Brush, Pre-printed Decals.

With this kit, you're able to meet the growing demand of custom mouthguards. The Centri-fuse system will let you print anything you want and fuse it to a vacuum formed mouthguard, making it truly a custom mouthguard.

Pro-form® Electric Knife

This is a great little electric knife useful in trimming and cutting a variety of thermoplastic dental materials. The unit has solid state circuitry, an interchangeable handpiece with up to four other replacement handpieces available, 2 outlet stations to accommodate more than one person, all stainless steel construction to resist rusting, and 10 amps of power.

The 10 amps allow you to cut most materials easily and smoothly by providing extra heat at the tip. Excellent for bleaching trays, impression trays, splints, mouthguards and more.

#9144730 Electric Knife, 110V
#9144770 Handle

Microtorch

This Microtorch is a 2-in-1 open flame torch and flameless heat tool with a heat shrink attachment. The torch is excellent use to heat materials, ignite materials, pinpoint torch, shrink tubing, solder and desolder, terminate specialty connectors and more.

#1820005 Microtorch

Insta-cool®

Use Insta-cool® to immediately chill dental appliances for better adaptation and faster production. Using Insta-cool® assures fast, excellent fitting results.

#7000333 Insta-cool®, 10 oz. can (283 g)

Mold Release Spray

This Mold Release Spray is and extremely versatile release agent and lubricant. The silicone spray produces a dry anti-stick surface coating, which is particularly suited as a model spray prior to vacuum forming mouthguard or other thermoplastic materials.

#5940310 Mold Release Spray, 11 oz. can (311 g)

Utility Scissors

These All-Purpose Utility Scissors are great for bulk trimming of thermoplastics, especially Pro-form mouthguards. The easy grip handle and stainless steel construction is very handy throughout the lab or office.

#9139720 Utility Scissors

Hatho Miniature Handpiece Scotch Brite™ Brushes

coarse medium fine

Mounted on mandrel. Same application as Polishing Discs with Scotch Brite™. Available in packs of 12.

#1670016	Coarse, 5,000 rpm
#1670092	Medium, 5,000 rpm
#1670091	Fine, 5,000 rpm

Heavy Duty Strap Boxes

This is an ideal box for a mouthguard with an attached helmet strap. The cases are made of high-density polypropylene with a hinged lid. A slit on the front of the box allows for the mouthguard strap to come out of the box. We provide personal imprinting for this product as well.

#9575615	Black Strap Box	12/Pkg
#9575635	Gray Strap Box	12/Pkg

High Gloss Ortho Boxes

High Gloss Ortho Boxes are perfect for storing mouthguards, retainers, bleaching trays and splints. Made of flexible plastic, the box has a hinge design and secure latching system to ensure maximum protection. The box is 3/4-inch (19 mm) deep. Available in packages of 12. Imprinting available, see page 13.

TERMS & POLICIES

PAYMENT OPTIONS:

Open accounts may be established following approval of a completed Credit Application.

Open account invoices are payable 30 days from date of invoice. Past due accounts are subject to finance charge of 1-1/2% per month. Payment may be made by check and accounts awaiting open account status may pay using Visa, Mastercard and American Express. All orders are payable in U.S. dollars. Any checks returned by the bank for non-sufficient funds may be subject to a $25 fee.

ORDERING:

Phone Orders: Monday - Friday, 8:30 AM to 5:30 PM, Eastern Standard Time.

Placing Orders via Fax: 856-663-0381

Minimum Order: $100.00 for Domestic and $250.00 for International. Orders under minimum amount are subject to a $10.00 handling charge.

Drop Ship Orders: Are subject to a $5.00 fee.

DELIVERY:

Keystone delivers domestic orders via insured ground service carrier. Next Day Air, Second Day Air, and Third Day Select Delivery are available at an additional charge upon request. Hazardous materials are subject to the carrier's handling charge and some items may not be shipped by air.

NOTE: For orders outside the continental U.S., call for shipping rates. Claims for damages or shortages must be made within 7 days of receipt. Damaged shipping cartons must be noted as such when signed for. All carton counts must be checked and signed for by the receiver in order for any discrepancies to be reconciled with the shipper.

RETURN POLICY:

All returns require prior return authorization. Contact our customer service department or your sales representative for return authorization.

The following conditions must be complied with:

- All products must be returned complete with all accessories and instruction sheets, if applicable, in original packaging and in saleable condition.
- A copy of the invoice and reason for the return must accompany all returns.
- All product returned within 90 days of purchase will be subject to restocking fee.

RETURN POLICY cont'd

- No merchandise or equipment may be returned for credit after 90 days of purchase.
- No merchandise or equipment may be returned for credit, regardless of its purchase date, if it is within fifteen (15) months of it's expiration date.
- Used handpieces and equipment may not be returned for credit. Please verify that you have received exactly what you ordered before you use it.
- Defective merchandise will be repaired or replaced in accordance with manufacturer warranties.
- Returns must be sent by a traceable carrier (e.g. UPS).
- Return freight costs are the responsibility of the customer unless the return is due to a Keystone error.
- Returns not following the above policies may be refused or subject to a restocking charge.

CANADIAN RETURN POLICY:

In the event Keystone makes an error filling your order, please contact our customer service department or your sales representative immediately upon receipt of your order to request a pick up for the incorrect items. Keystone will contact our Canadian shipper, UPS to request a pick up and UPS will coordinate the item's return with our Credit/Returns Department. We will issue all credits upon receipt of the parcel according to the return freight charges that result from company errors, so if it is determined that it was not our error, a fee for the return freight will be deducted from the credit amount due the customer.

Items not returnable:

- Hazardous items
- Pharma products
- Items that cannot be returned to the vendor (including expired items)
- Special Order Items: Products that we do not ordinarily stock are not returnable.

ALL RETURNS SHOULD BE SENT TO:

KEYSTONE INDUSTRIES
52 West King Street
Myerstown, PA 17067
