Machine III

The Machine III has been a staple in Keystone Industries' long-lasting line of highly recommended vacuum formers.

About Machine III

The price, features and reliability make it the first choice in dental vacuum formers. The machine has more power than any other dental vacuum former, which means the production of more accurate and defined dental thermoplastic appliance.

This machine is used to process bleaching trays, sports mouthguards, implant splints, temporary splints, custom impression trays, denture bases, copings, temporary crowns and bridges, and orthodontic appliances.
