

Softone™

Softone™ is a reliable tissue conditioner and functional impression material

About Softone™

Softone restores, conditions, massages, and rehabilitates damaged tissue before a new denture rebase or final reline. Softone's unique flow and natural flex stimulate the natural healing process and restore tissue to a sound physiological state. Softone™ allows the denture to stay in the mouth throughout the treatment period.

If the patient has a swollen or sore ridge, Softone will massage and rehabilitate back to the patients comfort level. Softone is a functional impression material formulated to last up to 4 days in the mouth.

Features & Benefits

- Clean, refreshing taste
- Non-sticky & Quick-setting
- Adheres but does not bond to denture
- Unique flow and natural give stimulates the Healing process and restores tissue to a sound physiological state
