

Hatho Habras Discs

Habras Discs offer a unique, three-dimensional abrasive/flexible bristle design that provides a uniform finish. These discs are ideal for heavy cleaning (coarse), removing light oxide (medium), pre-polishing, semi-finishing, blending, texturizing and polishing (fine).

Habras Discs provide the convenience of a pre-charged abrasive but do not generate the heat associated with rubber wheels. Embedded cubitron mineral abrasive is much harder than most metal.
