# What Dental Professionals Think of KeyPrint®

*“Keystone’s are the highest quality materials we have seen, and we are eagerly integrating them into our digital workflow.”*

— JAY COLLINS, OWNER OF CORNERSTONE DENTAL LABS

*“We’ve been receiving great feedback from dentists that KeySplint Hard® is surviving even the most severe bruxers.”*

— CHRIS KABOT, VICE PRESIDENT, RESEARCH AND DEVELOPMENT AT AFFORDABLE CARE

*“KeyGuide® resin is a perfect fit for our laboratory. The material prints quickly and accurately in our 3D printer and polishes to a beautiful high-luster shine. Our doctors are loving it!”*

— KEN KINCAID, CDT, RG, TE

*“KeySplint Soft® has the unique ability to change flexural properties over the temperature range of the indicated uses. These dynamic properties add a unique characteristic that should extend the life of the splint device by preventing the degradation due to brittle fracture.”*

— MARK LATTA, DMD, MS

SINCE 2018

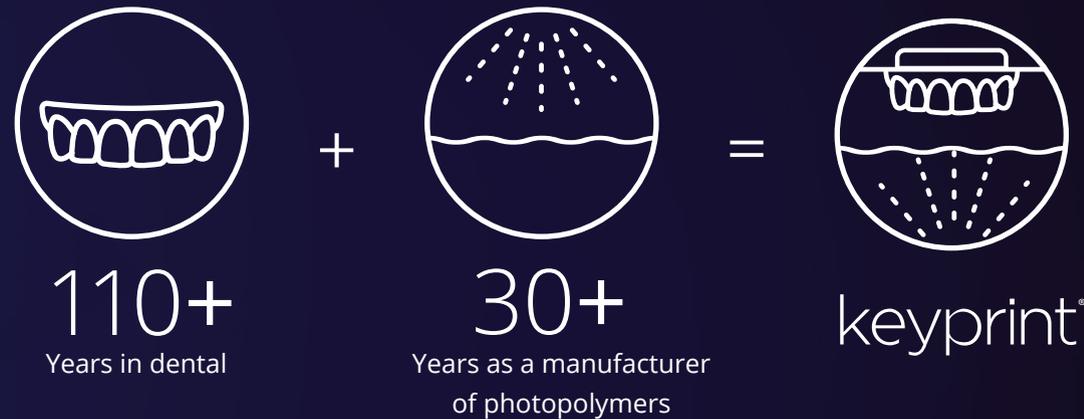

# Our KeyPrint® Journey

Entirely formulated and produced in the USA!

In an industry that is increasingly defined by the ability to innovate, adapt, and produce consistent results, Keystone Industries introduced KeyPrint in 2018, a line of precision 3D resins specifically formulated for the dental industry. KeyPrint combines Keystone's photopolymer expertise with its history of dental excellence to deliver innovative 3D printing resins to the dental market.

Designed and produced in the USA, the full KeyPrint line is available throughout North America, Europe, and other global territories. KeyPrint resins are compatible with DLP, LCD, and MSLA printers (wavelengths of 385–405 nm). Keystone is validating 3D printers on an ongoing basis to ensure our KeyPrint resins work reliably in multiple open-source printers.

Prioritizing clinical results and patient safety, KeyPrint resins are designed in accordance with globally recognized regulatory standards and are subject to a battery of mechanical tests resulting in biocompatible prints compliant with international standards to ensure efficacy and effectiveness for patients. KeyPrint's robust formulations guarantee a shelf life for the bottle of resin, along with color stability.

**BIOCOMPATIBLE MEDICAL DEVICE**

# KeyDenture® Base

A new standard for digital denture fabrication.

Designed for fast-printing and efficient workflows, KeyDenture Base ensures long-lasting performance and reliability for your patients. Available in four classic Diamond D shades, it provides a natural, aesthetically pleasing appearance that exceeds industry standards.

- **High Impact Durability; Flexible without being brittle**
- **Realistic, life-like recreation of natural gingival tissue**
- **Low viscosity allows labs to print faster**
- **Comfortable for the patient**
- **Excellent retention**
- **Compatible with digital laboratory workflows/popular tooth materials**
- **Available in the USA and certain global territories**

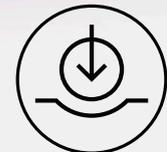

**BIOCOMPATIBLE**

**TPO FREE**

**COST EFFECTIVE**

BIOCOMPATIBLE MEDICAL DEVICE

# KeyGuard<sup>®</sup>

From the team that brought you Pro-form<sup>®</sup>!

KeyGuard precision dental resin produces custom-fit mouthguards for unbeatable comfort and protection!

- **Biocompatible**
- **Precise fit for enhanced comfort and performance**
- **Optimized Cost Efficiency**
- **Available in the USA, EU, and certain global territories**
- **Protection only where needed with complete design freedom**

### BIOCOMPATIBLE MEDICAL DEVICE

# KeySplint® Soft

For printing splints and night guards.

Utilizing state of the art technologies, Keystone Industries developed a one-of-a-kind 3D printing resin for the fabrication of flexible, durable dental splints and night guards.

- **Strong and flexible; not brittle**
- **Translucent**
- **State of the art technology**
- **BPA, MMA & Phthalate free**
- **Available in the USA, Canada, EU, AUS and certain global territories**

BIOCOMPATIBLE

FLEXIBLE

EASY TO POLISH

EASILY CLEANED

# Doctors love KeySplint® Soft for their patients & practice!

*“KeySplint Soft offers unmatched durability and patient comfort. Combine that with the faster turnaround and easy replacement for night guard/splint fabrication, and you’ve got a solution that will have doctors wondering how they ever managed to practice without it.”*

— DR. BRANDON OWEN, OWEN ORTHODONTICS LLC, LAKEWAY, TX

*“KeySplint Soft’s unique thermoplastic features allow me to design guards that are snug but the patient loves the comfortable feel.”*

— MICHAEL D SCHERER, DMD, MS, APC & MELISSA D SHOTELL, DMD, MS, SONORA, CA

Check out our independent wear study!

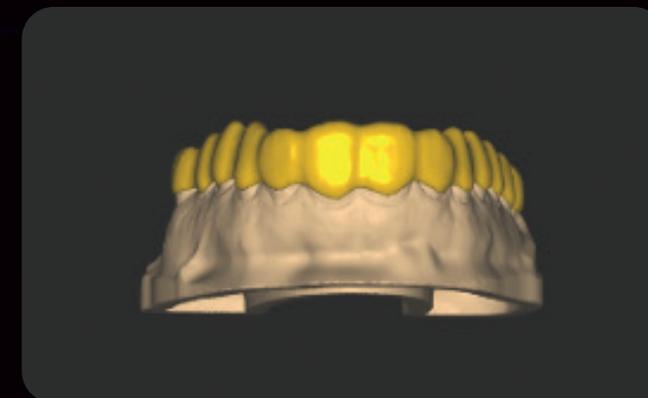

## **STRONG YET FLEXIBLE; NOT BRITTLE**

Combines strength needed to protect teeth with added flexibility for better patient comfort.

## **EASILY CLEANED AND MAINTAINED**

Easily cleaned by the patient.

## **HIGHLY PRECISE DEVICES**

Precise, strong and smooth finished parts. Limited remakes and repairs can be done quickly if needed, saving time for doctor.

## **ELASTIC MEMORY FOR EASY PLACEMENT**

KeySplint Soft can be warmed in water for easy placement and minimal chairside adjustments, saving time for doctors!

BIOCOMPATIBLE MEDICAL DEVICE

# KeySplint Hard<sup>®</sup>

For rigid dental splints and night guards.

KeySplint Hard is designed for rigid dental splints. KeySplint Hard provides therapy for bruxism and cases where tooth immobilization is needed.

- **Biocompatible Medical Device**
- **Hard for rigid splints**
- **BPA, MMA & Phthalate free**
- **Available in the USA, Canada, EU, AUS and certain global territories**

## BIOCOMPATIBLE MEDICAL DEVICE

# KeyDenture Try-In®

Take the uncertainty out of the denture fitting process.

KeyDenture Try-In takes the uncertainty out of the denture fitting process. Designed for precision and efficiency, KeyDenture Try-In is a photopolymer resin indicated for 3D printing of biocompatible, short-term trial dentures, intended for evaluation of fit, occlusion, aesthetics, and phonetics during try-in appointments.

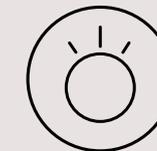

- **Cost effective for try-in dentures**
- **Exceptional surface quality**
- **Easy to characterize**
- **Polishes to high luster**
- **Biocompatible Medical Device**
- **Wide variety of KeyPrint® compatible workflows**
- **BPA, MMA & Phthalate free**
- **Available in the USA, Canada, EU, AUS and certain global territories**

**BIOCOMPATIBLE**

**COST EFFECTIVE**

**EXCEPTIONAL SURFACE**

BIOCOMPATIBLE MEDICAL DEVICE

# KeyGuide®

For manufacturing highly precise surgical guides.

KeyGuide is ideal for fabricating transparent and stable surgical guides, which enable the placement of implants at a precise angle and depth.

- Biocompatible medical device
- Easy to polish
- Autoclavable
- BPA, MMA & Phthalate free
- Strong
- Available in the USA, Canada, EU, AUS and certain global territories

**BIOCOMPATIBLE MEDICAL DEVICE**

# KeyOrtho IBT<sup>®</sup>

Ideal for orthodontic transfer trays for positioning brackets.

KeyOrtho IBT's translucency allows for precise positioning before and during bracket placement. Its high tensile strength allows for easy application of brackets in a single step, reducing chair time to minutes. KeyOrtho IBT is odorless, tasteless, flexible for easy removal, and compatible with all general bracket systems.

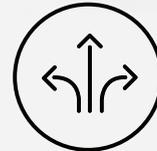

- **Biocompatible Medical Device**
- **Odorless & tasteless**
- **Adhesives release easily from tray**
- **Translucent for easy positioning**

**BIOCOMPATIBLE MEDICAL DEVICE**

# KeyTray®

Create precision custom trays quickly.

This strong, durable material can withstand the forces of taking a patient impression and removing the tray from the oral cavity. It is compatible with all types of impression material.

- **Biocompatible Medical Device**
- **No preliminary cast required**
- **Saves time by eliminating stone models**
- **Improved impression accuracy**
- **Compound waxes and border molding materials will adhere to tray**

KEYPRINT WORKFLOW VALIDATION

# Consumer Confidence in Safety & Efficacy

# Open Source Philosophy

We have an unmatched open ecosystem of workflows.

Keystone is always validating new printers to ensure that KeyPrint resins work reliably in as many open-source printers as possible. We work with printer partners to ensure validated KeyPrint settings produce safe, reliable, results. Keystone cannot guarantee the results from using KeyPrint resins with unvalidated settings or printers. Using a non-validated workflow may produce a print that does not meet the mechanical or biocompatible requirements for the product's intended use. KeyPrint resins are designed to produce accurate, detailed parts when used in 385–405 nm DLP, LCD, and MSLA printers.

# KeyModel Ultra®

Designed for 3D printing of dental and orthodontic models.

This fast-printing formulation delivers sharp detail and a smooth finish with reliable workflow stability. Integrated release technology enables quick thermoform separation.

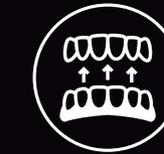

- High-speed print formulation
- Integrated release agent for easy thermoform separation
- Three colors optimized for sharp detail
- Smooth surface finish
- Stability in production workflow
- Integrated with a wide range of 3D printers

## LABORATORY

# KeyOrthoModel<sup>®</sup>

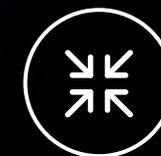

KeyOrthoModel is designed for high-speed and accurate prints.

KeyOrthoModel is suitable for vacuum-forming orthodontic devices, remaining stable while subjected to the elevated temperatures associated with thermoforming.

- **Optimized for print @ 100 and 200µm layer thickness for high throughput**
- **Prints in 1/2 the time of KeyModel at the same layer thickness**
- **Perfect for making aligners**
- **Withstands thermoforming temperatures**
- **Pairs with Pro-form<sup>®</sup>**
